

FACES TRIAL ON TWO CHARGES OF MURDER

Mrs. Sheels Married While in Hospital and Husband Accompanies Her to Trial.

Lawrence, Mass., June 9.—Mrs. Bessie M. (Sheels) Lundgren was put on trial for alleged murder by poisoning in December, 1917, of Miss Florence Gay, of Andover, for whom she had acted as nurse. The defendant, still convalescing after an operation two months ago, was brought from her home at Andover to the court house. She has been at liberty under nominal bonds. Her husband, Alfred J. Lundgren, who married Mrs. Sheels at a hospital when she appeared in danger of death, attended her in connection with the death of her brother, Albert J. Wilkins, of Bayonne. Witnesses from that city will be called by both the defence and prosecution. The trial is expected to last about two weeks.

DOCTOR PRESCRIBES VINOL

For Schoolboy to Create Strength After Sickness.

Vineyard, N. J.—"I am a schoolboy, seventeen years of age, and typhoid fever left me weak and debilitated, so I had to stay out of school three months—my doctor prescribed Vinol. It has built up my strength and now I am feeling fine."—S. E. Dunce.

The reason Vinol was so successful in this boy's case, is because it contains beef and cod liver, peptones, iron and manganese peptones and glycerophosphates, the very elements needed to build up a weakened, run-down system, make rich red blood and create strength. Watson's Drug Store, The Ross Drug Co., St. John. Vinol is sold in Fairville by T. H. Wilson, and at the best drug store in every town and city in the country.

GUTHRIE MAY BE JUDGE

Ottawa, June 8.—There is a strong possibility that in the near future, Hon. Hugh Guthrie, solicitor-general, will be appointed as an additional judge to the exchequer court. Of the present exchequer court judges, Hon. Walter G. P. Cassels is seventy-four years of age and Hon. L. A. Andette is sixty-one years of age. In the course of time the retirement of Judge Cassels on a pension can be expected on account of his advanced age.

CATHOLIC WAR COUNCIL

Bulletin Issued Giving Features of Work Being Done

Washington, June 10.—The National Catholic War Council, composed of the fourteen archbishops of the United States, and functioning through an administrative committee composed of Rt. Rev. P. J. Muldoon, D. D., Bishop of Rockford, Ill.; Rt. Rev. Joseph Schrembs, D. D., Bishop of Toledo, Ohio; Rt. Rev. William T. Russell, D. D., Bishop of Charleston, S. C.; and Rt. Rev. Joseph S. Glass, C. M. D., Bishop of Salt Lake, Utah, and a committee on special war activities, of which Rev. John J. Burke, C. S. P., editor of the Catholic World, is chairman, and Walter G. Hooke is executive secretary, has issued the first number of a monthly bulletin, of which Michael Williams is editor. Nearly 2000 organizations of Catholic laymen and laywomen have been co-ordinated and are now directed by this organization.

The bulletin records the chief features of the work of the council, which acts in close co-operation with the United States government, and with other welfare organizations. The varied nature of the work is shown by the articles in this first number. The Rt. Rev. Peter J. Muldoon, Bishop of Rockford, chairman of the administrative committee, is the author of the leading article, which reviews the past work of the council and outlines the important activities in the field of reconstruction which lie ahead. In the course of his article he quotes from the recent letter of Pope Benedict XV. to the American bishops, in which they are exhorted to carry on the work, and place it on a permanent basis through two commissions, to be appointed at the annual meeting of the bishops. One of these commissions is to deal with social questions and the other with educational problems. "So urgent is the call to a zealous and persistent economic-social activity," writes the Pope, "that we need not further exhort you in this matter. Be watchful, however, lest your good works, carried away by vain opinions and noisy agitation, abandon to their detriment the Christian principles established by your predecessor of happy memory, Leo XIII, in his encyclical letter, Rerum Novarum. More perilous than ever would this be at the present moment, when the whole structure of human society is in danger, and all civic charity swept by storms and evens hale, seems like to shrivel up and disappear."

The work of the Knights of Columbus is reviewed by John D. Kennedy and the Catholic programme of reconstruction by Michael Williams. Miss May M. Murphy tells the story of the national service school for women established at Washington, D. C., while a number of other articles deal with the overseas women workers; Catholic co-operation with the Boy Scout movement; the rehabilitation school for disabled fighters, and the

hospital social service. There are also brief reviews of the various publications issued by the council, the chief of which, the programme of reconstruction, issued by the four bishops of the administrative committee, has attracted national attention in the press. It is regarded by social experts as one of the most important pronouncements on social reform ever issued in this country.

Copies of the bulletin and other national Catholic war council publications may be obtained free by writing to the committee on special war activities, National Catholic War Council, 800 Fourteenth street, N. W., Washington, D. C.

GALLI-CURCI WANTS \$15,000

Denies Charges Made by Her Husband in Divorce Suit.

