## ROSSLAND WEEKLY MINER

## THURSDAY September 17, 1903.

"Let the GOLD DUST twins do your work."

GOLD DUST.

GOLD DUST does more work, better work and does it cheaper. It saves backs as well as pocketbooks.

of the late Mr. A. G. Ferguson of Van-couver, who died in San Francisco a

few months ago. The executors on Wednesday settled up the amount due

to the government as succession duty;

as a result the provincial treasury will

be enriched by the large sum of \$10.931.

This is the largest amount ever paid

for succession duty in Vancouver, and

very few estates in the province have

property in Vancouver owned by the

deceased were the Ferguson block on Hastings street, the block at the north-

east corner on the same street occupied

by the Drysdale-Stevenson company and Messrs. Clarke & Stuart, and his house

next the Vancouver Club. Mrs. H. T.

Ceperley, his sister-in-law, and Judge

Ferguson, his brother, who resides in one of the eastern states, were the chief beneficiaries under the will.

Another large sum has fallen to the provincial treasury for the probate and succession duties from the Patrick Murphy estate, in Victoria, since the beneficiaries are all strangers in blood to

the testator. The probate duty amounts

to 5 per cent, and the succession duty

to 10 per cent. Even without consider-

ing whether any portion of the San

Francisco estate will be brought into

the jurisdiction the amount will be a

very considerable one. The settlement

of the amount of duty has been before

the deputy district registrar, Harvey Combe, and among several points raised

by S. Perry Mills. K. C., was that inasmuch as the legacies amounted to near-17 \$20,000, and were payable free of duty, therefore the duty on the legacies

money to be applied to the payment ( duty on the legacies; otherwise it would

be making the residuary legatees pay

duty on duty. This is the first time the point has been raised. The estate in British Columbia is said to be over

though the department will have to exthe Romans over twenty-six hundred years ago, and is rich in historical lore. ercise celerity in completing the un-dertaking while the fall weather lasts. Manager Jackson of the Contact mines returned to the city last night from Burnt Basin with the pleasing intelliin Spain very much, the winters being especially fine, frost being almost un-known. He will leave on the return gence as to the result of the campaign for the road. voyage in about two weeks.

With the transportation facilities which a properly conducted wagon road will afford the Burnt Basin district is likely to come to the front rapidly. The district includes several excel-

lent showings, the principal one being on the Contact. This property has been operated steadily for some years, and is now lending its financial assis-**RAISED THE SALARIES GET THE GLAD HAND** tance to the road building proposed by the government. A considerable body of excellent concentrating ore has been blocked out in the workings, and the development of the property has reachthe stage where further progress is barred until machinery can be installed. Under existing conditions the installation of plant is impracticable, STATEMENT OF SCHOOL BOARD'S COMMERCE CONGRESS DELEbecause no heavy apparatus could be brought in over the trails that afford the only means of ingress to Burnt With the wagon road con-Basin. structed, the Contact company proposes to bring in such plant as is necessary to facilitate further development, principally in the direction of sinking. The question of concentrat-

Carlyle's management, no less a sum per capita grant for non-resident pupils than twenty-one millions of dollars has been paid out in dividends. The Rio Tinto has the largest reserve of ore in the board does not take the advanced view of the subject that has been adopted in sight in the world, there being enough to permit of the present rate of extrac-tion for the next 100 years. At their seaport the company has the largest private pier in the world, and unloads from thirty to forty ocean steamers per

practically concluded to alter the curri-culum of the high school from the second class provincial certificate work to the matriculation work of McGill or Toronto universities, as is done under similar conditions at the coast high schools. Under existing conditions high schools uping of fruit. "While I did not in-spect the fruit in the orchards of the interior of British Columbia official-ly," he said, "I did inspect them inci-dentally for my own sabisaction. There may be some fabling off in the Chilli-wack apple crop; that I am not pre-pared to affirm or deny, but I do know ter attention can therefore be devoted and the federal department of agrito the studies required.

ter any of the universities without an that the apple crop of the province ter any of the universities without an additional year's work. > culture is taking steps to enforce the provisions of the Fruit Marks Act, 1901, as amended in 1902."

A. G. Langley, B. Sc., and E. P. Colley, P. S. S., have returned from a trip to Graham Island, of the Queen Char SOME SCHOOL TEACHERS WILL MANUFACTURERS' EXCURSION lotte group. They examiend the coal measures on the Skidegate Inlet, where work was carried on up to the year 1872. The coal is reported by them to be of excellent quality, but the workings when it was formerly mined are in such a condition that a great deal would have to be spent upon them in order to carry on work. Boring for new bodies is therefore advised.

It is now practically settled that the with headquarters at Ladysmith, will The hearts of three ladies on the suggested effort to sidetrack the Com-be unable, at is reported, to meet its merce Congress delegates at Robson

A splendid showing has been made by the Tyee Copper company for the month of August. The returns show that the amount of ore smelted was 4787 tons, exclusive of customs ores. The value of this, less refining charges, in the cer COAST 18 \$68.885.

MATRICULATION NOW. On the recommendation of Principal King, of the high school, the board practically concluded to alter the curri-culum of the high school from the second

The Vancouver Province has a story to the effect that the announcement has been made that the tram compan which operates between Seattle and Tacoma will next year begin active Tacoma will next year begin active steps to build its line into Vancouver, making this the terminal of the big system, connecting all the important town on the coast. It is said that this is the reason that the Great Northern is trying to get hold of the Westminster bridge so that the tram company may not pass over it, as it would compete with their line.

Mr. D. M. Eberts, former attorney general of British Columbia, who was at Clinton lately, imparted the interesting news that he met a number of rich Am erican mining men who had been investigating the quartz situation in Cariboo They were much impressed with what they had seen. They say that the

being driven into the anthracite bed,

and coal is expected to be struck at

once. The other day the workmen be-

quartz, and they came across immense bodies of low grade ore which are bound to be developed some day into paying mines. Mr. Eberts said that while Clinton looked well and the country was -prosperous crops were rather backward. James Dunsmuir and party of friends, including Major Audain, are at Cumberland looking over the new work at Hamilton lake, where two slopes are

The Farmers' Produce Association,

gan to sink a shaft at the same point. It was anticipated by Mr. Dunsmuir at the time he visited Cumberland a week Rossland school teaching staff will be with a view of having some of the the miners at Ladysmith is given as sinking. The question of concentrat-ing the ores for shipment will also be gone into, the extent of the ore bodies already blocked out justifying the or two ago that the anthracite vein would not be reached for several weeks. They have succeeded in overcoming the water more easily than was then ex-
