Over Hundred Thousand Dollar Fire at Milford Last Night

(Continued from page 3)
The tenement house to the eastward of the Dwyer building, owned by Mrs. Ingles and occupied by George Stevens, a laborer; John Ewart, a laborer, and Harry Seeley, was very quickly emptied of its contents, and the furniture of the three families carried to a safe distance from the ferociously burning Dwyer building, which was only about fifty feet away.

Saved the Building.
It was only with plenty of help by a bucket brigade that this building was saved, for with wet blankets from the eaves of the roof, and a continual throwing of water on its scorched side, the building was saved from the same fate as that owned by Dwyers.

The furniture, however, was considerably damaged in its hasty removal. It was while pouring water on the roof of this house that a son of Mrs. Stevens slipped and fell to the ground badly injuring one of his feet.

Unoccupied House Burns.
When the Dwyer property was all in flames an unoccupied dwelling in the rear, known as the McBrierty house, but owned by Messrs. Dwyer, caught fire and was soon all in flames.

Another House on Fire.
The two family dwelling adjoining the Dwyer property, situated on the corner of the Kingsville road and owned by J. Crowley, soon caught fire. This building was occupied by Patrick Keane, a teamster, and William Shannon, a laborer. A large crowd of men and boys having been attracted by the fire, quickly cleared this house of the furniture, not, however without considerable damage to the furniture.

Still Another House.
The Crowley house did not take long to be enveloped by flames and the two family house on the opposite corner of the road, owned by William Evans, and occupied by him on the ground floor as a residence and grocery store with Mrs. Mary Quinn residing on the upper flat had caught on fire. Furniture and groceries were removed from this building with the usual damage.

McGrath Dwelling.
It was only a short time when the flames from the Crowley dwelling caught the self-contained house adjoining and owned and occupied by Thomas McGrath, a carpenter. As like the others the furniture was removed and the building was left to the mercy of the flames.

The Stout Property.
The next dwelling in line of the fire was that known as the old Irvine property, owned and occupied on the ground floor by William Stout, a machinist, while the upper flat was occupied by Arthur Sappier, a teamster. The furniture was quickly removed from the building and Mrs. Stout, who was seriously ill, was tenderly removed to the home of a neighbor. While the rear portion of the Stout building was destroyed while somewhat damaged was saved by the firemen.

The Total Loss.
Speaking to The Standard reporter last night, John Dwyer, one of the firm of Dwyer Brothers, stated that the loss by his firm would be extensive. He said that without a doubt they had the most up-to-date bakery plant in the Eastern Provinces, and only about a year ago had spent about fifteen thousand dollars on the plant in machinery, etc. In addition to this, there was stored in the premises about eighteen thousand dollars' worth of flour, the greater portion of this having been received within the past few days; also about six thousand dollars' worth of sugar. The plant would be valued at over thirty thousand dollars, and, in all, the total loss of bakery, plant, stock, groceries, dwelling and contents, would well reach to about eighty thousand dollars. There was no time left even to save the furniture and clothing from the home.

Total Loss.
The total loss by fire last evening to all the buildings and the contents, will reach well over the hundred thousand dollar mark, while it is estimated that the total insurance will not be more than fifty thousand dollars.

The Fire Department.
As soon as the alarm was given the Fairville Fire Department responded but the fire engine refused duty and no water could be sucked from an old mill pond near the scene of the fire. A telephone message was sent to Commissioner Thornton in the city and in turn he got in communication with Chief Blake and the large motor engine was hastened to the scene. The Commissioner, the Chief and a few of the city firemen responded, but this was after eight o'clock, but with a couple of good streams of water the city men assisted by the Fairville firemen performed effective work and prevented the fire from totally destroying the Stout building and spreading to adjoining property.

A few thousand people from the surrounding district as well as the city attended the fire and remained on the scene until nearly midnight.

Dr. C. C. Jones Here Yesterday

Dr. C. C. Jones, chancellor of the University of New Brunswick, who was in the city yesterday was asked by The Standard to say a few words about the conference at Laval and the work of his own college.

In connection with the conference he stated it was one of the best attended and most representative sessions they had ever held, delegates being present from the Atlantic to the Pacific. One of the important matters discussed was that of military training, by organizing officers training corps. General Gwatkin and Col. Magee put the matter before the conference and all expressed themselves as willing to cooperate but in the opinion of the gathering, if this work was undertaken, the government should provide the necessary funds to carry it on.

