"Twas but a rusty little nail,
And on it hangs this tale,
For on it some one caught and tore
The pretty new frock that she wore,

### MANAGING HUSBANDS.

Most quaint is some of the advice to

Some Eighteenth Century Ideas on This Interesting Subject.

vomen contained in an old book published in 1737. The volume describes itself as "an infallible Guide to the Fair Sex. containing Rules, Directions, and Observations for their Conduct and Behaviour through all Ages and Circumstances of life; as Virgins, Wives, or Widows, with Directions how to obtain all Useful and Fashionable Accomplishments suitable to the Sex." If the lady's husband was choleric she was told how to secure her own way by dexterously "yielding everything till he be-gins to cool, and then by slow degrees she may rise and gain upon the Man," or "when other Remedies are too weak, a little Flattery may be admitted, which, by being necessary, will cease to be criminal." With a covetous husband, pride, ambition, vanity, anger kindness or even a dose of wine may b expected to open or enlarge his narrow Mind." "The wife's business must be to watch for critical moments, and not let one of them slip without mak-ing her advantage of it." And a wife may be said "to want skill if by these means she is not able to secure herself n Good Measure against the inconvenlences this sourcy Quality in her husband might bring upon her." All the frailties of poor, erring husbands are here set forth, singly, in plain, unmistakable language, neatly docketed, each with the recipe for cure appended

There are other interesting passages in the same book. Of spinsters the author says: "An old maid is now thought such a curse as no poetic fury can exceed, looked on as the most calamitous creature in nature. Modesty and Obedience, though necessary to all, are yet in a more eminent degree required Their Look, their Speech, their whole Behaviour, should own a hum-ble distrust of themselves." Concern-ing amusements this: "The reading of Romances seems now to be thought the peculiar and only becoming Study of young Ladies. It must be confessed their Youth may a little adapt it to them when they were children, and we wish they were always in their

event as harmless."

Of another vanity: "There is also anof another value, There is also another great devourer of Time—we mean Dressing. Sure 'tis allowable upon a soberer account that those who design Marriage should give themselves the advantage of decent Ornaments and not by the negligent Rudeness of their Dress bely Nature and render themselves less amiable than she has made them. But, all this being granted, twill by no means justify that excessive Curiosity and Solicitude, that Experiments of the state of the sta pense of Time and Money, too, which is more used."

# Hallam's Portrait.

Of a recently published portrait of Arthur Hallam, immortalized by Ten-Arthur Hallam, immortanzed by remyson's "in Memorian," a writer says:
"It dates from the prephotographic days, of course, but it does not show signs of the flattery so common in portraits of that time. The face that bore those 'azure orbits heavenly wise,' those 'ethereal eyes,' is pictured as those ethereal eyes, is pictured at a somewhat heavy youth. This head was Tennyson's hostage to heaven throughout the stress of philosophic doubt and was so half a century later, when the aged poet died in the faith that his boy friend was 'not dead, but

determination with which few people save those who know her intimately, are disposed to credit her. And she usually manages to get her way. Thus she has just won a quiet though signal victory over the new Liberal adminis-tration, says the Marquise de Fonte-

When the new Ministers came into office a few weeks ago they took it for granted that the Duchess of Buccleuch, whose husband is a great Tory magnate would, in accordance with the custom would, in accordance with the custom that prevailed during the three score years or more of Queen Victoria's reign, resign her office of mistress of the robes to the Queen, which is the highest reminine dignity at court and carries with it the control of all of the Queen's ladies in waiting, and indeed of the entire feminine porton of the royal household.

In fact, they were discussing among

themselves as to which Liberal peeress they would nominate as successor to they would nominate as successor to the Duchess, when Queen Alexandra suddenly but quietly intimated that under no circumstances would she part with the Duchess of Buccleuch, and that she intended to retain her in office as mistress of the robes, no matter what administration happens to be in power. be in power.

There were some who, on receiving There were some who, on receiving this news, imagined that the so-called "bed chamber" question, "which gave rise to a ministerial crisis in the third year of Queen Victoria's reign, was about to recur. When Sir Robert Peel in 1839 was summoned to form a Cabinet he demanded that Victoria should demice her migratures of the robes and dismiss her mistress of the robes and her ladies in waiting, who were all of them the wives or sisters of his most bitter political foes. To this the Queen refused to consent, and Sir Robert Peel and his Cabinet thereupon tender

Acted in Good Faith.

Woodstock, March 3.—Mrs. John Cook, formerly the wife of Peter Bradt, now of Otterville, who was arrested in a Michigan Central train at Windsor last Thursday, charged with the abduction of her eight-year-old boy, was acquitted by Judge Finkle yesterday morning. His honor held that the woman acted in good faith, belleving that she had a right to the child under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved, and under the decree of divorce, which, however, had not been sufficiently proved and under the decree of divorce, which however, had not been sufficiently proved the control of the Earl of Angus forms the theme of Sir Walter Scott's "Lay of the Last Minstrel." It was his descendant, Ann, Coun-

of Sir Watter Scotts "Lay of the Last Minstrel."

It was his descendant, Ann, Countess of Buccleuch in her dwn right, the greatest heiress of her time, who married King Charles II.'s, son by Lucy Walters. This son at the time bore the title of Duke of Monmouth. But on his marriage he assumed his wife's patronymic of Scott and was created Duke of Buccleuch.

The duchess survived her busband's death on the scalifold—he was coademned for high treason in heading an abortive insurrection against his unclay.

King James II.—for nearly forty years, and on her demise her grandson, Francis Scott, succeeded her as second Duke of Buccleuch.

Duke of Buccleuch.

One of the reasons which led the Duke of Monmouth and of Buccleuch to head the rebellion again. In suncle, King James II., was that he was convinced that his mother, Lucy Walters, had been lawfully married to King Charles, and that he, the duke, therefore were his father's locality interesting. fore was his father's legitimate instead of his natural son, and consequently invested with the rights to the suc-cession of his father's crown prior and superior to those of his uncle

King James H.
That there was justification for this belief is shown by the fact that until about fifty years ago there was pre-served in the archives of the house of Buccleuch a document affirming, un-der the hand and seal of King Charles II., that he had been lawfully married to Lucy Walters, and that the ill fated first Duke of Buccleuch and of Mon mouth was therefore his legitimate

mouth was therefore his legitimate son and heir.

The late Duke of Buccleuch, as a loyal subject of the house of Hanover, decided that this document ought to be turned over to Queen Victoria. This was done and the late prince consort consigned the paper to the flames. Of course, if the document had remained in existence it would not have affected in any way the rights of Queen Victoria or of King Edward to the throne of ia or of King Edward to the throne of Great Britain. Their respective succession thereto and possession thereof are based on the so-called act of settlement passed by Parliament 205 years ago, which by a narrow majority of one vote, cast by Sir Hugh Owen, vested the throne of Great Britain and Ireland in the Hanoverian descendants of King James I., barring therefrom the less remote descendants of his son, King Charles I., now represented by Princess Louise of Bavaria and by Great Britain. Their respective suc by Princess Louise of Bavaria and by

her son, Prince Rupert.
Still, at the same time, it was a loyal
thing of the late Duke of Buccleuch to
do to sacrifice this document, testifying under the hand and seal of King Charles II. that he, the duke, was descended in a straight line from a legitimate instead of from a natural son of a British monarch, and that the bar sinister has unjustly been placed on the armorial bearings of his house.
