PORTLAND AND MONTREAL.

to the strain of the strain of

The Portland and Ogdensburgh Bailroad have just completed arrangements for a new route between Montreal and Portland. The first train by the new line left Portland this morning at 7:15 and will arrive here at 9:35 to-night. By this arrangement, the trip between the two cities will be made in 14 hours, whereas by the Grand Trunk it requires 17 hours running time.

As it Ought to Be.

We take the following item from the McGill College Gazette, a neatly-printed and well-conducted magazine published at McGill College. Referring to the law students the Gazette

"To their credit, however, it must be admitted that there is a great deal of esprit de corps, and other faculties might learn a lesson from the hearty, brotherly feeling exhibited by our legal conferes. Of course, it is only natural that there should be a bond amongst professional students more especially, but when we think of the advantages under which the law students labor we cannot refrain from congratulating them on the very evident entente cordiale which exists. Nor must we forget to notice that in law a larger proportion of the students are French Canadian Roman Catholics, yet we learn that the most perfect harmony has ever characterized the relations between the students of different nationalities. To the students of the other faculties, and to the public at large, the esprit de corps of the law students should serve as an example of good-will and brotherly feeling.

The Battle of the Lights.

(New York Herald.

In the battle of the lights the public have been hoping for the success of any new mode of public and private lighting that would relieve poor civilized humanity from the despotic, and not always just, rule of the gas meter man. The inventor of Menlo Park has, it is claimed, practically succeeded in his object of dividing the current so as to furnish a number of electric lights each equal to eighteen to twenty candle power on one circuit and in the proportion of six lights per horse power expended in generating the current.
These are remarkable results, even if they exhaust his powers of invention. But we do not think they do. They represent only the first developments of a system of lighting destined to replace that of gas, as the latter has replaced the ordinary candle. But the application of gas does not end with the superiority of its illuminating power. We feel satisfied that instead of a decrease in the manufacture of gas there will be an increase if the chemists only show the same amount of skill in applying it to other uses as they display ingenuity in vainly arguing the impossibility of employing electricity for lighting purposes Edison's success will inspire other inventors to rival and surpass him, and the world will be benefited, although some established interests may temporarily suffer.

Gold in Michigan Iron Mines.

[Detroit Despatch to Chicago Times.] The gold and silver excitement on the Upper Michigan peninsula has been intensified by a report that one of the latest analyses of specimens taken from the Emmett Mine, in the Menominee Range, yielded gold to the value of \$2,000 per ton. The metal appears in thin sheets. The finders argue that specimens which reveal pure gold to the naked eye may well be expected to produce \$2,000 to the ton of orc.

The Marinette and Peshtigo Eagle of March 21 says :- " The Emmett Mine is not the only place gold and silver can be found, as a recent assay of a piece of ore taken from up the Brule River shows. The piece in question was taken from the surface of an outcrop of iron. The return of the assayer gave nearly fifteen dollars to the ton. And her aggav from the same place, and from other ore in the vicinity, which will partially determine if there is enough of the precious metal to pay for the working.'

The Iron Port, a paper printed at Escanaba, says :- "Everybody is finding gold now. A gentleman from Lake Superior left a specimen on our desk the other day that resembles in general appearance the sulphuret of silver so common in the Nevada mines. It was obtained near the Huron Mountains. He is having an assay made of it. Later we received a specimen which a shrewd bystander declared it was all gold and silver, with ' just enough iron to hold it together.'

With the accumulation of evidence, it can no longer be doubted that gold and silver d exist in considerable quantities on the Upper Peninsula. The only question that remains to be solved is whether it will pay to attempt the extract of the precious metals.

What is Thought of Hanlan in England.

[English Correspondence Toronto Mail.]

