

bution, and motion of the clouds. Observations for finding the dew point are made at three P. M. The direction and velocity of the wind are recorded not only at the observation hours but at every hour throughout the year, by Robinson's Anemometer. A register of the maximum and minimum temperatures of the air that occur during each day and the greatest intensity of solar and terrestrial radiation is made daily throughout the year.

In addition to the meteorological condition of each day a record is made of occasional phenomena, such as rain and snow, with its duration and amount, thunderstorms, auroras and miscellaneous events illustrative of the progress of the seasons.

The regular staff employed in the work of adjusting the instruments, making the magnetic and meteorological observations and reducing the results, consists at present of the Director, Professor Kingston, M.A., and three observers, Messrs. Walker, Menzies, and Stewart, formerly sergeants of the Royal Artillery."
