## FLOOR PLAN OF BOOK SECTION

The accompanying plan is intended as a guide to our Book Department by showing the positions of our big leading lines of books. Besides the lines shown here we always carry a variety of smaller lines, giving our customers a practically unlimited choice of titles and bindings, which, with the EATON Prices, make this the ideal place for selecting the Christmas Gift.

Buyers for Sunday School Libraries will also find their wants carefully attended to, as we have printed lists of our books, making the selection quick and easy. As it is impossible to show on the counter every title of the various lines, we always esteem it a favor to have our customers ask for any title they may wish, but cannot find.

In the matter of any particular books which we may not have in stock, we will be pleased to quote prices and try to procure for customers.
