The Champion Combination Range Is an Economizer

Come In and Let Us Demonstrate to You Its Many Advantages

The Champion Interchangeable Range is new and is the greatest patented invention of modern times. What is it? It is a high-grade steel gas range which in three seconds can be changed from gas to a coal or wood range.

It is not a combination range.

It occupies exactly the same space as a coal range—it looks like one—it feels like one—it works like one—it IS one, yet it is also a gas range.

In brief, it does everything and more than any other high-grade gas range does, and does it better. It also does everything that a first-class coal or wood range does, and does it better. It is the most practical, sensible, useful, economical and cleanly range in the world today. Note the appearance of the Champion Interchangeable Gas Range as it appears in the kitchen set up and ready for instant operation. In the Champion Interchangeable Range the heat is at all times confined within the range and on the top cooking surface—hence its superiority over all other gas ranges.

The Champion Range is a marvel of durability, and will last a lifetime. It has the extra heavy construction of the regular coal and wood ranges and, being three times as heavy as any of the high-grade gas ranges on the market today, it will naturally outlast any three of them.
