

This Stove Breathes

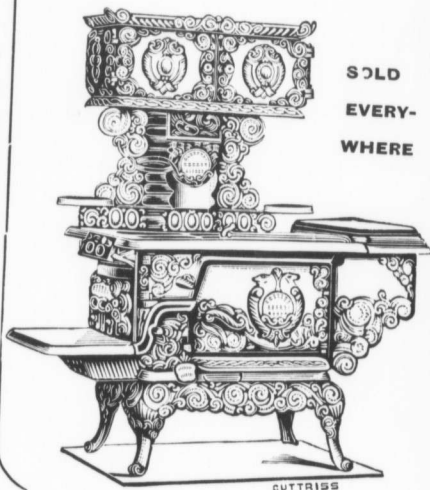

Fresh air. That is, practically, what an aerated oven does. No nasty smells can come from these stoves. All ordinary ovens bake with burned, impure, and stagnant air. What a sickening odour comes out as you open the door! No wonder your food has a peculiar taste is it? You see, Souvenirs are not like "ordinary stoves," they cook your food with pure, fresh air, and do it nicely, too, with half the usual amount of fuel. Consequently, they save much time, labour and money, and money saved is money earned, isn't it?
