

January 19, 1926.

Dr. Arthur Willey,
Biological Building,
McGill University.

Dear Dr. Willey:-

Replying to your letter of the 15th inst. let me say that the views you therein express are exactly what I have held ever since I came to this University. I am quite sure that it would be better that such an arrangement should be made in the departments of Zoology, Botany, Chemistry and Physics and I am taking steps to have this view recognised.

Yours faithfully,

Principal.
