## CALVES AND BABY BEEF

Baby beef is the highly finished product that sells for the highest figure because the muscles, tendons and tissues are not hardened by age and use.

It is tender and juicy, like a sappy, young tree.

It costs, on the average, about 3c to make 1 lb. of gain at one year, and about 7c. at two years, and so on, because the digestive powers are more energetic in younger than in older stock.

There should be no let up in feeding the 365 days of the year.

### Clydesdale Stock Food

can be fed with the greatest benefit to calves, especially with Separator Milk, as it takes the place of the extracted butter fats.

It prevents "scours," therefore, there is no "let up" in growth.

It has the bone and muscle producing ingredients that helps to build a frame on which to put the tender flesh quickly, and, at a profit.

Nothing injurious in it, and can stop feeding it without harmful effects. Human beings can take it with benefit. We take it every day.

Your money cheerfully refunded by the dealer if any Clydesdale Preparations do not give satisfaction.