Chicago, June 10.—Amelia Galli-Curci, opera singer, through her attorney has denied all charges against her character made in a recent answer to her bill for divorce, which was filed by her husband. At the same time she filed in the Superior Court an affidavit alleging that Curci has \$25,000 in Italian securities which rightfully belong to her. She asked that \$15,000 of this amount be paid her at once as her support pending determination of her suit, the remaining \$10,000 to be paid when the case comes to final settlement. The case will come for hearing on June 17.

AN undersuit with a full free blouse and solid crotch drawers—two garments, yet in one piece—is the ideal. It means comfort to the fullest degree.

Christian Science

Address Given Here on Sunday By Frank Bell

A large number gathered in the Imperial Theatre Sunday afternoon to hear Frank Bell deliver his thoughtful address on Christian Science. W. K. Crawford, president and in his introductory remarks said:

"When Jesus was on this plane he taught and practiced Truth in healing all manner of diseases and casting out devils and he said to his followers 'Ye shall know the Truth and the Truth shall make you free.' Plato asked Jesus what is truth, but did not wait for an answer. All down the ages since Jesus' time men have been asking what is Truth without getting a satisfactory answer. Our revered leader, Mary Baker Eddy, through the diligent study of the Bible has rediscovered this great Truth and has given to the world the benefit of this great discovery in her text book Science and Health with Key to the Scriptures. It is to give mankind a chance to share this great blessing that this lecture is being delivered this afternoon by a gentleman fully qualified to do so on this subject. Therefore it affords me great pleasure on behalf of Christian Science Society, 141 Union street, to welcome you here this afternoon and introduce to you Mr. Frank Bell, C. S., member of the board of lecturership of The Mother Church, The First Church of Christ Scientist, Boston, Mass."

Mr. Bell, in his lecture, said Christian Science had been called the science of right thinking, because the practice of Christian Science is by the activity by which wrong thoughts give place to right thoughts, that the fruits of right thinking may appear instead of the fruits of wrong thinking.

Control of Thought.

"All there is to living is thinking," said the lecturer, and he gave illustrations of how conditions of living are primarily conditions of thinking. This, he said, would not be pleasant to contemplate were it true that thinking is more or less beyond control. Christian Science, he added, "shows the willing student not only how to distinguish right thought from wrong thought, but how to hold to the one and reject the other, and thus to have dominion over the shaping of his career."

The essentially mental nature of evil was explained, attention being called to the fact that successful resistance of evil requires a knowledge of what evil is and how it can be met and mastered at its source. The speaker referred to the incident of the last of the figs, the fig called disease is the outward expression or effect of a mental state. He said, "The grovelling practice of Christian Science, 'in which all manner of disease is healed by treatment applied solely to mental conditions, is a wrong thinking, and that disease in all its aspects is the working out of wrong thinking." This, he added, was not necessarily conscious, and that disease is a wrong thinking. Illustrations were given of the extent to which the common daily experiences of living are "wrong thinking." Persons on the part of others, to which we unconsciously respond when we ride on trains, in the streets, in the houses, etc. Therefore, "the mental causes of disease are not necessarily confined to influences which the victim of disease may be aware of. Christian Science," he said, "proves disease to be mental by healing it by mental means."

The book, "Science and Health, with Key to the Scriptures," by Mary Baker Eddy, was described as the textbook of Christian Science, which are set forth "the rule and method of the science of right thinking, what it is and how it may be learned and applied." Persons who studied this book in the hope of learning how to practice hypnotism or mesmerism, to conquer pain with mental suggestion or will power, to heal disease by calling it names, to overcome evil by ignoring it, or to do things else absurd or unnatural, declared the speaker, were bound to be disappointed. He said the title of the book showed its purpose was to prove not only that health is a matter of science or knowledge, that is to say mental, but that the knowledge that is synonymous with health is religious knowledge, to be found in the Bible, and that "the mentality that truly heals is not the human mind, but the Infinite Intelligence, God." The book, he said, sets forth not a theory to be argued, but a method to be tried and judged by results, the keynote of Christian Science being demonstration.

The method of Christian Science treatment was illustrated in a description of how it is applied in the case of the disease called intemperance. Pale appetites, the speaker said, were traceable to wrong mental concepts which yielded readily to the right mental activity of "scientific religion."

Helpful in Business

Business men find the solution of their business troubles in Christian Science, the speaker declared; that is, provided they are willing to give up trying to gain seemingly worth while ends by means of wrong acts. The lecturer quoted "a man of world-wide reputation for business success" as saying: "My experience has taught me that the effort to make a man buy something he does not need, in the long run defeats its own purpose." This was cited as illustrating the fact that the modern business man "is catching a glimpse of the operation of divine law in business." Christian Science helps the business man to see this more clearly, according to the lecturer, "and to avail himself of the operation of divine law in business in constantly increasing degree." Christian Science teaches him that a right result never is due to chance; that the presence of such qualities as justice, truth and love, in a business transaction, are "certain signs of the presence of the true God, a presence necessarily active and good, and having a direct relation to ultimate success." The "Christian Scientist in business was described as 'a trained observer of mental conditions' possessing all the attendant legitimate advantages of being able to think right."

