

7. *The Foot-Prints of the Creator*,—Or the Asterolopis of Stromness. By HUGH MILLER. 8vo, cloth, pp. 337. (American Edition.) Price 38 cts.

The author of this work is a self-taught Scotch geologist. The style of the work is simple, graphic, vivid, and pungent; the thoughts elevated and noble; the facts and reasoning irresistible. It contains a triumphant refutation of a semi-infidel work, entitled the "Vestiges of Creation." It has passed through several editions in both Europe and America. This volume is preceded by an interesting memoir of the author. The "Foot-Prints of the Creator," is regarded as one of the best defences of Truth that science can produce. The late Dr. Buckland, remarked, at a meeting of the British Association, that he "had never been so much astonished in his life, by the powers of any man, as he had by the geological descriptions of Mr. Miller. That wonderful man had described these objects with a facility which made him (Dr. B.) ashamed of the comparative meagreness and poverty of his own descriptions in the Bridgewater Treatise, which had cost him hours and days of labour. He would give his left hand to possess such powers of description as this man; and if it please Providence to spare his useful life, he if any one, would render science attractive and popular, and do equal service to theology and geology."

8. *The Old Red Sandstone*,—Or New Walks in an Old Field. Illustrated. By HUGH MILLER. 8vo, cloth, pp. 233. (American Edition.) Price 88 cts.

This is another of the remarkable and charming works of Hugh Miller. The late Dr. J. Pye Smith terms this work "a geological work, small in size, unpretending in spirit and manner; its contents, the conscientious narration of fact; its style, the beautiful simplicity of truth; and altogether possessing, for a rational reader, an interest superior to that of a novel." *Silliman's American Journal of Science* remarks—"this admirable work evinces talent of the highest order, a deep and healthful moral feeling, a perfect command of the finest language, and a beautiful union of philosophy and poetry. No geologist can peruse this volume without instruction and delight." And the *Edinburgh Review* observes—"The excellent and lively work of our meritorious, self-taught countryman, Mr. Miller, is as admirable for the clearness of its descriptions, and the sweetness of its composition, as for the purity and gracefulness which pervade it."

9. *The Religion of Geology*—And its Connected Sciences. By EDWARD HITCHCOCK, D.D. LL.D. 8vo, cloth, pp. 511. [American Edition.] Price \$1.

This admirable volume consists of a series of 14 lectures, which, the author has delivered, from time to time, in the course of his professional duties. The object of these lectures, "is to develop the relations between geology and religion;" and this object the author pursues, in a clear and eloquent style, with much learning and research, and with great force of argument.

10. *The Mineral Kingdom*,—16mo, square, cloth, pp. 180. [London: Christian Knowledge Society.] Price 30 cts.

A little book beautifully illustrated by engravings, and charmingly written.

11. *Outlines of British Geology*,—To which is appended a glossary of terms used in Geology and Mineralogy. 12mo, cloth, pp. 305. [London: Christian Knowledge Society.] Price 62 cts.

An admirable book, written in a simple and elegant style, illustrated with fine engravings and coloured maps.

12. *The Elements of Geology*,—By JUSTIN R. LOOMIS. With Illustrations. 8vo, cloth, pp. 198. [American Edition.] Price 62 cts.

A brief, systematic and very lucid exposition of the elements of geology, with many appropriate illustrations.

13. *Introductory Book to the Sciences*,—For schools and private students. In two parts. Part I, Physical Science. Part II, Natural History. By JAMES NICOL. Illustrated by 106 Engravings. 12mo, cloth, pp. 144. [English Edition.] Price 25 cts.

This little book, so profusely illustrated, and written in so clear and perspicuous a style, is an appropriate introduction to the study of physical and natural science. The author states that its design "is to furnish a short yet connected and comprehensive view of these departments of knowledge, which may serve as an introduction to a more extended study, either of the whole or of particular portions."

NATURAL PHILOSOPHY.

The Elementary Books on NATURAL PHILOSOPHY and CHEMISTRY, given in the following list, are, for the most part, equally suitable as text-books for students and library books for reference and general reading. The object of each book is sufficiently indicated by its title. Among several of the books mentioned, there is little difference in either their subjects or merits. Parties concerned can select which they please. These books embrace branches of knowledge that are daily growing in importance to all classes of the community:—