If a young Tyne sculler should, in his practice, strike no more than 28 to 30 strokes per minute, no one would waste a thought upon him, and he might have his hands as full of matches as he chose. Then Hanlan rows with sculls about two inches shorter in-board than those used by the majority of English pullers, and consequently he finishes not nearly so much overhanded as they do. Here we have great faith in in-board leverage, and even-handed and open-handed sculling is an abomination. People will have to become accustomed to all the unusual things in Hanlan's style before they will be able to watch his boat and see whether or not he travels fast and smoothly Iam bound to say, however, that, so far, the balance of opinion is rather against the claims of the Toronto man to firstclass form. Hawdon thinks that what he has seen of Hanlan's sculling is " not up to very much," adding that Hanlan strikes too slow, and seems to be short of pace; he fancies, however, that there may be more in the Canadian than meets the eye. I was in company with one of the best-known amateurs of the Tyne, Mr. James Wallace, yesterday, up at Scotswood, and that gentleman's opinion of Hanlan was delivered thus:—
"Well, he might strike faster—it would certainly be an improvement; but so far as his style of sculling is concerned, he can teach most of these Tyne men a great deal. He is never in a hurry; always pulling cleanly and steadily; the boat is never 'off its legs,' and travels smoothly;' and he has a fine reach for-ward." It would seem that already some ot the Scotswood people have been signifying their candid opinion of the strangers rowing. Hanlan remarked to me this morning, "They tell me here that Hawdou can tow me over the course, and that I have no chance with him." Perhaps Hanlan does not know that Hawdon's home is within half a mile of Scotswood, and that, anaturally enough, the miner's friends and neighbours are enthusiastic partizans of his cause. So far Hawdon has not been beaten in

Age of Enlightenment, beau

In an age of enlightenmenflike the present the value of electricity, and of compounds containing an electric principle as remedial agents, is widely appreciated. Foremost among the latter, both as regards the thoroughness and safety of its effects, and the rapidity of its action, is Thomas' Echectric Oil, a widely popular external and internal remedy for coughs, colds, sore throat, asthma, croup, and other affections of the breathing organs; an invaluable outward specific for lame back, soreness and contraction of the muscles, and every variety of sore or hurt; a prompt source of relief for pain, and a medicine upon which the public can also implicitey depend in cases of rheumatism, neuralgia, piles and kindney complaints, inflammatory affections, dysentery, and many other ailments. Its persistent use eradicates the most obstante of the disorders to which it is adapted. Physicians speak of it in the highest terms. Moreover, horsemen and stock raisers administer it with the greatest success for diseases and hurts of horses and cattle. Sold by all medicine dealers. Price 25 cents.

Finance and Commerce.

Weekly Review of Trade-Wholesale Prices.

The approaching advent of Spring, with its improving prospects, has commenced to infuse a more normal feeling in the wholesale trade of the city. Things generally appear to be brightening up, but as yet no very decided improvement has taken place. In chemicals there has been more demand, but business remains quiet. The usual jobbing movement has taken place in groceries, while trude in dry goods drags itself slowly along. Leather has been quiet; boots and shoes dull, and iron inactive. The past week has exhibited a very quiet financial market. Money was somewhat easier, and the demand for accommodation paper was not great. Sterling Exchange was dull at 109% for round amounts, and 1001 and 1098 for counter rates. Good commercial paper has been discounted by the banks at 7 to 8 per cent. Loans on collaterals were made at 7 to 8 per cent on time and 6 to 7 per cent on call. Drafts on New York closed firmer at between 1-16 and | per cent premium.

During the past week the Stock Market has been decidedly strong. This was particularly the case with Bank of Montreal, which, owing to the considerable "short" interest, and a consequent scarcity of stock, sold as high as 142]. This rise has not been maintained however, as the stock sild down to 132, closing a little firmer. Merchants' has also exhibited considerable strength, selling at 861, but closed somewhat weaker, being offered at 86, with 85 bid. Richelleu & Ontario Navigation Company, which opened at 401, has gradually and steadily improved, until 45 was reched. Toronto has shown some weakness, having sold as low as 1111, but became stronger at the close, selling at 1121. People's, which opened at 40, has somewhat improved in price, 110 shares having been sold at 50, since which there have been small lots sold as high as 51. The stock is now offered at 55, with 51 bid. Monttreal Telegraph, on a small business, hav shown some improvement in value. Commerce has remained pretty steady business, has shown some improvement in value. Commerce has remained pretty steady at 105 for sellers and 104 for buyers, all the transactions being between these figures. There have been considerable transactions in City Gas Co. at 109½, closing with 109½ asked and 109½ bid.

