## CAPTURING GERMAN SUBMARINES IN A NET

(Worcester, Mass Telegram)

Men of the British navy have taken many submarines of the enemies out of their wire traps. That they make these underwater boats over and send them out as English submarines to torpedo other craft of the enemies is taken for granted though it is not admitted in the official reports. Worcester men may have made some of the wire in the traps which have captured the German and Austrian submarines, and there may be some satisfaction in that part of the work. Englishmen whose duty it is to take in the traps, it is the most gruesome of all the ghoulish business of the great war in Europe they claim.

An English doctor who has been with the "rescue" crews, tells the story, but he admits there is no sense of rescue about it, for nothing is done to raise the submarine from the trap until all on board are dead, and it is the most horrible of all the deaths of war, the doctor claims. When a submarine strikes one of the thousands of wire nets set all around the British Isles there is no known means of escape. Every move of the boat means more mixing up with the enmeshed wires. And the wires also telegraph the capture to a naval station automatically. Then a destroyer boat hurries to the trap like a hunter who discovers that game has been caught in his deadfall. The destroyer takes a position above the submerged boat.

And the doctor is still more graphic in further description. "Then there is nothing to do but wait, sometimes for hours, sometimes for days. Officers and men of the waiting vessel know what's going on down in the green depths. They know that in time bubbles will come to the surface and all will spread over the sea. The destroyers wait for the bubbles, 'death bubbles' they call them, for they tell of death struggles going on in the submarine. That may seem simple to people who never tried it, and of course an Englishman should not bother about how much an enemy of his country suffers in wartime.

Still men are all more or less human in their thoughts; if not in their acts, and the doctor says it is frightful

there over an expiring corps of men who are experts in the worst kind of warfare practiced. They suffer until the horrible end, and in some cases it appears that the waiting men safe above them suffer more and longer until the death bubbles rise to the top and show through the oil, and then the hoisting crane comes and lifts up the submarine and the net and the disentanglement takes place.

And you may expect to read what the English naval men find in the German submarine. On that point the doctor says: "Seamen who fought through the maelstrom of Skager Rac will tell you their story, but no sailor speaks of the sights seen in a recovered submarine. Those sights make strong men weak and drive sensitive men delirious with horror." Then there is something about the war which is not allowed even to get as far as the censors. It is too horrible for the observers to talk about. And sailors are not as a rule squeamish. For that reason, and some others, it is probably not true that for months, as the cable reports have it the German people have been urging the submarines loose to do their worst with the peaceful shipping of all nations.

Our teacher, Miss Catherine Trimper, attended the Teachers' Institute for West Kings, held at Berwick on the 7th and 8th inst.

Among those who attended the provincial exhibition at Halifax were Mr. George Meister, Miss B. Foster and Miss Maimie Woodbury.

Mr. and Mrs. Burpee Spinyne, and family motored to Hanley Mountain on Saturday returning Sunday. Mr. Howe Spinyne took them in his car.

The Ladies Sewing Circle entertained the adult ladies at their circle which was held in the hall on Thursday afternoon. There was a large attendance and they enjoyed a very pleasant afternoon.

Fitch Banks, Lloyd Woodbury, and Evelyn Lightizer, who wrote the Provincial Examinations in grade X, all passed their examinations successfully. Fitch Banks having made 94 on Algebra, 92 on British History, and 90 on Geometry, with an aggregate of 481.

Mr. Harry Wymont and mother went to New Germany the 10th.

Church Rook made a business trip to New Germany on the 11th.

Waldo Randall of Harmony is the guest of his sister Mrs. Milford Stoddard.

The Stocking Social at the home of Annie Rook was a decided success, the sum of \$13.58 being collected.

Nellie B. Layte of Fairhaven, Mass., is spending a few days here, guest of Mrs. Robert Swallow.

Ernest Freeman is loading a car with potatoes this week. They are a good crop this year; no rot as yet.

NOT ENOUGH CHILDREN  
ever receive the proper balance of food to sufficiently nourish both body and brain during the growing period when nature's demands are greater than in mature life. This is shown in so many pale faces, lean bodies, frequent colds, and lack of ambition.

For all such children we say with unmistakable earnestness: They need Scott's Emulsion, and need it now. It possesses concentrated form the very food elements to enrich their blood. It changes weakness to strength; it makes them sturdy and strong and active.