1. *Lectures on Natural Philosophy*,—Delivered in the National Normal School, Dublin. By the Rev. J. WILLIAM MCGAULEY, Professor. In two parts, illustrated. Part I, Natural Philosophy. Part II, Chemistry. 8vo, cloth, pp. 680. (English Edition.) Price \$2.
2. *A Text Book on Natural Philosophy*,—Containing the most recent discoveries and facts compiled from the best authorities. Illustrated. By JOHN WILLIAM DRAPER, M.D. 12mo, sheep, pp. 381. (American Edition.) Price 66 cts.
3. *Elements of Natural Philosophy*,—Illustrated. By ALONZO GRAY, A.M. 12mo, sheep, pp. 405. (American Edition.) Price 70 cts.
4. *Elements of Natural Philosophy*,—Being an experimental introduction to the study of the Physical Sciences. Illustrated. By GOLDING BIRD, A.M., M.D. 12mo, cloth, pp. 402. (American Edition.) Price 70 cts.
5. *A Manual of Natural Philosophy*,—Compiled from various sources. Illustrated. By JOHN JOHNSTON, A.M. 12mo, sheep, pp. 302. (American Edition.) Price 66 cts.
6. *Conversations on Natural Philosophy*,—In which the elements of that science are familiarly explained and adapted to the comprehension of the young. Illustrated with plates. With appropriate questions, illustrative notes, and a dictionary of Philosophical terms. By the Rev. J. L. BLAKE, D.D. 12mo, sheep, pp. 276+xxvii. plates=303. (American Edition.) Price 50 cts.
7. *Principles of Natural Philosophy*,—Popularly explained and illustrated. In two parts; separately, or bound together. 12mo, sheep, pp. 180+186=366. (Scottish School Book Association.) Price, Part I, 25 cts.; Part II, 30 cts.; bound together, 50 cts.
8. *A School Compendium of Natural and Experimental Philosophy*,—Embracing the elementary principles of the science. With a description of the Steam and Locomotive Engines. Illustrated. By RICHARD GREEN PARKER, A.M. 12mo, sheep, pp. 405. (American Edition.) Price 80 cts.
9. *A Preliminary Discourse on the Study of Natural Philosophy*,—By JOHN F. W. HERSHEY, Esq., A.M. 12mo, cloth, pp. 279. (American Edition.) Price 50 cts.
10. *Rudiments of Natural Philosophy*,—Designed for the Younger Classes in Academies and Schools. By DENISON OLMSTEAD. 18mo, cloth, pp. 179. (American Edition.) Price 28 cts.
11. *First Principles of Natural Philosophy*,—Being a familiar introduction to the study of that science. Illustrated. By JAMES RENWICK, LL.D. 18mo, half sheep, pp. 530. (American Edition.) Price 64 cts.
12. *Applications of the Science of Mechanics to Practical Purposes*,—Illustrated. By JAMES RENWICK, LL.D. 18mo, half sheep, pp. 327. (American Edition.) Price 75 cts.
13. *A Treatise on Mechanics applied to the Arts*,—Including Statics and Hydrostatics. Illustrated. By the Rev. HENRY MOSELEY, M.A. 12mo, cloth, pp. 310. (London: Christian Knowledge Society.) Price \$1.25.
14. *Illustrations of Mechanics*,—Illustrated. By the Rev. H. MOSELEY, A.M. Revised by JAMES RENWICK, LL.D. 18mo, half sheep, pp. 332. (American Edition.) Price 33 cts.
15. *Familiar Illustrations of Natural Philosophy*,—Selected principally from "Daniell's Chemical Philosophy." Illustrated. By JAMES RENWICK, LL.D. 18mo, half sheep, pp. 403. (American Edition.) Price 60 cts.
16. *Outlines of Natural Philosophy*,—For the use of Schools and private Learners. Illustrated. By C. LIST. 18mo, cloth, pp. (American Edition.) Price 28 cts.
17. *Outlines of a System of Mechanical Philosophy*,—Being a research into the laws of Force. By SAMUEL ELLIOTT COVES. 8vo, cloth, pp. 330. (American Edition.) Price 85 cts.
18. *Letters of Euler*,—On different Subjects of Natural Philosophy, addressed to a German Princess. With notes, and a life of Euler by DAVID BREWSTER, LL.D., containing a glossary of Scientific terms. With additional notes by JOHN GRISCOM, LL.D. In two vols. 18mo, half sheep, pp. 380+436=822. (American Edition.) Price 75 cts.
19. *Letters on Natural Magic*,—Addressed to SIR WALTER SCOTT, Bart. By SIR DAVID BREWSTER, KH. 18mo, half sheep, pp. 314. (American Edition.) Price 35 cts.
20. *Readings in Science*,—Being explanations of some of the most interesting appearances and principles in Natural Philosophy expressed in simple language and illustrated by familiar examples and engravings. 16mo, cloth, pp. 392. (London: Christian Knowledge Society.) Price \$1.10.
21. *Philosophy in Sport Made Science in Earnest*,—Being an attempt to illustrate the first principles of Natural Philosophy by the aid of the popular toys and sports of youth. 16mo, cloth, pp. 432. (American Edition.) Price 80 cts.

CHEMISTRY.

1. *Elements of Chemistry*,—Including the most recent discoveries and applications to the Science to Medicine and Pharmacy and to the