FIGUR.—Receipts by rail for the week, 14,920 barrels; shipments, 11,648 barrels. Trade has continued dull, a light enquiry being the only feature of the week. Quotations show no change, and have remained steady.

	and have remained steady.

nas not yet shown any signs of activity. No. 2 Spring Wheat for May delivery is held at \$1.02, and peas at 80c per 63 lbs. Oats are held at 32c along the line.

along the line.

PRODUCE.—Butter. — Receipts, by rail, 238 kegs; shipments, 350 kegs. New butter is coming in more freely, and prices favor buyers; sales range from 17c to 20c. Old butter sells at 10c to 15c for medium to good. Cheese—Receipts, 199 boxes; shipments, 1,385 boxes. Market quiet; fine cheese sells for retail trade at 81c; wholesale, 71. Lard—Canada tubs and pails are in moderate demand at 9c and 91c. Pork—Receipts, none; shipments, 85 burrels. A fair jobbing trade has been done in new mess, at \$14 to \$11.25. Ashes—Stocks in storc—Pots, 1,867 barrels; pearls, 149 barrels. Pots are quiet at \$3.75 to \$3.80; pearls have some little enquiry, but trade is duil at \$6 for sellers.

GROCERIES.-As far as city business is concerned, trade has been rather qui-t, but more has been doing with the country. On the whole however, there has been very little change in condition of the market. Buyers of sugars seem to hold off, waiting for the first samples offered by the Redpath rednery.

TEAS.—There has been more animation in the market, particularly for the better classes of teas, which are not plentiful. Prices may be considered to have advanced 2 cents all round:—Young Hysons, 22 to 25c; Black Teas, 25c to 3c for common; 35c to 67c for best; Greens, firsts, 48c to 50c; seconds, 35c to 45c; thirds, 27c to 32c; common, 23c to 33c; Japans, low grades, 21c to 24c; medium, 25c to 33c; fine, 40c to 47c; choicest, 48c to 54c.

COFFEES.—The additional duty of 10 per cent, imposed since April 2nd, on coffees imported through the United States has had the effect of advancing figures from 1 to 2 cents per 1b:—Java and Mocha, 30c to 32c; Singapore, 22c to 25c; Maricalbo, 21c to 22fc Rio, 19c to 21c.

SUGAIS.—No change can be made in quota-tions until refiners have established their prices:—Dry crushed, 10ic to 10ic; cut loaf, 10ic to 10ic. Granulated, 9c to 9ic; Extra. "C." 8ic to 12c; American yellow, 7c to 8ic; Fair yel-low, 7c to 7ic; Raw, 7c to 7ic; Scotch, refined, 7c to 8ic.

7c to 8\cdot c.

FRUITS.—There is no change whatever to report. The demand still continues light, whilst holders are disposed to meet buyers at slightly lower figures. Prices: Raisins—Valencias, 6c to \(\frac{1}{2}\)c; Layers, \(\frac{1}{2}\).50 to 1.55; Loose Muscatels, \(\frac{1}{2}\).60 to 1.70; London Layers, \(\frac{1}{2}\).50 to 2.00; Extra Black Crown, 3.75 to 4.00; Sultanas, new, 8.50 to \(\frac{2}{3}\).90; Currants, old, \(\frac{4}{2}\).50 to 3.00; currants, new, \(\frac{4}{2}\).50 to \(\frac{3}{2}\).50 to \(\frac{3}{2}\).60; Currants, new, \(\frac{4}{2}\).50 to \(\frac{3}{2}\).60 to \(\frac{3}{2}\).60 to \(\frac{1}{2}\) coper lb. Figs, small boxes, lie to life per lb. Frunes, \(\frac{4}{2}\).50 to \(\frac{3}{2}\). Almonds, soft shell, i5e to \(\frac{1}{2}\). Filberts, Sielly, \(\frac{5}{2}\); to \(\frac{9}{2}\); do \(\frac{1}{2}\). Walnuts, Grenoble, lie to \(\frac{1}{2}\); do Bordeaux, 7c to 8c.

