"Eggs" is Growing

In our issue of March 1 we opened up our "Eggs" Department a full two weeks earlier than we opened it a year ago. This department is growing and we hope to see it soon occupy one or two full columns. The poultry section of the Farmers' Market Place is "going strong" this year. This is partly due to a good early demand for breeding stock, eggs for hatching and baby chicks, partly to the fact that The Guide has had the exclusive editorial services of Prof. Hermer, of Manitoba Agricultural College this winter, and has thus encouraged, by the best of editorial matter, the careful consideration of good farm poultry, and partly because The Guide has always featured the classified page as the farmers' own special department for buying and selling.

A Chance For Breeders

Breeders of good poultry and with breeding stock or eggs for sale, have here an exceptional opportunity. The educational work for good poultry has been done. The time is ripe and in this place—the Farmers' Market Place—you get maximum service at minimum cost, because The Guide has a larger circulation than any other farm journal in Western Canada, and at the same time a lower advertising rate in proportion to paid circulation.

Do not forget also that The Guide can offer you good service also for anything else you may have to sell. The departments for Seed Grain, Potatoes, Horses, Cattle, Sheep, Swine, Farm Lands, Farm Machinery, etc., all offer opportunities. The Guide has "proved up" on every one of them.

Advertising rates are given at the top of this page. Send in your order now accompanied by the amount for the number of times you wish your ad. to run, and let The Guide demonstrate to you, as it has to hundreds of other farmers, how it can sell.
