

*From WILLIAM E. SCOTT, Esq., M.D., Professor of Anatomy, McGill
College; one of the Attending Physicians of the Montreal General
Hospital.*

I have known Dr. John Bell since his residence in Montreal. During his attendance at McGill University, he was regular and diligent in his studies. From my acquaintance, therefore, with Dr. Bell I am convinced that in the performance of the duties belonging to any medical appointment that he might procure, he would be found competent, attentive and faithful.
