THE HUMAN BO ELECTRIC BAITIBR

Startling New Discoveries Prove Beyond All Doubt That "Electricity Is Life."

Men of Science Demonstrate the Value of Electricity as a Cure for Disease.

Remarkable New Invention Meets With Great Success

That the human body is electrical is no longer a mere theory among scientists and up-to-date physicians. It is generally conceded to be an absolute fact.

Professor Edgar L Larkin, discussing the new physiciology, writes as follows:

"A man, brain and body, is a battery, and nerves correspond to whres. It is now certain that transmission of sensation over them is electric. Nerves have been cut and a galvonometer inserted. The needle moved, proving that nerve power is electric. The human system is an electro-chemic battery and the life principle is electrical. The electric and in the life principle is electrical. The electric age is here. Drugs are hard hit on all sides, and an intelligent physician tells me he has almost entirely stopped their use. The word health now means a normal supply of electricity in the body, and the word disease means an insufficiency of that power."

Dr. Albert J. Atkins, the eminent California scientist, is still at work proving that every principle in what we call our electrical science is merely borrowed from the human body. We propel railroad trains and automobiles by means of electricity and think it wonderful, but the human dynamo has always known how to propel itself, and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost absolute safety in either walk-and with skill and almost a Professor Edgar L, Larkin, discussing the new physiology, writes as follows:

"A man, brain and body, is a battery, and nerves correspond to wires. It is now certain that transmission of sensation over them is electric. Nerves have been cut and a galvonometer inserted. The needle moved, proving that nerve power is electric. The human system is an electro-chemic battery and the life principle is electrical. The electric age is here. Drugs are hard hit on all sides, and an intelligent physician tells me he has almost entirely stopped their use. The word health now means a normal supply of electricity in the body, and the word disease means an insufficiency of that power."

Dr. Albert J. Atkins, the eminent California scientist, is still at work proving that every principle in what we call our electrical science is merely borrowed from the human body. We propel railroad trains and automobiles by means of electricity and think it wonderful, but the human dynamo has always known how to propel itself, and with skill and almost absolute safety in either walking or running, and now Dr. Atkins shows us that the millionaire in his automobile and the hobo on foot are alike carried forward by electrical force.

"It demonstrates that the human body is an electric battery."

"The experiment consisted in the swallowing of two

"It demonstrates that the human body is an exterior battery."
"The experiment consisted in the swallowing of two platinum electrodes, so that they touched the walls of the living stomach.
"By means of copper wires the electrodes were connected with a telephone and microphone, a sensitive instrument which greatly intensifies sound.
"There was absolutely no mechanical or chemical hattery in the circuit, yet the moment the electrodes were swallowed sufficiently to touch the walls of the stomach, human electricity flowed over the wires, rendering audible sounds. The electric charge measured from seven to eight volts on a western galvonometer."

Finds Cure for Appendi-

Dr. Harvey Archibald, of New York City, has discovered that appendicitis yields to the action of electricity pretty nearly as mists are dissipated by the sun. When a case of appendicitis comes into Dr. Archibald's Office, the physician trains the powerfully penetrating electric ray upon the sore spot. Right away the swelling goes down and the excruciating pain stops short. And after five or six days, Dr. Archibald says, the cure is always complete.

Electricity the Basis of Human Vitality

Professor Jacques Loeb, after ten years' research and experiment, made this statement:
"A part of the chemical energy of foodstuffs
is transformed into electrical energy, which in turn
gives energy to the muscles and organs of the
body. Electricity, and not heat, is the life of the
body. These discoveries are going to upset the
theories of medicine as administered by the physicians of today, as it is settled that electricity is
the basis of human vitality."

The new cure is nothing more or less than the process of bombarding the congestion about the appendix with electric rays and a high-frequency current. The treatment causes the blood to return to the central circulation system, the congestion departs for the simple reason that the cause of the congestion has been removed—and that's the end of the appendicitis.

Keeps Old Age at Bay

"Electricity will restore elasticity and buoyancy of youth." declares a famous New York physician, writing in the Medical Times.

"No matter how old a man may be nor how young in years, whenever his arteries begin to harden, to resist the increased pressure of the blood, then he actually is old. Then the electric treatment must be applied, and after a few times nature takes up the work and carries it on, and the patient gets young again—or at least he is able to resist the encroachments of old age.

"By electric stimulus the system is energized, the blood made to circulate equally, the digestion aided, the waste products stimulated, the repair tissues are assisted, and the normal working of the bodily functions restored."

Electricity Will Supersede Drugs

I maintain that electricity is the power which runs the human body—the force that keeps the heart going, the blood circulating and the various organs performing their functions like so many machines. I claim that electricity works the miracle of digestion and assimilation, and converts the food into blood and bone, tissue tion, and converts the food into blood and bone, tissue the nuscle, and supplies the brain with power to think. I have had my theories confirmed by the world's most learned scientists, and today the use of electricity as a curative agent is spreading to every corner of the civilized world.

While others were speculating and arguing over the

as a curative agent is spreading to every corner of the civilized world.

While others were speculating and arguing over the merits of electric treatment, I have gone ahead achieving results, and I can point with pride to men and women in all walks of life who regained their health and strength through the use of my Electric Body Battery.

