THE INTERCOLONIAL.

FRIDAY EVENING, OCT. 9, 1868.

The Major Robinson route having been chosen for the Intercoloniol Railway, its length may now be definitely stated. Beginning at River du Loup, the distance thence to Dalhousie, on the Bay of Chaleur, N. B., is 296 miles; thence to Bathurst, on Nipisguit Bay, N. B., 48 miles; from Bathurst to Newcastle, on the Mirimachi, 46 miles; thence to Shediac, on the Northumberland Straits, N.B. is 83 miles; from Shediac to Amherst, miles. To Quebec would be another hundred miles, making altogether a distance of 634 miles. At the Halitax end 61 miles of the line have been built and are now in operation, while the 100 miles between Quebec and River du Loup, being part of the Grand Trunk, have been built and run over Trunk, have been built and run over for a number of years. This will leave 473 miles of the Intercolonial yet to be constructed. It is probable that the section of the G. T. between River du Loup and Quebee will be purchased by the Government, so as to give it complete control of the whole road. But that section, let it be borne in mind, is the most unprofitable section of the Grand Trunk, and of no actual value to that corporation. In fact, it is worse than valueless. The Government cannot, therefore, be expected to pay for it anything like the cost of construction. To do so would be a swindle on the public Treasury. The sixty-one miles from Halifax to the Junction will, in all probability, be purchased by the Government also, but, it is of much more value than the Grand Trunk section from River du Loup to Quebee. The purchase of the new Knox Church, we are requested to say, will be laid by the Rev. Dr. Ormiston, of Hamilton, on Monday, the 19th of October, at two ofclock; p. m. a large representation of the clergymen belonging to the Presbytery is expected.

The insancst man in New York advertises in the Herald, inquiring if "the old set of the two ladies who got in a Wall street stage," etc., will do so and so. Of ourse she won't, since each lady will insist that the advertiser refers to the other off.

It is said that Mr. Rose proposes to pay off the seven per cent, debentures of 1866 with the money deposited by the insurance companies, amounting to about one and a quarter million of dollars.

Madoc.—A correspondent of the Belleville Intelligencer writes concerning the famous gold regions as follows: I don't remember having seen Madoc so dull, as during a few days recently spent in the vicinity. The re-action in the gold excitement is evident in the general stagnation that exists in all kinds of business built up or fostered by the excitement. The lawyers who flocked to Madoc and El Dorado, and hung out their shingles a year or two ago, where are they? Their shingles may adorn the office doors of the newly clapboarded buildings, but the office is tenantless and silent, the only evidence of animate existence being the spiders which are ever spinning their beautiful webs not unlike in texture and material to the yarns which sometimes lawyers spin. You see flaming sign-boards of Land Agents, Assayers and Lawyers, but the men whom they represent, have long since departed. Doctors are advertised to be at home from 10 to 2, but, poor follows, they might have remained at home from 2 to 10, and not had a single call, so they packed up their pills and bottles, and left in disgust. Doctors of Divinty there were who drifted in with the tide of adventurers, and Doctors whose Divinity was not of the mos orthodox character, practiced upon the credulity of the peeple and bled their victims freely. They too, have sought some more congenial field in which to operate. Sharpers were also in abundance, broken-down play actors, gamblers and thieves, who plied their vocation as long as had material to work upon, but they also have pulled up stakes and gone to more fertile regions. It is not surprising therefore, to find Madoc dull compared with its condition a year ago. And yet it is not dull. The crops are good, and all kinds of farmers produce bring good prices; the lumber business is brisk, and there will be demand for all the men and horses the country has to spare; and apart from the developements of the mineral region, the trade and business of horses the country has to spare; and apart from the developments of the mineral region, the trade and business of the country is healthy and promising.

Shutting up the Grand Trunk.—The Quebec papers are in a great state of excitement concerning the rumoured closing during the winter of the Richmond and River du Loup section of the Grand Trunk, which would thus leave the city of Quebec all alone in the cold. The Mercury says: "The Grand Trunk Company will not gain much by taking the people of the Province of Quebe by the throat. If the Company really want to be bought out," from Richmond to River du Loup, as part of the Intercolonial be bought out, 'from Richmond to River du Loup, as part of the Intercolonial Railway, let them say so, and the part of the county interested, through its members in Parliament, may favourably regard the proposal, and behave with the same generosity hitherto exercised towards the Company. But let us have no threats insidiously made of cutting off Quebec from the outside world in winter, mercly to serve a purpose. If the worst comes to the worst, the Grand Trunk Railway Company may find that they have not the absolute right to shut up a public highway in this style, and the civil and criminal courts may be resorted to to test the question."

SCARCITY OF FORAGE. — The Montreal News says: We behold the effect of an unusually hot dry summer, in the droves of horned cattle which throng our country. No roads on their way to the United States. It is hard to conceive what our farmers would have done with their surplus stocks of had it not been for the American market and American buyers. A short crop of forage in the interior involved the alternative of killing or selling those animals, which the farmer had no means to winter no over; and it fortunately occurs that in the United States, forage can be found with facility. The number of horned with facility. The number of horned cattle purchased and sent over the lines since the result of the harvest was known, must amount to thousands, and we might say that the prices payed have been misterably low—certainly half what was paid a year since. If the farmers could have consulted their own wishes they would have retained their herds.

AGRICULTURAL STATISTICS OF GREAT
BRITAIN.—During the current year there were in Great Britain 276,384 acres in wheat more than last year, being an increase of 8.2 per cent. The decrease in the breadth of barley sown was 109,963 acres, or 4.9 per cent. Cattle show an increase of 8.5 per cent.; sheep 6.1 per cent; and pigs 2.2 per cent. The land under potators this year is 539,217 acres, against 402,217 last year. There is a slight increase in hop and a few other agricultural productions.

AUCTION SAIC.

ON SATURDAY, THE 25th OCTOMER, Inst., will be sold under power of sale contashed in a Mortzage, which will be produced at the time of sale, all the north-east half of Lot No. 4 is the control of the Township of Gamfraxa, in the Concession of the Township of Laboration of the Township of Sale of Control of Control of Control of C

THE GUELPH POLICE COURT.

EXTENDED FRANCHISE.—In Italy, the qualifications for voters are the payment of a tax and the ability to read and write. Prominent leaders of the Opposition are arging that suffrage be made universal, and without qualification of any sort. Whether it be wise or not, there can be no doubt that this is the tendency in every country that claims to have a free government. It is felt that the broader the basis of government, the stronger and safer will it be. In Germany and France, almost universal suffrage prevails. Nonpayment of taxes, conviction of crime N. S., 27 miles: thence to Halifax, and denaturalization, are the only dis-124 miles, making a total length of 534 qualifications. Women and minors, of ourse, are not allowed to vote. Here in Canada, mere payment of taxes, being a householder and a subject of her Majesty, and of the age of 21 years, are not sufficient qualifications of themselves to enable men to exercise the elective franchise Canada, in this respect, is behind the monarchies of Europe,

ance companies, amounting to about one and a quarter million of dollars.
