The candy retails at 16 to 20c. per 1b., and the sugar at 16c. Of course, there is plenty of "West India" maple to be had, and some of it is very pleasant to the THE AMERICAN LUMBER MARKET.

THE AMERICAN LUMBER MARKET. The Chicago Lumberman says: "Indica-tions are becoming apparent that the mill product of Canada will cut a considerable figure in the American market this season. Reports from eastern points are to the effect that lumber is being offered on this side the line at prices \$1 to 1.50 a thousand lower than the same class of stock is held at on this side. It is only natural that this should be so, in the absence of tariff dues, especi-ally this year, when the market is not very eager or ready to absorb a surplus. The mill operator in Canada, particularly if he be an American, will sell his output if he can without regard to its effect on prices in this country." tress. Bridget was limping painfully when she was walking with Pat not long afterward, and he asked: nd ne asked: "Phwat's the matter, Bridget?" "Faith," was the answer," "I have lost terrible corns on me kismet!"-I

THE FORESTERS

D. Oronhyatekha, the supreme chief ranger, left last week for the Pacific ccast. While away he will institute two new high courts and complete the organization of a third. The influx of new members continues, and applications are being received daily to open up the work in new territory. The arrangements for the entrance of the crder to New Hampshire are about completed. The following new courts have been reported organized during the past few days: Court Selby 1 809. Selby, Ont.; Bee Creek, 1,810, Paris, Mo.; Baldwin, 1,811, Norwood, N.Y. Young's Cove, 1,812, Young's' Cove, N. B.; Newtown, Newtown, N. B.; La Fiesta, Los Angeles, Cal.; Centreville, Centreville, N. S.; Rouse's Point, Rouse's Point, N. Y.; King Alfred, 2, generally studied by every practical 157. Taunton, Eng.; Carlton, 2,158 Leeds, England.-Toronto Globe.

EXCAVATING POWER OF ICE.

The power of ice to erode and wear way rocks has been a subject about which scientific men have not always been agreed. One of the speakers at a recent meeting of the Natural History society attributed several deep gorges in the maritime provinces to ice action Prof. Shaler of Harvard college is also a believer in the great excavating power of ice. In a review of one of his recnt works In Nature exception is taken by the reviewer to this: "We venture to think that Prof. Shalen takes rather too much for granted in assuming, without been limit that this has disputed, that great rock basins have been excavated by glaciers. Moreover he is hardly correct in saying that fjords are restricted to ice-worn regions, for Cornwall can show more than one very respectable imitation of such an inlet, and on the Dalmatian ccast they are not rare. * * * It would be well, as a preliminary step, to prove that glaciers are agents of excavation to an importnt extent, for this has been denied by many geolo gists, who vainly ask to be shown any proofs of such effects in the subaerial part of their course.'

boarding house on Princess street. own living since she was thirteen years month ago and entered the employ of the Dominion Portrait company, whose office is on Dock street. The young lady went about the city selling portraits for her employers, but does not seem to have been very successful When she first came here she boarded at Elliott's hotel, but she left it some lays since and removed to Mrs. Thompson's boarding house at 183 greenbacks totalled a snug sum. Princess street.

late, declaring that she had no friends and with a good bank account and and that no one cared what became of her

Tuesday evening she donned a white costume, even putting on white stockings, and stretching herself out at full length on her bed cut her throat with a razor belonging to one of the gentlemen boarding at the place. The cut, which was four inches long, was fortunately not deep. It did little ed to an admirably propared luncheon. more than cut through the skin. As The house was large and very clean. soon as the people in the house dis- Each wife had a room of her own, covered what Miss Coleman had done, Dr. W. W. White was sent for, and he did all that could be done for the young woman

Later on Chief of Police Clark and Capt. Jenkins put in an appearance and Dr. White having given a certificate of insanity she was at once removed to the lunatic asylum. It is said Miss Coleman attempted to take

her own life once before by taking laudanum. She told the officers that she was determined to die. She said she would end her life as soon as she got a chance.

EVADED THE RESPONSIBILITY.

is in receipt of a letter Miss Coleman, who is an orphan and says she has been obliged to earn her Fort Sill, Oklahoma territory, in which she describes a visit made of age, came to St. John about a a party to the home of an Apache chief near the fort. The United States government last year took over the reservation and paid the Indians, the payment amounted to about \$700 for every man, woman and child on the reserve. As the chief in question, hesides being a very important person-age, has six wives and sundry pappooses, his share of Uncle Sam's In consequence he has a good house and She has been very despondent of farm, has a paleface to work the farm, six wives can regard life from the standpoint of a philosopher. It is said that one of his wives was bought and one was stolen. He has one particular favorite among them and he and she were absent when the visitors called. The latter were well received, however, by the five remaining wives, were shown over the place, and treatand in each room was a sewing machine. The room of the favorite wife was by all odds the most attractively furnished of the lot. There was a rumor current at Fort Sill that the chief and his favorite would not return until after Easter, for he was a shrewd redskin and knew that if Easter bonnets for six wives had to be purchased there would be a "busted Injun" on the Oklahoma prairie.

> MIS. GILPATRICK'S MAINE OPER-ATIONS.

> > (Gleaner.)

Ora Gilpatrick, who is registered at the Barker house, and who lumbers very extensively in Northern Maine, says that he will have 1,600,000 last blocks piled along the line of the Bangor and Aroostook R. R. this summer for shipment to the Massachusetts and New York market. He has lumbered on both sides of the line. He feeds his men well, providing beef, raisins, rice, and everything supplied ty an hotel, and he keeps a strict acount of the cost of board per man. He finds that the cost per man is about the same in Maine as New Brunswick, namely, from 19 to 21 cents per day. He further said that he would advise all those doing business n New Brunswick to remain where they are, as the prospects for success are much better here than on the other side of the line.

Alcibiades had a typical Greek face, and was called by a contemporary "the handsomest rascal in Athens.