A Substantial Movement

The activities of the Christian Science Church were described by the speaker. It has 1800 branches in all parts of the world, and new ones being organized at an average rate of one per week. There are six thousand registered practitioners of Christian Science, devoting all their time to the work. The lecturer said last year were heard by one million, three hundred thousand persons.

The church gives liberally in public emergencies and its members do their share in support of worthy charities. A steady stream of money and supplies has gone through this church to war sufferers in all lands since the war began. This church "makes no demands on the community." It builds handsome church edifices without solicitation of funds from outsiders, and dedicates them free from debt. Its up-to-date publishing house employs over hundred persons, issues Mrs. Eddy's works; also quarterly,

STOP LOOK and LISTEN
before purchasing a baking powder that may possibly contain injurious ingredients. Many food scientists claim that baking powder containing alum is unsafe for use in food. The mere fact that some brands of baking powder have the words "No Alum" on the label is not sufficient proof that they are what they are represented to be. Our chemists find a good many have "No Alum" on the outside but large quantities of it inside.

MAGIC BAKING POWDER

DOMINION G. W. V. A. AGAINST ONE BIG UNION IDEA

Ottawa, June 9.—The Dominion executive of the Great War Veterans of Canada meeting here has made a declaration of principles which include opposition to the underlying principles of the "one big union" with its accord of Russian bolshevism and German spartacans. The memorial has been handed to Premier Borden.

Religion and War

"Good citizenship is a natural product of right thinking," said the speaker. "One would search the teachings of Christian Science in vain for justification for the slightest default in one's support of a righteous government in a just cause." He then explained that Christian Scientists are doing their full share in the great war, but that they had been spared much of the mental burden of the times by reason of the effect of their religion in dissolving doubt and allaying fear. When war came, the Christian Scientist did not have to "lower his concept of deity by assenting to the wicked theory that a righteous God must needs use evil to accomplish good, nor 'stupefy his spiritual sense with that diseased, false substitute for straightforward thinking, the familiar theological, narcotic, that the ways of providence are inscrutable.' Christian Science, the speaker said gave its adherents a rational explanation of all things. He added that the "Christianity that is Christian Science" is practiced universally, "war will be no more, because fear and disease, just and greed, superstition and false theology, phases of wrong thinking that promote and permit war, will have been deprived of their claim to dominion over

LOYALIST CHAPTER MEETS FOR LAST TIME UNTIL THE AUTUMN

The Loyalist Chapter of the I. O. D. E. met last evening for the last time until after the summer and the regent, Mrs. Hugh Mackay, who presided, spoke of the meeting of the national chapter at which it had been urged that war memorials should be educative in their aims. Letters of thanks for donations were received from the Y. M. C. A. Red Triangle fund, the Victorian Order of Nurses and the Association for the Prevention of Tuberculosis; also letters of thanks for presents of maple sugar from Malcolm McKinnon, R. S. M. Busby and Fred White. In response to an appeal \$25 was voted to the nurses' home in London, England. A committee composed of Mrs. F. Johnston, Miss Hegan and Mrs. Gordon Sancton was appointed to receive and examine the 100 essays on the British Navy from the children in grade VIII, for the best of which essays the chapter is offering a prize. The committee which has in hand the furnishing of the hall of the nurses' home in the East St. John Hospital, reported excellent progress. It was decided that each member

Hairs Will Vanish After This Treatment

(Toilet Helps.)
You can keep your skin free from hair or fuzz by the occasional use of plain detolene and in using it you need have no fear of marring or injuring the skin. A thick paste is made by mixing some of the powdered detolene with water. Then spread on the hairs and after 2 or 3 minutes rub off, wash the skin and all traces of hair have vanished. Be careful, however, to get real detolene.

Alkali in Shampoos Bad for the Hair

If you want to keep your hair looking its best, be careful what you wash it with. Don't use prepared shampoos or anything else, that contains too much alkali. This dries the scalp, makes the hair brittle, and ruins it. The best thing for steady use is just ordinary mulified coconut oil (which is pure and greaseless), and is better than anything else you can use. One or two teaspoonfuls will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich creamy lather, which rinses out easily, removing every particle of dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, and the hair fine and silky, bright, lustrous, fluffy and easy to manage. You can get mulified coconut oil at any pharmacy, it's very cheap, and a few ounces will supply every member of the family for months.

should earn talent money during the summer and make articles for the Christmas sale.

Polarine
FRICTION REDUCING MOTOR OIL
"Makes a good car better"

A refinery where crude oil is rectified and Imperial Polarine and other Imperial products are manufactured.

Expert Refining

All the experience and skill of Canada's best known and largest oil company goes into the refining and making of Imperial Polarine.

Imperial Polarine shows its quality in service. It is proof against severest engine heat and the pressure of engaging parts. Its body holds. It keeps on lubricating. It makes cylinders power tight so far as an oil can. It burns clean.

Three grades—Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A. Ask the Imperial Oil Man which you need.

In one-half, one and four-gallon sealed cans—twelve and a half gallon kegs, in half-barrels and barrels.

Sold by good dealers everywhere.
