

"As they are of importance, my Lord," observed the Queen, "I would have attended to them earlier, but at this time..."

"At this time, Her Majesty presented an audience to the Minister, who had never before, it is to be presumed, received an audience in the palace of the Sabbath."

MERCY. The first sentence of death the young Sovereign was required to sign, was that of a soldier condemned to death for desertion. The Queen read it, and asked the Minister who brought it to her, "Have you nothing to say in behalf of this man?"

From the Montreal Pilot. THE MAINE LAW IN CANADA. A very notable effort is now being made by the advocates of Temperance in both these Provinces, for the enactment of a law to prohibit the sale of intoxicating drinks. The time is certainly well chosen; petitions are in course of signature to the Governor General, the Legislative Council, and the Assembly, for the passage of the law.

BRIDGE OVER THE ST. LAWRENCE. The Victoria Bridge over the St. Lawrence will certainly be the most remarkable work of the kind in the world. It is a bridge of steel, and is to be built in the shape of a T, with a central pier and two side piers.

NEW-BRUNSWICK. ST. JOHN, September 20. THE SEASON. The weather from one year to another, we would remark that from the 1st, until the 15th of September, last year, the weather was warm and generally fine. The 14th (Railway Celebration day) was one of the finest and warmest days ever experienced in this Province.

WHERE THE MONEY GOES.—The three principal mints in the world, are those of the United States, Paris and London. The total coinage during the year 1853, according to official data, is as follows: Paris \$14,001,000; London 12,666,000; United States 11,101,000.

THE TORONTO EXAMINER, referring to a rumor that the late Canadian Premier is to be honored with Knighthood as a reward for his services in assisting the Reciprocity Treaty, says: "To bestow the honors of Knighthood upon Francis Hincks, in view of his whole public career as a Minister of the Crown, would be an opinion, to say the least, unwarranted."

COMMERCIAL PROSPECTS.—One of the most striking features of the present time is the general stagnation of business. The gold discoveries in California and Australia, and carried on by Railway and other enterprises, all real success, have not all turned up far beyond their previous value; and now the war in Europe has produced a reaction. Business stagnates. Railway enterprises are discontinued. City Banks are straitened and Western Banks have suspended. Money is called in. Merchants are suffering. Real Estate and Bonds are going down by the sea-board.

are going down by the sea-board. Extravagant expenditure is becoming disgraced. Economy and industry are to be the order of the day, and a more solid and general prosperity than that which has recently turned to many heads will doubtless be the result.—Montreal Witness.

QUEBEC, Sept. 23.—In the House of Assembly last night, the bill to bring the laws of Canada into harmony with the principles of the Fishery and Reciprocity Treaty between Great Britain and the United States, was read a first time, and to-day it will be carried through the various stages to perfection.

THE LEGISLATIVE COUNCIL has appointed a committee to inquire into charges of undue speculation proffered against some members of the late Ministry.

QUEBEC, Sept. 23.—The Reciprocity Bill passed both Houses last night, and will receive the royal assent to-day. The Governor General will then issue a proclamation declaring the Treaty to be in force, so far as Canada is concerned, and the President of the United States will take the responsibility of doing the same.

SEPTEMBER 23.—Secretary Marcy has replied by telegraph to the Canadian Government that the Reciprocity Treaty cannot take effect as regards Canada until legislation upon it takes place in England and all the colonies interested.

THE LIQUOR LAW IN CANADA.—The Montreal Pilot says that Mr. W. L. Mackenzie, the Member of the Provincial Parliament, will on Monday next move for leave to bring into Parliament a bill for a strong prohibitory law.—It is thought that the feeling throughout the country at the present time is remarkably propitious for the passage of such a measure.