Symups.—There is no change to report in

STRUPS.—There is no change to report in syrups. The prices are:—Royal Imperial, 50c to 52c; Sugar Loaf, 44 to 40c; Amber, 38c to 40c; Silver Drips, 37c to 39c.

RICZ.—This article is firm at last week's quota-tions:—Medium, \$1.25 to 4.30; best, \$1.37\frac{1}{2} to 4.50; Sago, \$6.00 to 5.75; Taploca, \$7.75 to 9.00

SPICES.—A small business is reported during the week. Prices:—Pepper—Black, 9c to 9½c; White, 19c to 20c; Alispice, 15c to 16c; Cloves, 40c to 45c; Cassia. Irc to 20c; Gluger—Jamaica, blenched, 28c to 25c; do. unbleached, 21c to 22c; Mace, 75c to 90c.

TOBACCOS.—Maunfacturers' prices remain un-changed:—Black chewing, 32c to 38c; Bright smoking, all kinds, from 36c to 55c.

smoking, all kinds, from 36c to 55c.

FISH.—The season for salt fish is now about over, and there is nothing doing. The market is completely bare of stock. Prices:—Salmon, No. 1, \$15.0; do No. 2; \$14.00; do No. 3; \$13.00; Mackerel, from \$8.50 to 8.00, according to grade and quality; Green Cod, No. 1, nominal; white fish, per barrel of 100 ibs; \$3.75 to 4.00; Trout, 100 ibs barrels, \$3.75 to 4.00; American dry cod, per quintal, 112 ibs., \$4.00 to 4.25.

cause. So far Hawdon has not been beaten in any match, and there is not a coal miner in the neighborhood of Delaval, Elswick, Benwell, or Scotswood that thinks he ever will suffer defeat.

OILS.—There has been a little enquiry for seal oil, owing to the tariff, but no sales have been reported. Prices:—Cod. 40c to 45c per wine gallon; Steam Refined Seal, 45c to 49c; Pale Seal, 42c to 45c; Straw Seal, 35c to 40c. Petroleum, 18je to 18c.

WOOL—Market quiet: Canada fieece, 20c to 22c; Pulled, 18c to 2sc; Greasy Cape, nominal at 15c to 184c.

HTDES.—As there is no appreciable demand, business is exceedingly duil. There is very little coming in at present, as butchers do not slaughter much during Lent, and consequently there are few hides produced. An improvement in the amount of stock coming in is soon expected, but no increase in demand or prices is looked for. The quotations are: Green butchers' \$4.00 to \$7.50 for No. 1, \$5.00 to \$6.50 for No. 2, and \$4.40 to \$5.50 for No. 3. Calf sains 9c to 12 to per ib. Sheep skins, 70c to 80c each.

LEATHER.—This market shows some signs of trade brightening up, the demand having improved considerably. Stocks in hard are moderate, and very little is coming in. The bulk of the tanners in the country are putting in pure hides. Some dealers report trade quiet, but expect an improvement when navigation

BOOTS AND SHOES.—Orders for spring goods having been completed, the trade has not being doing very much during the week. A healthier feeling, however, is observable, and a general confidence seems to provail. Remittences are fair in amount, and a moderate enquiry is made by country dealers. Prices are firm, but unchanged.

FURS.—Business is quiet at old prices. Musk rats meet with a good enquiry at 12½c to 15c-skunks are coming in in small quantities and are sold at 40c to 45c. Red fox is in steady de-

IRON AND HARDWARE.—No improvement is noticeable in this department, business being very dull. This state of things is no more than could be expected from the bad roads, and the unsettled condition of the market, produced by the tariff. Prices have not yet been absolutely fixed, but no further advances are likely to take

DRUGS AND CHEMICALS.—Now that spring is approaching, business in this branch shows a slight improvement. In other respects there is no change. Turpentine has advanced to 47½ cents per gallon. Prices: Sal Soda uper 100 lbs.), \$1.20 to 1.30; Caustic, \$2.60 to 2.70; Soda Ash, \$1.75; Alum, \$1.60 to 1.75; Bicarb Soda (per keg of 112 lbs.), \$3.15 to 3.30; Saltpetre (112 lbs.), \$8.25

to 8.50.

