DIT LORRAIN UP

Strike Rumor Unconfirmed—New
York Participated in Buying
Movement.

Lorrain Consolidated was not only the feature of the mining exchanges yesterday, but likewise the mystery. The buying precipitated itself into the market right at the opening, and from 30 the price rapidly advanced to 46, that being the price for the last sale. The first orders came from Cobalt, but much of the later business was from New York firms, Mark

WATERLOO PIONEER DEAD.

KITCHENER, Ont., Sept. 22.—Isaac S. Moyer, who was born in Waterloo County in 1834, died at Brown City, which are Thursday the victim of the submarine fourcas.

WATERLOO PIONEER DEAD. was from New York firms. Mark Harris & Co., of the Standard Bank good profits during the movement. It was surmised by other brokers that an important strike had been made on the company's property, but no confirmation of this could be ob-

Lorrain Consolidated has properties very favorably located in South Lorin the Cobalt district, and prior to the big decline in the price of silver much development work had been done and several important underround veins found. The mine was rell equipped, and a short time ago new financing was arranged by the sale of 250,000 of treasury stock at

20 cents 2 share.

Work has been proceeding under the management of Julius Cohen, a brother of S. Cohen, who made the Crown Reserve such a success and his recent report spoke of sinking 40 feet further to the contact before crosscutting for the vein which had dipped out of the shaft.

Lorrain Consoldated Mines, Limited, has a strong board of directors, the president being D. M. Steindler of New York, who has just purchased an interest in the St. Anthony chased are proceeding under the stitute, Premier Hearst of Ontario, said he would go back with a message of courage and hope, and that he was now fully convinced that the British build dog had his grip on the damnable Hun, and would never let go:

DOME RAND CONSISTENT SHIPPER OF COPPER ORE

Low Grade Ore to Be Treated at Profit-Tenders for Drilling.

TIMAGAMI, Sept. 22 .- The Dominich Kand Company, which has been one of the most consistent shippers of copper ore from its properties here, has just completed another shipment, which, added to the already heavy shipments made to date, will bring the total tonnage for the year up to a high figure. In addition, to the leave the leave to the leave t figure. In addition to the large amount of ore shipped just as it is mined, there is a large quantity of low-grade ore in the dumps waiting while the proper method of treatment is being studied. With the installation of the concentrator the lowest grade ore can be treated at a profit.

Bids are being asked for the diamond drilling contracts on the Por-cupine properties, and it is believed from the excellent indications on the surface that ore bodies containing good values will be located by the drills.

Buying of Dome Stock Has Significance

NEW YORK, Sept. 22.-While strength in nickel may have in-fluenced recent buying of Dome, the stock has probably begun to appreciate the important new discoveries made in Dome Extension property, which is under option to Dome Mines and which will probably be taken over. In that event an additional mill will be erected, giving Dome milling capacity of 100,000 tons a month, or more double capacity of present mill of 45, 000 tons a month. Funds for additional mill and for development purposes may be raised by issuance of addi-tical stock, which will mean rights to stockholders.

THE MINING MARKET.

Homer L. Gibson, in his fortnightly cview, says: "Canadian investment interest has been dominated by the latest Dominion war loan of \$100,000,000, which has just been offered to the public. just been offered to the public. As was expected, the response to this loan has been immediate and wide-spread, as the very favorable terms on which the loan is offered, the fact that it is secured by the resources of entire Dominion and the feeling that a subscription thereto is a patriotic privilege, would seem to

guarantee over-subscription, which

even now is indicated. "Speculative interest has been largely centred in the market for industrial stocks, which in the New York market and on the Canadian ex-changes as well, have sold at new high prices in their history. This would seem to be but a reflection of the sensational profits earned by many of these companies within the last two years, and it is confidently pre-dicted that even higher prices will yet be seen for many of these issues. "These influences have had a deterrent effect on the mining market, Exchange fluctuations as follows: which has, during the fortnight, shown a somewhat conflicting tone. Sharp rises in several assues have been followed by equally sharp reactions. This would seem to indicate that the public is not yet definitely in the market, in spite of which a gradual broaden-

ing of interest can be noted.
"An indication of the probable future trend of the mining market is seen in the steady accumulation of the better issues by the traders of the north country, who are usually well informed on mine conditions and generally not far behind from the market \$3.55; January and February, \$3.57; February and March, \$9.58; March and Aprl. \$9.59; March and Aprl. \$9.99½; April and May. \$9.60½; May and thirty days, and the purchasers seem quite content to await the higher erally not far behind from the market thirty days, and the purchasers seem quite content to await the higher prices which mine conditions generally should warrant. Such a lead would appear to be a good one to follow."

PERTH, Ont., Sept. 22.—There were 1000 boxes of white and 400 colored elege sold here today. Running price, 20 9-16c.
