

The Dining Room

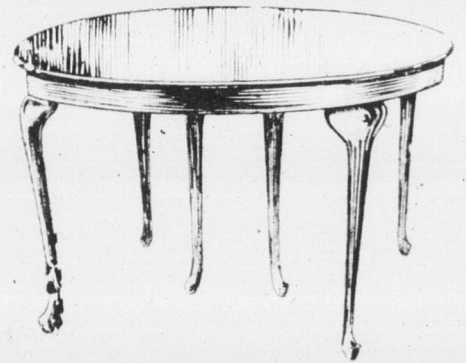

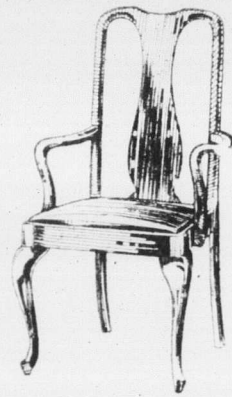

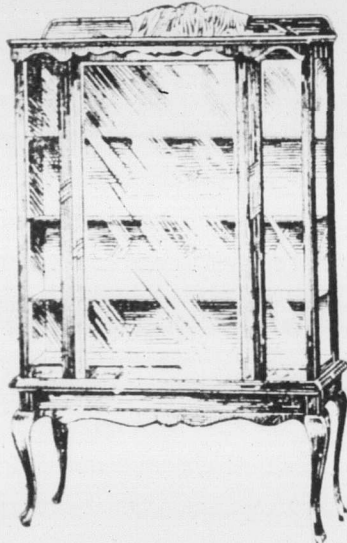

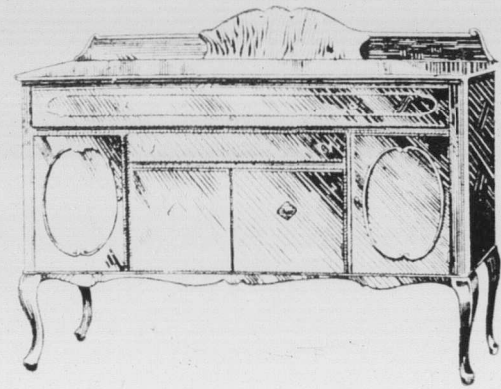

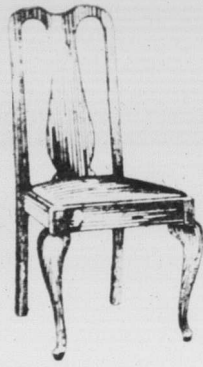

CHEERFUL hospitality must pervade the atmosphere of the Dining Room.

Somehow viands take on a more choice savor served in warming, genial surroundings.

For ourselves, we may say that our Dining Room furniture is the product of master craftsmen

who possess the true spirit of refinement, plus a more than casual care for comfort.

If you have a vision of your Dining Room as it could be, you will be doubly interested in our present showing: in our interpretations of what Dining Room Furniture should be, and our interpretation of what attractive values must be.
