

MINES AND MINING

Fish Creek Section is Coming to the Front. PROPERTIES ARE BEING OPENED

The Highland Group has been bonded by the Hall Mines—Work on the Snowshoe in Phoenix Camp is Making Good Progress—Eldorado Group.

Mr. W. R. Hartley is back after an absence of six weeks in the Fish River section of the Lardau, and says he considers it a region of great possibilities. There is considerable work in progress and the development, so far as it has gone, has been of a very satisfactory nature.

HIGHLAND GROUP.

Duncan Mines, Limited, Obtain an Option on That Property.

Charles Parker of Nelson has put through a deal embracing the Highland Group, consisting of the Highland, Josephine, Esther May and Maggie mineral claims, together with the mill site and water rights belonging thereto.

The present owners are W. P. Robinson, A. J. Marks, T. J. Lendrum, Nelson, E. D. Carter, Wallace, Idaho; James Bright and William Braden, Black River Falls, Wis., and the Scott McDonald estate.

Work on the Snowshoe.

Mr. A. J. McMillan is back from a trip to the Snowshoe in the Phoenix camp. The Snowshoe is the property of one of Mr. McMillan's syndicates. About 30 men are at work, he says, developing the Snowshoe. The main shaft has been sunk to a depth of 100 feet and the tunnel is in a distance of 250 feet.

The Eldorado Group.

Mr. R. C. Pollett reports that the Eldorado group in the Ymir district has been successfully floated. There remains, he says, only 50,000 shares of the promoters' stock for sale, and the price has been raised to 2 1/2 cents.

INTERESTED IN ROSSLAND.

Mr. G. S. Waterlow Expected to Arrive Here Early in August.

Mr. G. S. Waterlow of London, England, who is heavily interested in mining and real estate in Rossland and the district, is expected to arrive in the city early in August. Mr. Waterlow, it will be remembered, paid a lengthy visit to Rossland two years ago, and since that time has in many ways shown his interest in helping forward the development of this district.

HASTINGS EXPLORATION.

The Report of the Directors on the Arlington and Other Properties.

The report of the directors of the Hastings (British Columbia) Exploration Syndicate, Limited, to 25th inst., submitted to the meeting to be held in London on July 5th, states that an issue of 16,500 shares was made on February 29th. These shares were all applied for and are so paid up. The total issued capital therefore is now £50,000. In addition to the money in hand, £12,375 has yet to be called up on the £16,500 shares.

grants pending developments on the North Star and Sullivan mines. On the Sunlight Fraction, Slovan district, the assessment work only has been done this season.

LOCAL MINING NOTES.

Two more machines have been placed at work on the Nickel Plate and a larger addition is contemplated as soon as the management acquire a larger plant.

The work of assembling the big compressor on the Centre Star is well in hand and should be finished, if all goes well, within a couple of weeks.

Three cars were loading yesterday afternoon on the C. P. R. extension to the Le Roi mine. This is the first of the regular shipments to Trail, and the first train should go out today.

The shaft on the Anne is now down a little over 100 feet. Compressed air is being supplied from the Black Bear compressor to work the small hoist.

The three boilers that were in position next the old compressor plant for the Le Roi are in the act of removal to the new boiler house.

The shaft on the Velvet is being pushed. A drift was run along the vein from the main crosscut for a distance of 25 feet on No. 3 lead.

Mr. A. G. Waite, of the Leiter, is in from Sophie mountain. He reports that the work is in full blast on the road which is to connect Northport with the Velvet Mines.

On the Leiter, a new shaft has been started. It is at the north end line of the Velvet and about 20 feet south of the south line of the upper fraction.

It is an exceedingly fine grade of ore that is being taken from the main Velvet shaft just now. It is a massive chalcopryite, and carries good values in gold.

On the Leiter, Mr. White says, work is being pushed. A drift was run along the vein from the main crosscut for a distance of 25 feet on No. 3 lead.

The present owners are W. P. Robinson, A. J. Marks, T. J. Lendrum, Nelson, E. D. Carter, Wallace, Idaho; James Bright and William Braden, Black River Falls, Wis., and the Scott McDonald estate.

Money for Development.

The affairs of the Boundary Creek Mining and Milling Company are to be put on a first class basis. The London & Canada, which has a bond on the controlling interest in the Boundary Creek Mining and Milling company shares, has decided to sell 7,000 £1 preference shares and to use the money in the development of the Gold Bug and some of the other properties of the company.

Grand Stand May Be Shifted.

The gusty wind which was prevalent early in the week blew over the lesser stand on the east side of the baseball ground. As the position of this stand was open to some objection, as it was alike unsheltered from the afternoon sun and from the prevailing winds blowing across the ground and gathering up its dust, it is likely that the management will see fit to alter its position to the other side of the ground, which affords spectators shade and freedom from dust.

A Case of Dementia.

Edward F. M. Youel, who has been in the city for the past week or so, was examined on a commission of lunacy, held before Magistrate Boulton yesterday. Drs. Reddick and Campbell assisting. The facts alleged against Youel were that he had given himself out as an agent of several well known capitalists, such as the Messrs. Rothschild, Rockefeller and Cecil Rhodes.

RHEUMATIC STING.

South American Rheumatic Cure Sways the Wand and Suffering Ceases in a Trice.

Mr. A. S. Kennedy, 44 Sussex Ave., Toronto, says he has been attacked very frequently with acute muscular rheumatism, affecting his shoulders and arms.

NOTICE TO PATRONS.

Beginning July 1st, 1900, all subscribers to the Weekly Miner by paying the sum of two dollars and ten cents will be credited with one year's subscription and will receive a copy of the Rossland Miner Map.

A limited number of maps are on hand and will be sent to subscribers promptly on receipt of one year's subscription, and ten cents for postage.

ROSSLAND MINER P. & P. CO.

ON WILSON CREEK

A Section Which has Some Promising Properties.

A She Bear With Cubs Attacks Prospectors and Mutilates One of Them Mr. Norman Thinks Our Mines Will rival Those of South Africa.

Mr. Hugh Hastings, M. E., returned on Wednesday from a trip up Wilson creek, whither he went in the interests of certain of his clients.

Mr. Hastings says that there are a number of grizzly bears in that section that have done considerable damage among prospectors. Two or three have been killed and several mutilated by them.

are promising. A large block of the stock of the Cariboo Creek and Canadian company is owned by the estate of the late John McMillan. Mr. Finch states that he is operating in Sumpter. He and his associates purchased a developed property last October and now have \$20,000 worth of ore on the dump. The ore averages \$33 to the ton. Sumpter, he says, is growing rapidly. It is Mr. Finch's intention to remain here for several days.

Winnipeg Shipments.

The news from the Winnipeg is to the effect that the ore body on the 100-foot level has been tapped, and this will give back stoping ground for 65 feet. Eight carloads of ore have been sent to the smelter since the trucks were laid to the bunkers. This makes a total of 75 tons shipped since shipping was commenced.

LATE MINING NEWS AND NOTES

OXYGEN TO BE USED IN THE SMELTING OF ORES.

A Montreal Broker Visits the Le Roi and is Pleased With the Large Reserves of Ore There.

Mr. and Mrs. C. A. Fowler and son of New York, were at the Allan yesterday, and left on the afternoon train for the Boundary country. After an inspection of the Boundary country they will go to Alaska.