DYR GOODS—There has been a few buyers in the market during the week, but none purchased largely. From all that we can hear, the quietness of the last few weeks is not extraordinary, inasmuch as most of the retail people in the west, in anticipation of higher duties, have bought from travellers about all they require for the early spring trade. The weather for the past three weeks being colder than usual, has not enabled the retail people to sell much of their spring goods, being too late for winter and too early for spring. Hence the absence of more animation in this branch of trade. We do not hear of many travellers being out so far. Doubtless they are waiting for a decided change in the weather before they start out on their sorting trip. There seems to be an improvement experienced in the remittances received by many in the trade.

The St. Gabriel Cattle Market.

The St. Gabriel Cattle Market.

The demand for cattle to-day was very limited, but a brisk enquiry for hogs was experienced. The supply comprised only three ear-loads of cattle, which sold very slowly at between \$3 and \$4.75 per 100 lbs. live weight. Mr. William Hend sold 50 live hogs to Mr. William Morgan at 5 cents; and 18 to Mr. Joseph Quevillon at 5 lc. He had one car-load of cattle on the market, but did not succeed in disposing of any.

Mr. Wm. Roberts, of Granby, received a consignment of 16 cattle and 14 hogs from Mr. Frank Rodgers, of Toronto, and sold all the hogs at 5 cents, one ox for \$55 and six head for \$410, or 4 lc. The Inter lot was purchased by Ald. McShane. Mr. John McKinnon, of Guelph, had one carload of cattle, but did not sell any. Taken on the whole, the market to-day was one of the dullest seen this year.

The Montreal Horse Market.

The Montreal Horse Market.

The local trade has experienced a quiet market during the week, very few transactions being reported. The export trade was dull at the start, but as the week advanced, became very brisk. The shipments during the week amounted to 193 horses, for which the sum of \$13,488.50 was pald. They were as follows:—Saturday, April 5, 11 horses, worth \$725. Monday. April 7, none. Tuesday, April 8, 18 horses, costing \$1,7 none. Tuesday, April 8, 18 horses, valued at \$1,308; 18 do, bought for \$777; 6 do, worth \$476; 12 do, costing \$6.50; 14 do, whose value was \$1,432; 20 do, purchased for \$1,659. Thursday, April 10, 20 horses for which \$1250.50 was paid; 17 do, worth \$1,144; 20 do, costing \$1,368. Friday, April 11, 10 horses valued at \$6.55; 9 do, bought for \$565. Total number, 193 horses; total value, \$13,438,50. As will be seen from the above statement, some valuable lots of horses were exported, one lot of fourteen horses averaging over \$100 each in value. The greater proportion, by far, went to the States of Massachusetts, Maine, and New York. As a considerable number of buyers have just arrived in town, a brisk trade is expected next week.

Commercial Items

-Two more lots of stoves and buggies have been shipped to Manitoba from London, Out. -A new petroleum refinery will be started this month in Petrolia, Ont., by Messrs. Cooley, Per-

—Several of the Quebec merchants have sent o the West Indies direct for cargoes of sugar and molasses

—The contract for 75.000 ties for the Georgian Bay and Wellington Railway has been awarded to Messrs. Rodgers & Co., of Egremont, Ont. The new railway from Peterboro to Mud Lake will be opened next summer and there will be a steamer connection with Bobcaygeon. —Navigation on the Muskoka Lakes, Ont., was open two weeks at this date last year. Vessel owners are waiting patiently for the ice to break

—Navigation on the river at Napance is late this year. Last year the first vessel left on April 2nd, but now the ice is just beginning to give

—A carload of bulls, calves, and lambs, were shipped from London. Ont., recently for Fort Scott, Kansas. Mr. William Sexton was the consigner. —Stocks of grain in Chicago, April 8:—Wheat, 7,196,630 bushels; Corn, 2,878,701 bushels; Ont4, 499,233 bushels; Rye, 249,172 bushels; Barley, 616,-603 bushels;

-The New Brunswick Sugar Manufacturing Company with a nominal capital of \$5,000 has been started at Frederickton, N.B. \$1,850 of the

—Since January 1st, 1879, no less than 189,346 quintals of cod-fish have been exported from St. Johns, Newfoundland, being 50,000 quintals more than during the same time in 1878.