Other matters discussed were, engineering and forestry courses. In connection with the first named the recommendation of the committee was for a four year course along the lines so successfully carried out at the U. N. B. they also suggested that more English be given in this course. With regard to the second, a paper was read by Prof. Piche of Laval in which he made special reference to the graduates of the U. N. B. and the good work they had done in the province of Quebec.

The teaching of French was also taken up and it was decided that a good French department was necessary in every college.

Asked about plans for the U. N. B. for the coming term Dr. Jones said they were expecting a banner session as never before at this time of year had so many enquiries, been received for information, especially in regard to the forestry course. A feature of the enquiries about this course was the fact that a great many of them were from the United States, showing that the fame of the local college had travelled far.

As a proof that foresters were in demand he cited the fact that several of this year's graduates had been able to start work at an initial salary of \$1,800 per year, and the same applied to graduates from the engineering class.

The institution was in a position to do exceptional work if only a larger measure of financial support was given and he was in hopes the provincial government would see the necessity of providing facilities for science work in general and the forestry work in particular.

The memorial fund canvass was to be continued during the summer, but the building would not be commenced before next year. At the present time there was about \$50,000 in sight for this and it would need \$150,000 to put up the building proper, a convocation hall with laboratories.

Says She Could "Sing For Joy"

Sydney Woman Praises Tanlac for Relieving Her of Three Years' Suffering.

There can be but one explanation why Tanlac not only has such an enormous sale, but also gives such universal satisfaction, and increases such enthusiasm amongst its users, and that is, namely, "Those who once try it invariably buy it over and over again and tell their friends of the splendid results they have derived from its use."

Still another Nova Scotia woman to realize the remarkable powers of this medicine, is Mrs. Mrs. John Rose, of 43 Henry St., Sydney, who in a statement made recently, said: "It's such a relief to be free from sick headaches and to feel really well, that I could sing for joy. Why, for the past three years I have had so much sickness that I thought I should have to give up altogether. After every meal my head would ache and I would be almost blind with pain. I didn't care whether I ate anything or not and often could take nothing but a cup of tea for breakfast. I would toss about for hours at night unable to sleep and it was often two or three in the morning before I closed my eyes. I became very much depressed about my condition, for although I tried nearly every medicine under the sun, I could get no relief."

"Then a few months ago I decided to give Tanlac a trial. I confess I hadn't much faith in it when I started, but it's effect was wonderful. The very first bottle started me on the road to recovery and I've been progressing ever since. My depression left me and I began to brighten up. I could notice myself getting stronger every day, and now after taking four bottles in all, I am a perfectly well woman. My appetite is just splendid and I can eat anything I want and never have a touch of indigestion or biliousness. It is a rare thing for me to ever have a headache now and I sleep so soundly at night that I get up in the morning feeling as fresh as a daisy, and ready for the day's work. Tanlac is certainly a wonderful medicine and I shall always keep a bottle by me after this."

Tanlac is sold in St. John by Ross Drug Company and the leading drug list in every town, under the personal direction of a special Tanlac representative.—Adv.

PRACTICE HIKE
The St. Stephen Cadet Corps held a route march in the direction of Mount Pleasant last evening. The cadets presented a very smart appearance as they marched along in their swinging kilts and natty uniforms.

MARVELOUS GROWTH OF CANADA'S AUTO INDUSTRY.

Government Policy of Good Roads a Determining Factor

That Canada now produces and uses more automobiles than any other nation upon earth except the United States comes somewhat as a surprise to most people, remarked Mr. Robt. Gray, President of Gray-Dort Motors, Ltd., but such nevertheless is the case; for the latest figures and statistics show that one in every twenty-three persons in the Dominion owns and operates an automobile. Within the past five years in Canada this giant industry has advanced by leaps and bounds, it now employs over 15,000 workers, whose wages exceed \$17,000,000 per annum. Last year about 35,000 automobiles were manufactured and marketed in the Dominion and while the figures for 1920 are problematical it is safe to assume that this total will be increased by 40 per cent. Today there is probably 350,000 motor cars in operation throughout Canada. The strong and determined policy of good roads, as now laid down by the federal government and also augmented and followed by the governments of each of the provinces is a strong factor in the use of automobiles cannot be gainsaid. Our legislators now recognize as did the Conquering Romans that "Good Roads are the Hall-mark of Civilization" and realize that good roads are an asset beyond computation. This fact was demonstrated in the Great War; Verdun was saved because of good roads and motor transport.

