Lord Iddes. leigh pleads that he is in all health and unable to sustain the fatigues of the Foreign Office, and he will persist in his determina tion to retire. Viscount Cross is uncertain as to what he shall do. The only positive result announced to-day has seen the Eirl of Northbrook's consent to join Mr. Goschen in the Conservative Cabiner. It has not yet been decided what portfolio will be given to him. The Conservative opposition is mainly directed against Lord Northbrook partly because he is suspected of sympathizing with Mr. Gladstone and partly because he has hitherto been hostile to Lord Salisbury's foreign and Indian policy. GLADSTONE ON LIBERAL UNITY.

Mr. Gladstone, in a letter that has been made public, refers to the speech recently made at Birmingham by Mr. Chamberlain as an utterance that ought to lead to the security of a modus vivendi between the present opposing sections of the Liberal party. As for himself, Mr. Gladstone says he would be glad of any means to bring about a free dis-oussion of the differences dividing the L beral party in order to obtain such common action as might be consistent with the respective principles of the sections.

CAN THE LIBERALS UNITE ?

Mr. Gladstone's letter, commenting upon Mr. Chamberlain's recent speech, was addressed to Sir Wm. Vernon Harchurt, and concluded with the significant intimation that the recipient could make what use he liked of it. Sir William sent a copy of the letter to Mr. Chamberlain, who in reply expressed his desire for a conference Mr. Chamberlain has summoned a private meeting of the leading members of the Radical union to consult upon the terms of a compromise. No party, however, believes that conference would result successfully. The Parnellites are the supreme obsticle to a compromise, and they will not accede to anvthing short of the submission of Mr. Chamberlain. A epeaker at to-day's meeting of the National Leigue at Dublin declared his unabated distrust and hatred of Mr. Chamberlain.

NO STARTLING CHANGES EXPECTED. It is considered improbable that a change will be made in the Foreign office. Lord Iddesleigh denies that he has expressed a wish to retire, and Lord Morley denies that he has been offered the foreign portfolio. The necessary changes in the Cabinet are few in number, and it is thought will not be of a startling character. Lord Silisbury is said to be much annoyed by what he terms the mischievous gossip in the newspapers. The Bulgarian delegates went to Harrifeld and paid Lord Salisbury an un flicial visit. The proroguing of Parliament until J.nuary 27

was gazetted to-day. THE NATIONALISTS AND GOSCHEN.

DUBLIN, Jon. 4. -At the fortnightly meeting of the executive committee of the National League held here to-day the different speakers ridiculed the idea that Mr. Goschen's acceptance of the Chancellorship of the Exchequer would be the means of saving the present Conservative Ministry. The treasurer reported the recept of \$25,000 in donations to the League's funds during the past two weeks from the United States.

LONDON, Jan. 5.—The Birmmgham Post announces that Sir William Vernon Harcourt, Lord Herschell, Mr. Morley, Mr. Chamborlain and Sir George Trevelyan will meet, problem. ably next week, to discuss the Irish question in the spirit of Mr. Gladstone's letter. It is propos d, says the Post, that the subject shall be discussed in the freese possible manner, and no proposition of a binding character will be submatted. Mr. Gladetone, will take no per-son light in the conference, but much is ex-pected from Lord Herschell's acknowledged act and moderation.

LORD RANDOLPH EXPLAINS

WHY HE DESERTED HIS CONSERVATIVE COL LEAGUES - GOSCHEN ASKED TO CONTEST THE VACANT SEAT IN LIVER-POOL-MORE CABINET RUMORS.

London, January 6 .- Lord Randolph Ohurchill, in a letter to the Conservative whip, explaining the motives of his resigna-tion from the Marquis of Salisbury's Cabinet, avs it was not prompted in any degree by disloyalty to his party, but was due rather to his appreciation of the necessity of preparing for the next general election. He was dis contented, he says, with the present position of the Conservative party in holding power iniurad. hy sufferance of a section of the Liberal party. He wanted to remove popular prejudice against the Conservatives, which had been fostered by the Radical cry that the Conservatives are reckless in their devotion to a spreadcagle and provocative policy abroad, and one extravagant and reactionary at home. He expected, he declared, to accomplish this end by adopting a broad policy calculated to win the masses of the people to the Conservative ranks. It was because he feared that the policy framed by his colleagues in the Min istry would be likely to defeat these essential objects that he was rejuctantly compelled to resign.

MORE CABINET RUMORS.

LONDON, Jan. 6 .- The Right Hon. Edward Stanhope, at present colonial secretary, has accepted the office of secretary of war. Lord Iddesleigh has not yet decided to accept the head of a man which had been severed from the suggestion to relinquish the foreign secretary body, and near it other portions of a body ship in favor of Lord Salisbury. The Marquis of Lans downe's declination of the office proffered by the Marquis of Salisbury has been received by the latter.

