Institute, Mrs. Joseph West gave a helpful talk upon "Home Gardens."

The first need to be considered to-day, said Mrs. West, is food, not money, and so it is a question of bushels in-

stead of dollars. The next three weeks, the speaker continued, will be the most important ones, in which all must think of the world hunger; one month or five weeks after it will be too late. We must act after it will be too late. We must act now; when famine comes to a nation it will not be a case of rich or poor, but all will suffer alike. The whole question is one of shortage of labor, and any person who is able to grow food and will not, must fall back upon living upon another. It is not enough to say that one will be willing to pay for others to labor for us. To pro-duce food we must each do our share in order to have the greatest amount of

for others to labor for us. To produce food we must each do our share in order to have the greatest amount of production.

Mrs. West advised those present to avoid entering into large schemes which would result in failure, but rather to begin in a small way. The first result of any effort to produce food should be to reduce the general pressure. Each person endeavoring to produce for themselves and their family would help to relieve this pressure upon the markets. Food produced in the back garden, while it might not be fit for marketing purposes, would be perfectly good for home consumption. There would also be a big saving in the cost of delivery and transportation and of waste between the grower and the table. Some excellently practical advice was given by the speaker from her own experiences as to the kind of tools "Women have their part to play in state of the play in the loght way.

Thinks Women Must Do Their Part. But in the Right Way.

Women have their part to play it, of course, but, do you know, I don't see why they must put on khaki petticoats and begin recruiting from motors on the street corners. Women should do recruiting of course, but they should recruit their husbands, sons, nephews, cousins. "I'll admit I'm a mild anti-suffra-

gist—oh, a very mild one, but maybe that's the reason I feel this way about women recruiting and doing other street corner work."