As the automobile industry has evolved, expanded and progressed the attitude of the public has gradually shifted with the passing seasons in regard to the open and closed styles. In the infancy of this wonderful industry the touring car and the roadsters were the popular types of cars and were manufactured in an overwhelming majority. Later on the closed models began to make their appearance in the larger cities in a very limited number. Year by year this number has been increased until now the closed models are a familiar sight not only on the city boulevards but on the great National highways that are now beginning to stretch across the Dominion. The reason for this shifting of the popular favor from the open to the closed models is due to a number of things. One of which the closed cars are now so manufactured that they can readily be transformed into practically open cars by lowering the side glasses. In this way the closed cars such as the Coupe and Sedan become the ideal all-season, all-purpose types of cars, conveniently adaptable to all sorts of weather and climates.

CANADIAN PACIFIC SUBURBAN SERVICE
On Saturday May 22nd suburban train will leave St. John at 1:10 p. m. returning leave Welsford 8:15 p. m. due St. John 9:15 p. m. Atlantic time.

DIED.

SHERWOOD—At his residence, Passmore on May 19, S. H. Sherwood, aged 49 years, leaving his wife and eight children to mourn.

Funeral from late residence Friday afternoon at 2:30 o'clock, interment at Millland, Kings County.

IN MEMORIAM.

STEWART—In loving memory of Alex. T. Stewart, who died at Norton, N. B., on May 21st, 1919.

HIS WIFE.

There are several ways of using "commonplace tea", but the cheapest and best way is to "Junk It", then you will readily realize what it has cost you and determine to never again use any but

"SALADA"
The one Tea with a continent-wide reputation

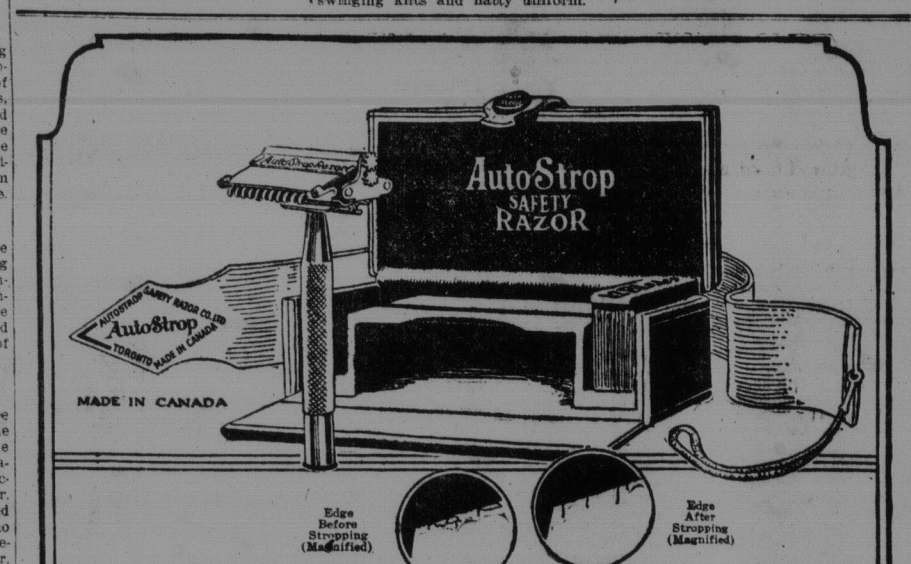

FOR THE PICNIC
take along a bottle of
MONTSERRAT
Lime Fruit Juice

Cold drinks for everybody—satisfying and healthful—that's what a bottle of MONTSERRAT Lime Fruit Juice means on the picnic. Don't bother with lemons. Most people prefer limeade, and it's so easy to make. Sugar, cold water and "MONTSERRAT", and you have a drink that everyone enjoys. Best possible beverage for children, because it is pure and wholesome. "MONTSERRAT" is the snappy, fragrant juice of choice West Indian limes—the ideal thirst quencher for hot days.

MONTSERRAT
Fruit Saline
keeps the liver active—the stomach sweet and the whole system right.

Keep a bottle always handy during the summer—take along a bottle on your automobile trips as well as on the holiday picnics.