—The Napanee Paper Mills Company bas received an order for 400 reams of paper from an American patent medicine proprietor, for printing of circulars, etc., for his Canadian trade.

—During the past week between 200,000 and 205,000 quarters of wheat; between 215,000 and 225,000 quarters of corn, and between 160,100 and 155,000 barrels of flour have been imported into

England.
—It has been arranged that the Canadian tariff will remain unchanged as regards Newfoundland, on condition that that colony will exempt ish imported there from duty. This has been acreed to. The following steamers of the Great Western

THE TRUE WITNESS AND CATHOLIC CHRONICLE.

Annapolis; John D. Christie, Truro; Charles H. Spurr and William M. Bond, of Digby; Lorenzo A. Miles, of Milton; and Stewart K. Hunt, of Greenfield, Queen's County.

The New York Bank-statement for the week ending April 12, is as follow:—Loans, decreased, \$5,383,700; specie, Ancreased, \$588,900; legal tenders, increased, \$4,329,000; deposits, increased, \$2,182,000; circulation, increased, \$60,-600; revenue, increased, \$4,322,000.

:—The Pulman Palace Car Company has 2i sleeping and hotel cars in England. Altogether in Europe and America, it has 800 cars, of an average value of \$14,000 each, or a total of \$11,200,000. The first Pulman car was built 2y year ago, and was run on the Chicago & Alton Railway.

During February 89 vessels salling to and from New York were lost. Ten of these were abandoned, 30 wrecked, 6 foundered, 2 burned, 1 sunk by collision, and 19 missing. The total includes, 7 steamers, 7 ships, 27 schooners, 23 barques, and 4 brigs. Exclusive of cargoes, the total value was \$1,623,000.

The proportion of people killed on English railways between the years 1872 and 1875, was one in every 50,000,000 passengers; on French railways, one in every 15,000,000 passengers; and on Belgian, one in 20,000,000. Last year the proportion of fatalities on railways in England was one in every 50,000,000 passengers.

—The ship "Niobe," which left New York for Australia recently, took the following in its cargo for the Exhibition:—Nine locomotives, 99 organs, 403 packages of clocks, 3,000 packages of tobucco, and an extensive ussortment of dental goods, agricultural implements, stamped ware, scales, lawn-mowers, camp-stools, sewing machines, canned goods, etc.

LOCAL NEWS.

THE SUGAR INDUSTRY.-Ernesti Fisher, a prominent sugar planter, and a heavy dealer in the saccharine matter, from Havana, Cuba, is in town. The object of his mission is to arrange with Messrs. Redpath & Co. for supplying that firm with their raw stock.

REPORT of St. Bridget's Refuge for the week ending 12th April, 1879:—Night lodgings with breakfast, 520. Irish, 318; English, 30; Scotch, 7; French-Canadians, 165. Males, 428; Females, 92. Catholics, 413; Protestants, 107. Extra meals to old and infirm, 564.

STONE.-The Q., M., O. & O. Railway is engaged in transporting a large quantity of stone from the Terrebonne quarries to the Mile End depot. It is being used on the Lachine Canal improvements. On Saturday the teamsters found it rather difficult to haul a block, weighing about ten tons, owing to the soft nature of the roads.

STATISTICS .- One of the roughs who was sentenced to four months by the Recorder on Saturday gave his name as George Dunn, his nationality as Irish, and his residence Magdalen street, whereas the truth is, his proper name is George Duncan, his nationality Scotch, and his residence Forfar street. This is how it comes that Ireland figures up so gloriously - as regards numbers - on the statistics and yearly returns.

NAVIGATION .- The Donaldson Clyde line of steamships will only despatch one more steamer to Portland, after which they will clear from Glasgow to Montreal, and expects to be among the first arrivals.... Captain Bowie, of the Ottawa Navigation Company, is in town preparing for the spring trade.... The "Lake Champlain," of the Beaver Line, will be the last of that line to arrive at Portland this season. She is expected on Monday.

