Instead of trimming your corns, which merely makes them grow just step into any drug store and ask for a quarter of an ounce of freezone. This will cost very little, but is sufficient to remove every hard or soft corn or callus from one's feet. A few drops applied directly upon a tencer, aching corn stops the soreness instantly, and soon the corn shrivels up so it lifts right out, root and all, without pain. This drug is harmless and never inflames or even irritates the surrounding tissue or skin.

Alkali In Shampoos Bad For Washing Hair

Don't use prepared shampoos or anything else, that contains too much alkali, for this is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is just plain mulsified cocoanut oil, for it is pure and entirely greaseless. It's very cheap, and beats the most expensive soaps or anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

Simply moisten the hair with water and rub it in, about a teaspoonful is all that is required. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is soft, fresh looking, bright, fluffy, wavy, and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff.
