TUESDAY MORNING, SEPT. 16.

### Prices Can Be Controlled.

Even if the steed has been stole there is some consolation in getting the stable door locked before the rest of the stock and harness have been taken away. The activity of the new board of commerce would have been an absolute blessing two years ago, but it is not too late yet to do a lot of good.

It is a long step in advance to have the admission from the governing powers that prices can be controlled. This has been denied so long that some people actually came to believe it. But the board of commerce has at last been endowed with the power which a succession of food controllers told us did not exist. Mr. Fairty Toronto's assistant corporation counsel, declares that the board can do anything. It can alter the tariff. It can fix the prices at which commodities can be sold. It can cancel patents. It can do all those things that we know any government

We should like to call attention to Mr. Lundy's statement:

"We have the power to say to the exporters: You shall not export so much that there is a scarcity in Canada, and you must sell to Canadians, not at the famine prices Europe may be prepared to pay, but at a fair price.' Instead of Canadians paying more because of the high prices secured on European contracts they should get a lower price because of the inordinate profits made across the Atlantic."

Therefore, MacMurchy's article on the subject which was published in MacLean's magazine for September. And without the direct help of the circulate it is going to be mighty hard to abate it any. Dr. MacMurchy gives one of the best of reasons why every possible precaution should be taken to avert such accidents, and she also tells how it can be done. She goes on to say:

"Thirty lives, mostly children's lives, were lost in Toronto thru automobile accidents, from January 1 to August 8, 1919, according to one of the present system of government.

Thirty lives, mostly children's lives, were lost in Toronto thru automobile accidents, from January 1 to August 8, 1919, according to one of the present system of government in regard to the mighty hard to abate it any. Dr. MacMurchy gives one of the best of reasons why every possible precaution should be taken to avert such accidents, and she also tells how it can be done. She goes on to say:

"Thirty lives, mostly children's lives, were lost in Toronto thru automobile accidents, from January 1 to August 8, 1919, according to one of the present system of government in regard to the mighty hard to abate it any. Dr. MacMurchy gives one of the best of reasons why every possible precaution should be taken to avert such accidents, and said about the resistance from beddenesses of the house to the continuance of the present system of government in regard to the mighty hard to abate it any. Dr. MacMurchy gives one of the best of reasons why every possible precaution should be taken to avert such accidents, and said about the

Readers of The World are familiar with our advocacy of the adoption of this plan and principle. But we met with nothing but criticism and denial one Canadian city—burled in these of the possibility of doing such this graves.

"Thirty homes desolate—thirty referring to them as great Canadians." For them, as great Canadians. J. F. McGregor slashed the agricultural record of the Hearst government.

Déwart Weil Received.

H. H. Dewart, upon rising to speak, preceived an avaiton. He emphasized of the possibility of doing such things. graves. We congratulate the public on at last having their interests placed in an attack upon motors. But who killed the contrast between the record of the Liberal and Conservative parties on the question of temperance legislation. The Liberal party, as a party, the hands of an authority which has the children?

the power to remedy the worst of "Of these thirty Canadians, twenty- affirmed its attitude in favor of pro-

This is the sort of self-hypnotizing opinion about the government-owned railways which ought to be avoided. No private owner sets out upon the management of his property with the fixed idea that he is going to make fixed idea that he is going to make is not neglect, what is? It is contributory negligence which may cause thus escaping uninjured, a free ride to its home in the motor, get the name government had juggled with the way the government had juggled with the date of the present elections, endeavoring to mix up the referendum vote with the general election. The Liberal party would see to it that the government had juggled with the date of the present elections, endeavoring to mix up the referendum vote with the general election. The Liberal party would see to it that the government did not escape the judgment of the people upon its record by their vote German Immigrants in Argentina a loss of it. To private the death of the child. Some of these twenty-four children lost their lives thru the neglect of their parents. must expect to have to meet losses on his property instead of expecting law in regard to the parents of children who thus misconduct themselves.

the railways of Canada can be made more because they are not expected to yield cash profits, but simply to give cycle with one hand on the mudguard of a motor or on the hand-rail of a conservative party was so closely alled with Providence that providing sinking and depreciation funds, and reducing existing liabilities, Curly Locks, Curly Locks, wilt thou be while keeping operation up to the highest standard, is not only the problem, but the method of success.

tinued to make ever since the institution of railways, is to charge too Curly Locks, Curly Locks, come to us high rates, and to discriminate among Thou needst not to rise until mid-aftercustomers. The postoffice was probably the first great public service to show the advantage of uniform charges Thy guerdon shall be what thou askest on different classes of matter. The railways classify their freight and Curly Locks, Curly Locks, give us a opposition had put itself on record adopted, in this part of the world, any adopted, in this part of the world, any my pants.
uniform system of rates, neither on Oh, come to the coziest of seven-room the zone system, nor even on the the zone system, nor even on the commutation system, which has been commutation system, which has been curry Locks, Curly Locks, wilt thou be adopted to a small extent in some places. The way to get trusiness is to make attractive rates. But the Three Liners En Route railways have always taken the other method of raising rates when they were short of funds-choking off business instead of increasing it.

If the Canadian National Railways are to fill up the Canadian west and develop the tremendous traffic that we 20.