LONDON, Jan. 6 -It is expected that Lord Salisbury will make no further effort to com-plete his Cabinet with Whigs, but will fill the vacant offices with Conservatives. Conservative council of Liverpool has invited Mr. Goschen to contest the vacent parlia-montary seat in that city, and it is thought he will consent.

It was naked, and deep cuts in the hip and leg indicated the intention of the muracrors to sever the left limb as they had the right, which had been rudely chopped off at the thigh. The features were those of a hard working man. The Somerville police have received information which indicates that the disfigured remains are those of Geo. A. Codman. Codman was a young unmarried man and carried on a milk business in Somerville. There is little doubt that the victim was killed by a ter.ible blow on the back of the neck with an axe, and then chopped to pieces as found. The left leg, which was backed off, has not yet been discovered.

Boston, Jan. 6.-Edward Newtin was arrested in connection with the Lexington murder this morning, and made a full con-fession. Newtin killed young Codman at 3 o'clock on Tuesday morning by stabbing hin in the back of the neak with a carving knile. The deed was done in Codman's own stable. Later in the day he cut the clothes off the body, chopped off the left leg and right arm and started with the corpse in his pung for the country. At the spot in Lexington where the head and arm were found he dropped the head in the middle of the road and threw the arm out. He returned to Somerville at 5 o'clock on Tuesday morning. Newtin states that after driving awhile he began to realize the enormity of his crime and became frightened. His work worked so much nim that when he came to a lonely part of the road and was free from observation he took the body out of the pung, and half frenzied by fear, soized the axe and chopped the head off and mashed the face of the dead man until he thought it was unrecognizable. He then threw the head and the body into the pung, and started again.

FROSTBITTEN ELOPERS.

THEY OUTWIT THE BRIDE'S FATHER AND EXPLCT TO HAVE NOTHING BUT SUNSAINE AND SUGAR FOR A WHILE.

LCUISVILLE, Ky., Jan. 5.—Miss Emma Harris and Mr. Peter Owens were married in Jeffersoavide by Squire Kergwin. Mr. Owens is the proprietor of a sawmill on the Cumberland kiver, near Williamsburg, Ky., while the young lady is the daughter of a "mountain circuit" preacher. The young lady's father objected to the match and threatened to shoot the groom; but the latter hired a boatman on Saturday night, and taking the girl made the trip from Barboursville, her home, to Williamsburg, by the Comberland river. The distance by water is about seventy five unles, and the party arrive at Williamsburg last evening at 6 o'clock. The groom's ears were badly frostbitten and the bride was nearly frozen. They reached here this morning and took breakfast at Hinkle's restaurant at Fourteenth and Main streets. They will return home to-morrow morning. The irate father, supposing that the clopers had driven to Jelico, the nearest railroad station to Barbour-ville went thither with a party of mountaineers on Saturday night, but, not finding them, it is supposed gave up the search. When the groom registered at the Arlington he remarked when some one sympathised with his frost bites: "Yes, it was rather disagreeable, but we'll have nothing but sunshine and sugar for a week or two a yway.

SOME INSTRUCTIVE FACTS FOR PEO-PLE WHO NEED KNOWLEDGE.

If a blizzard of unusual severicy were coming from the Northwest that would send the thermometer down fifty degrees or seventy degraes in three hours, we should expect a great increase of pneumonia and other respiratory diseases, resulting in deaths. Now, inside of three hours, suppose the mercury were to drop threescore degrees in three minutes-or take another step in fancy and suppose this great change to take place in three seconds, what would likely be the effect on health? And yet we bring about, artificially, changes to ourselves quite as sudden and as severe as this. We make an artificial climate in our houses. We live indoors in an atmosphere heated by stoves, furnaces or steampipes to 70 degrees or 80 degrees; and we pass from our parlor or hall so heated into the open air. At a step, literally in a breath, the temperature of the air has, for us, dropped 50 degrees or 70 degrees. We may put on an extra coat or shawl and shield the delicate linings and membranes of the air passages, the bronchial tubes, the lung colls. Naked, they receive the full force of the change—the last breath at 70 degrees the next at freezing or zeroand all unprepared. We have been sitting, perhaps for hours, in a tropical atmosphere; nay, worse, in an atmosphere deprived by hot iron surfaces of its ozene and natural requirements and bracing qualities. Our lungs are all relaxed, debilitated, unstrang; and in this condition the cold air strikes them perhaps 60 degrees below what they are graduated to and prepared for. Is it strange if pneumonia and bronchisis are at hand we are in the West Indies, or even in Florida, and wish to come forth in winter, we try to make the change gradual. But in our houses we keep up a tropical climate, or worse, for you have not the freshness of air that prevails in an open tropical atmosphere, and we stip at nce into all atmosphere as much colder as 40 degrees difference of laticade will make it. 1: is in effect going from Cub; to Iceland-or at least to New York-at a step, and we make the journey perhaps a dozen times a day.