## TO STIMULATE GREATER PRODUCTION IN CANADA

Certified Copy of a Report of the Committee of the Privy Council, Approved by His Royal Highness the Governor-General on the 28th June, 1915.

The Committee of the Privy Council have had before them a report, dated 26th June, 1915, from the Right Honourable the Prime Minister, stating that he has had under consideration the desirability of appointing a Commission for the purpose of making careful and exhaustive inquiry into the matters hereinafter mentioned.

The Prime Minister observes that the need is everywhere recognized of stimulating greater production in Canada, and especially agricultural production the immense importance of which has been emphasized by the reasons of conditions arising out of the war.

That in connection with opportunities for increased agricultural production it is necessary to bear in mind the importance of:

(a) Improved methods of production with a view to a better return to the producer;

(b) Assisting this purpose by proper instruction and demonstration;

(c) Increasing the acreage under production;

(d) Attracting immigration of a type which would aid in ensuring a large and permanent agricultural population;

(e) Stimulating and encouraging co-operation among the producers; and abattoir facilities.

The Prime Minister further observes that the agricultural production of Canada is of a highly diversified character and is spread over a great territory comprising an enormous area of fertile land of which only a small percentage is at present tilled.

The conditions of soil, climate and situation are so varied as to emphasize the necessity of pursuing methods of cultivation and purposes of production which are especially suited to any particular locality under consideration.

The great area of territory embraced within the Dominion creates unusual problems which affect:

(a) Distribution of products in our home markets and the trade thus created between the several provinces and their various communities;

(b) The transport of products to our national ports from which they shall eventually reach their destination abroad; and

(c) Their transport to the market of destination abroad.

The Prime Minister states that so far as is compatible with conditions herein mentioned it is manifestly in the public interest that before export the product should be converted through manufacture in Canada into the form in which it is proposed to be consumed or used; thus encouraging and stimulating those industries subsidiary to agriculture which can be carried on successfully in the Dominion.

Important questions as to the marketing of our food products, including consideration of the time at which and the methods by which this is accomplished, should receive careful attention. The value of co-operative efforts among the producers, and the importance of reducing the present great discrepancy between the price received by the producer and that paid by the consumer, should not be overlooked.

It has been represented to the Government that large numbers of persons who before emigrating to Canada had been engaged in agricultural pursuits, have not settled upon the land in Canada, but have been attracted by the opportunities for obtaining high wages in cities and towns and in the construction of railways and other works. The opportunities for thus obtaining work have recently become considerably restricted and this result has brought about a greater degree of unemployment than usually prevails. It further appears that very large areas of land for which homesteaders have secured patents are not under cultivation, and it is considered that the causes which have led to these are a proper subject for thorough inquiry.

In connection with the subjects above alluded to consideration should be given to the conditions which will arise upon the conclusion of the present war and to the resulting opportunities for a vigorous and effective policy of immigration which should have as its object the purpose of attracting to our shores immigration of a suitable type, and of inducing the settlement of an agricultural population upon the fertile uncultivated lands which are abundant both in Western and in Eastern Canada. In this connection inquiry should be made as to the means by which and the lines upon which the Federal Government, whether upon its own

sole initiative or in co-operation with Provincial Governments can best carry out an effective scheme of colonization.

The return to Canada after the conclusion of the war, of the Canadian troops now gallantly fighting beyond the seas for our Empire and the probable immigration into Canada of other British soldiers and of men from the allied armies after peace shall have been established, should also engage the attention of the proposed Commission in order that every reasonable opportunity through the assistance and co-operation of the Federal and Provincial Governments may be afforded to those who may seek employment.

The Prime Minister further observes that the question of transportation, whether by land or water can be dealt with for reasons above indicated closely connected with the problems under consideration. With this should be considered the advantages which would undoubtedly be derived from permanent improvement of highways which are in truth an important part of our transportation system.

The approaching completion of two additional transcontinental railways is a very important element in our transportation problem. It has been represented to the Government that their construction has considerably anticipated the present capacity of the Dominion to provide traffic for trunk lines; while on the other hand important portions of newly settled territory are without the facilities which would be afforded by branch lines incident to a more carefully considered system of railway development. The condition thus created invites the careful attention of the Commission.

