

THE STERLING BANK OF CANADA

What's Coming in Agriculture ?

Have you studied the business conditions that will affect farming this year? Have you the information that will enable you to plan a profitable year?

If you are in doubt as to the future, consult our branch manager. He has been put in a position to advise farmers and to aid them through the services of the bank.

It will cost you nothing to have a talk with him.

Prompt Returns From Shipments

When you ship Grain, Butter, Cheese or Fruit, put through The Merchants Bank a Draft on the buyer. This is the business way of securing prompt and satisfactory settlement.

It saves time and possible loss.

THE MERCHANTS BANK OF CANADA

Head Office: Montreal Established 1864.

WATFORD BRANCH, F. A. MacLEAN, Manager.
ALVINSTON BRANCH, G. H. C. NORSEWORTHY, Manager.

You Can Start With 25 Cents and be An Investor

And you can invest in securities as safe and profitable as any held by capitalists.

Twenty-five cents saved each week can be made to earn 4 1/2% interest by a very simple plan.

Thrift Stamps cost twenty-five cents each. Sixteen of these when exchanged for a War Savings Stamp become a 4 1/2% interest-bearing security for which the Government will pay you \$5.00 in 1924.

In other words, if you lend the Government the \$4.00 odd you have saved by this easy means, the Government will pay it back to you WITH AN ADDITIONAL DOLLAR five years from now. And you become an investor in the safest of all securities—a Government Bond.

Canada needs the small savings of her people to finance the work of reconstruction.

Make Your Savings Serve You and Serve Your Country—Invest Them in War Savings Stamps.

War Savings Stamps make saving easy and profitable.

THE THIRD MACKENZIE

Temporary Leader of Liberal Party
Has Never Been Defeated.

Daniel D. Mackenzie, the new temporary leader of the Liberal party at Ottawa, is described by Parliamentary observers as a "two-fisted, fighting man," a dour and capable Scot.

One may imagine the trusty and faithful type of the man from the fact that in twenty-five years of public life he has never been defeated in any election.

He is the third Mackenzie in the line of Liberal leadership in Canada, and it is just a century since the first, William Lyon Mackenzie, landed in Canada. That first Mackenzie was not a Liberal leader in the party meaning of the word, but stood for liberty and the free institutions in Canada. The second Mackenzie was Alexander, who was Liberal Premier of Canada for five years shortly after Confederation.

The latest Mackenzie has had a distinguished public career. He is now sixty years of age, having been born at Lake Ainslie, Cape Breton, in 1859. He entered the profession of law and served as mayor of North Sydney and Commissioner of Schools for Cape Breton County for five consecutive years. In 1909 he was elected to the Nova Scotia Legislature and to the House of Commons in 1904, in which he has remained ever since. From 1906 to 1908 he was judge of the County Court District No. 7 of Nova Scotia. As his name would indicate, he is a Presbyterian.

While a very aggressive fighter, Mr. Mackenzie has till the present, remained out of the limelight. In the Parliamentary debates in the first year of the war, when the Government was attacked on several points, Mr. Mackenzie took a prominent part. Sir Wilfrid Laurier thought so highly of Mr. Mackenzie that he chose him to sit at his desk-mate in the Commons during the last season of Parliament.

Will Inspect Grazing Lands.

Prof. W. J. Rutherford, dean of the Faculty of Agriculture, Provincial University, Saskatoon, has accepted the chairmanship of the committee to examine the lands now held under grazing leases in Southern Alberta, to ascertain what areas will be suitable for mixed farming in connection with the campaign now being carried on by the Soldier Settlement Board.

Nights of Agony come in the train of asthma. The victim cannot lie down and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

Making the Farm Spring More Serviceable.

Fortunately a great many farmers of Canada can boast of a good spring of water on their farms. In some cases it is the only reliable and perennial source of water, and when this is the case it usually receives proper care. Probably, however, in general, the spring is a secondary consideration as a water supply, particularly domestic, and consequently is let "run wild" more or less, and is not, therefore, rendering the service it might if it were properly equipped. The object of this short article is to make a few suggestions for the improvement of springs in general.

In the first place the spring should be enlarged, deepened and cleaned out well and then cribbed up in some efficient way. Probably the best method is to get a large concrete or sewer pipe, tile or two, about 2 1/2 feet in diameter, and put them down in the spring, cementing the joints well. Put an overflow pipe through the wall of the upper tile close to the high water mark of the spring, and connect the overflow pipe to a tile drain that leads down to a good outlet some distance away. If it is not connected to a drain the open end should be screened. If the spring be in the pasture it should be fenced in and the overflow pipe referred to extended horizontally to a trough outside the fence. The top should be provided with a tight cover made of concrete or heavy plank.

The spring becomes particularly serviceable if it happens to be located on an elevation considerably greater than the house and barns, for then the water can be piped down under the first line to storage tanks in the buildings. From the tanks the water flows by gravity to the points of service. Or if the supply is great enough and a fall of a few feet can be secured within a short distance, say 30 or 40 feet of the spring, a hydraulic ram may be installed for pumping the water of a spring to the house and barns. Usually it is pumped into a storage tank in the attic of the house or loft of barn, and from these gravitates to the various plumbing fixtures in the house and the troughs and drinking basins in the stables. If you are particularly interested in this subject of the farm spring and how to make it more serviceable write the Department of Agriculture, Toronto, for a copy of Bulletin 267, which tells you all about it. It costs you nothing for the information except a postal card and a two-cent postage stamp.

Silverwood's ice cream

"SMOOTHER THAN VELVET"

Ice Cream like mother used to make?

No indeed! Ice cream far superior to that.

Nothing but pasteurized pure cream, cane sugar and pure flavor extracts go into Silverwood's Ice Cream. That creamy, velvety taste that mother never could have given to her home-made ice cream is the result of homogenizing and scientific freezing.

FOUR Shingles In One Brantford ASPHALT Slab Slate

THE newest idea in roofing. Just think of the time and cost of labor saved in laying the roof of a big barn, freight shed or other large building with this new Brantford Asphalt Slab Slate which is four shingles in one. Fewer nails are also required.

Brantford Asphalt Slab Slaters are so cleverly designed that a roof laid with them has the appearance of being covered with individual size shingles.

One size only: 32 inch x 12 inch, with cut outs five inches. They are laid five inches to the weather. Red or green color.

Brantford Asphalt Slab Slaters are made of the same materials as our famous Brantford Asphalt Slaters which have given such satisfaction for artistic homes.

The same roofing in roll: is called Brantford Crystal Roofing and weighs 80 to 85 lbs. per square.

Particulars about these roofings furnished on request.
