

Complete Units of One Make

The growing preference for uniform quality in pumping machinery is exemplified in the pumping station at the new filter plant at Port Hope, Ont., view of which is given herewith. In this plant a Canadian Fairbanks-Morse vertical motor is direct-connected to a low-life centrifugal pump of the same make. As a reserve unit, a Canadian Fairbanks-Morse oil engine drives another centrifugal pump of the same make, and the piping, etc., was all supplied by the same firm. There is no division of responsibility. Canadian Fairbanks-Morse quality guarantees the strength of each link in the chain — electrical — mechanical — hydraulic.

LAGONDA BOILER TUBE CLEANERS

The latest Lagonda Water and Air-Driven Boiler Tube Cleaners are the most powerful and efficient tube cleaners made. They develop higher speed and greater power than has heretofore been secured with any Turbine Cleaner, and their use will materially shorten the time required in cleaning boilers.

These new Lagonda Cleaners are built for all sizes of tubes, either straight or curved, and they can be driven by water, air or steam.