As Canada has been and will be for many years a borrowing country requiring capital for extending and developing its agricultural and manufacturing industries, and as the securing of capital at reasonable rates of interest is essential for increased production and continued progress, this subject should also be taken into consideration. It is to be observed that no proposal which would deter capital from seeking investment in this country, or which would unfairly affect that already invested under established conditions would in the final result assist Canadian producers in any branch of industry.

It seems reasonable that under conditions which have developed during the past six months opportunities will arise for widening and extending our markets to the advantage not only of Canada but of the countries and communities with which trade may thus be created or extended. The steps already taken by the Government for that purpose should be brought to the attention of the Commission and their consideration invited.

The Prime Minister having taken into account the foregoing considerations, as well as the representations which have been made to the Government upon the various matters aforesaid, recommends that a Commission be appointed forthwith to consider, inquire into and report upon the same and any kindred subjects which may seem to them directly connected therewith.

The Prime Minister further recommends that such Commission be appointed under the provisions of Part I of the Inquiries Act, Chapter 104 of the Revised Statutes of Canada, and that the Commission be authorized to employ such scientific and professional assistance as its members may determine.

That the duration of the Commission shall be during pleasure.

That the Commission may make interim reports, from time to time, as they shall determine.

The Commission concur in the foregoing and submit the same for approval.

R. BOUDREAU

Clerk of the Privy Council.

THE SCHOOL OF METHODS JUST CLOSED AT BERWICK

Rev. C. J. Crowds, Who Attended, Writes of Its Interest.

The International School of Principles and Methods for Sunday School Workers recently held at Berwick was in every particular a complete success. Ninety-five registered students, besides numbers of others who occupied tents and cottages on the ground. Forty received their diplomas. Rev. I. W. Williamson, the new Baptist Field Secretary, made a splendid impression on the many students who met him for the first time. Rev. Frank Langford, educational secretary to the Methodist church was unfortunately unable to attend and Rev. Dr. Myers, educational secretary to the Presbyterian church took the additional work with splendid acceptance. Mrs. Baldwin, of Philadelphia, whose merits are known to Nova Scotians, was at her best in elementary work. With these

were associated many of the leading workers of the Province.

Similar schools have been held before under the auspices of the Sunday School Association, but this is the first one under the auspices of the denominations, and it augurs well for the future.

The talent of the school is of the highest order. The object is not only to set forth theory in an interesting and helpful way but to actually demonstrate the various phases of the work among the young. For instance an organized adult class holds regular sessions, makes a community canvass and faces the very problems that are met in the school and church. In every department the aim is to be practical and to give immediate assistance in the pressing problems of religious education.

CHOICE BUILDING LOTS

A lot of land situated on the south side of the river at Bridgetown, about three minutes walk from town. Beautifully situated and would make ideal building lots. Sufficient for three lots. Splendid drainage. Will sell whole or in lots. Price very reasonable.

Apply to  
3 The Monitor Publishing Co., Ltd.

FIRST CLASS FARM

Small farm situated about two and one half miles from Bridgetown. Ten acres of choice tillage land and five acres of excellent marsh. Capable of putting up three or four hundred barrels of first class fruit. Buildings in excellent condition. Never failing supply of splendid water.

Apply to  
4 The Monitor Publishing Co., Ltd.

PROPERTY NEAR BRIDGETOWN

Property situated about five minutes walk from Bridgetown. Fifteen acres of land with two hundred apple trees, half of which are coming into bearing. Also pear and plum trees. House contains nine rooms, large pantry and two large halls, newly painted throughout. Large dry cellar. Barn 24 x 28 sheathed inside. Water in house. Hay and pasture sufficient for two cows. An excellent opportunity for a man who wants a small place. Will be sold right.

Apply to  
5 The Monitor Publishing Co., Ltd.

CREAMERY OR FACTORY SITE

A lot of land in Bridgetown about 150 feet square with building one and one half stories, 40 x 50 front with lean-to on north and east sides. Building contains ice room, drying or curing room, churn, milk and cream vats, power separator, engine and boiler in good condition. Suitable for manufacturing cheese and butter or would make a fine canning factory for which industry there is a good opening.

Apply to  
6 The Monitor Publishing Co., Ltd.
