MATERIALS CHARGED TO STEEL FURNACES:—The total quantity of pig-iron used in steel furnaces during 1918 was 897,537 tons of which 818,394 tons were produced by the firms reporting and 79,143 tons purchased. The quantity of ferro-alloys used was 44,697 tons, which included 8,720 tons of ferro-silicon and 35,977 tons of ferro-manganese and spiegeleisen. The total quantity of scrap iron and steel used was 1,068,434 tons of which 515,302 tons originated with the firms reporting and 553,132 tons were reported as purchased.

Ores used included 59 tons of manganese ore and 48,599 tons of iron ore, while 243,383 tons of limestone and dolomite were used and 17,307 tons of fluorspar.

In 1917 the quantity of pig-iron used, 1,112,082 tons included 993,805 tons produced by the firms reporting and 118,277 tons purchased. The scrap iron and steel used, 1,022,456 tons, included 527,400 tons originating with the firms reporting and 495,056 tons reported as purchased.

A record of materials used in steel furnaces covering the past nine years is shown in the following table: —

Pig-Iron, Scrap Iron, and other Materials Charged to Steel Furnaces.

(In short tons.)

Year.	Pig-iron.	Ferro- alloys.	Scrap Iron and Steel.	Iron Ore.	Manganese Ore.	Fluorspar.	Limestone and Dolomite.