New Facilities .- Mr. William Keys, a machinist, working at the St. Lawrence Engine Works, has just invented two very useful and cleverly constructed appliances. The first is an apparatus for putting a perfectly smooth and level face on a grinding stone, and consists of a screw horizontally placed on a frame, bringing it in contact with the stone, which is held in a foot-screw. By this method a grinding stone may, in five minutes, be made ready for use, without making any dust, as was formerly the case, besides doing the work in a shorter space of time. The other invention is of somewhat similar construction, but contains much stranger gearing, and surfaces emery with the greatest ease, which formerly could only be effected by a black diamond, and then very slowly.

Miss Moegler of Chicago, one of the graduates of the Women's Hospital College, has been successful in winning, by competitive examination, a place as assistant physician to the county Insane Asylum. This is the first competitive success of a lady in securing a hospital position in this country, where doctors of both sexes have met in competition.

An adept in ocean travel urges those who fear sickness to take a ten-grain blue pill the night before sailing, and a dose of citrate of magnesia the following morning. Then cat breakfast and go on board. He has followed this practice for several years, and been entirely free from qualms. All those who have imitated him have been equally fortunate.

A Public Benefaction.

The heart must be hard indeed that does not commiserate the abject wretchedness of the child when told that it must take a dose of Castor Oil. The aversion to the taste and smell of this most efficient and inestimable of laxative and cathartic medicines, seems to be universal, not only with children, but with grown up people. The chemists who could overcome these nauseous properties will ever be looked upon as a public benefactor. This has been fully accomplished by Scott & Bowne in their Palatable Castor Oil. It is pleasant to the taste, and within the reach of all. Price, only 25 cents a bottle.

ADVERTISEMENTS.

Weber Pianofortes.

These wonderful Pianos are the favorite instruments of every Prima Donna, every Singer, every Pianist of renown, in fact every Muscian of note. In their matchless tones, their extraordinary power and endurance, they have no equal. Read the following extracts from the leading musicians of the day:—

CENTENNIAL JUDGE, on Pianos.—"The Weber Pianos are undoubtedly the best in America, probably in the world, to-day. The Weber Grand was the most wonderful Piano I ever touched or heard."

HER MAJESTY'S OPERA CO.—"For purity and richness of tone, with greatest power and singing quality, we know of no Piano which equals them; certainly, for sustaining the voice, or cultivating it, the Weber is superior to any Piano known to us."

ITALIAN OPERA CO., NEW YORK.—"The tone of the Weber Pianos is so pure and prolonged, and of such inexhaustible depth, that they sustain the voice in a wonderful degree. The action is clastic, they have great strength, and stand remarkably long in tune. We not only commend them in the highest degree, but think them the best Pianos in the world."

THERESA CARRENO.—"My use of the Weber Pianos, at over one hundred concerts, proves how highly I esteem them. They have a tone and touch which meets every requirement of the most exacting artists, and I am not surprised that every great musician prefers them."

JULIA RIVE-KING.—"The finest Plano I

surprised that every great musician prefers them."

JULIA RIVE-KING.—"The finest Plano I ever placed my fingers on."

EMMA C. THURSBY.—"The tones of the Weber Planos are so sweet, rich, sympathelic, yet so full, that I shall always rank him as the greatest manufacturer of the day."

NILSSON.—I shall take every opportunity to recommend and praise your instruments.

KELLOGG.—For the last six years your Planos have been my choice for the concert room and my own house.

ALBANI.—I am thoroughly satisfied with your splendid Planos. They deservedly merit the high distinction they have obtained.

LUCCA.—Your Uprights are extraordinary instruments, and deserve their great success.

PATTI.—I have used the Planos of every celebrated maker, but give yours the preference over all others.

CTU AUSS.—Your Planos astonish me. I have

brated maker, but give yours the preference over all others.
STRAUSS.—Your Planos astopishme. I have never yet seen any planos which equal yours.
WEHLI.—Madame Parepa called your Planos the finest in the United States. I fully endorse that opinion. They have no rival anywhere.
MILLS.—Among the many excellent planos made in the city, the Weber ranks foremost.
For descriptive Catalogue apply personally or by letter to the Canadian Ageucy.