Before I talk further regarding the use of my appliance, you must understand that the human body is an electric organism, deriving its motive power from the electric organism, deriving its motive power from the electric organism, deriving its amount of the electric force digestion of food in the stomach is taken up by the nerves and generated in the stomach is taken up by the nerves and conveyed to the different organs of the body, and is their life. So long as there is sufficient electric energy to satisfy the demands of nature, the vital organs perform their regular functions properly, but just as soon as the hatural electric force is overtaxed in any way, the organs become weak and inactive and sickness or disease is the result. Now, you can't cure the trouble until you restore the lost force. Nature must have more electricity, or vitality, as it is termed by medical men, in the alling

The Product of Experience

I have devoted years to the perfection of my appliance. I have removed defects as fast as they appeared in actual use, and have supplied new features from time to time, so that my appliance is in a class by itself

arm.

Compared with mine, all other electric body appliances are products of the blacksmith's hammer. Compared with mine, all other electric body appliances are products of the blacksmith's hammer.

It is not upon this point however, that my success has been founded. My immense business is due to my knowledge of the effect of electricity upon the aliments to be treated and the best way to obtain that effect.

I study the case of every sufferer who comes to me, and explain how the application of my appliance may be suited to the demands of each particular case. When you consider that electricity is life to the organs into which my appliance sends it, you can see how we get our results. My success is due to the cures effected by my appliance. If it did not cure, my business would have died out long ago.

When I say that my appliance cures, I don't ask you to accept my word alone as evidence. I can refer you to people who got back their health through the use of my appliance, and they will tell you what it did for them.

Here Is Proof

Rheumatism quickly removed. Electricity dissolves the acid and strengthens the kidneys.

Fergus, Ont.

Dear Sir.—I have worn your Electric Belt for three months, and can say that it has cured me completely. I was in misery every day and wished I was dead, till I got your belt. I felt the good of it the first night. I had suffered with Rheumatism for ten years. Before I got your Belt I could hardly eat anything, and now I can eat a good big meal three or four times a day. I can recommend your Belt to anyone suffering from Rheumatism. Yours truly,

MY BELT IS A BLESSING.

Yours truly,

MY BELT IS A BLESSING.

Chatsworth. Ont.

Dear Sir.—Your Belt has worked wonders with my back. It was very bad, but it seems quite strong now, and my general health is built up again in these few months far beyond my best expectations. In short, I count your Belt a heaven-sent blessing to me and my family. I cannot recommend it too strongly, as I shall feel it my bounden duty as well as my greatest pleasure. THOS. JORDISON. Yours truly,

Yours truly,

THOS. JORDISON.

149 Front Street, Sarnia, Ont.

Dear Sir.—I wrote you some time ago that I was perfectly satisfied with your Belt, as I am now as well as any man of my age could expect to be. I thank you for the interest you have taken in the matter. Yours very truly.

Mr. Thos. C. Morton, 75 Cameron street, Windsor, Ont., says: "Before I used your Belt, three or four years ago I was unable to walk, but it improved me so much that I had no difficulty to walk after using it for some time, and my advice to all sufferers is to use one of your Electric Belts. No doctors; no drugs; just one solid comfort. I hope your good work will be kept up."

MADE LIFE WORTH LIVING.

Appleby, Ont.

MADE LIFE WORTH LIVING.

Appleby, Ont.

Appleby, Ont.

Dear Sir,—I am pleased to say that your Belt has done me a lot of good. At the time I sent for it I was feeling wretched and low-spirited, but now life is worth living, and I am feeling in excellent spirits. Your Belt will do all you promise, and it is so easy to adjust that a child could manage it. I wish you success in your business, and hope that people suffering from general system, and take advantage of your great remedy general system, and take advantage of your great remedy and thereby gain health, which is a priceless treasure. I shall be pleased to answer any inquiries you may refer to me. Yours truly.

Originals of above waterments can be seen at my Originals of above waterments can be seen at my

Copies of these and hundreds of others, together with an 84-page book and hundreds of others, together with an 84-page book telling all about this home electric treatment by my body telling all about this home electric treatment by my body telling all about the formula of the formula

Health Without Drugging

M. d'Arsonval, a well-known savant of the Physiological Institute, of Paris, in an address at the Institute, said that electricity would be the medicine of the future. He showed that it is excellent for certain maladies, and described the difference between sudden shocks and the slow method by which it pervades the system without the patient's consciousness.

Electricity Is Nature's Medicine

ement:
"The only difference between a well man and an in-

MEANS A NORMAL SUPPLY OF ELECTRICITY IN THE BODY, AND THE DISEASE MEANS AN IN-SUFFICIENCY OF THAT POWER." — Professor Edar

PROF. E.L. LARKIN alld is that the invalid is not producing enough

valid is that the invalid is not producing enough electric power to run the functions of his body and keep the vital organs up to the necessities of life."

"With some 200 scientific experiments from recognized scientists it has been conclusively proved that this power is electricity; that by understanding the laws governing the production and control of electricity in life, any human can cure himself in a few weeks, can increase his working capacity, can increase his vitality to the point of having an overflow of happiness and joy, and also that any person feeble from age, may in the same way reinvigorate himself.

"When one falls into any form of disease, he simply does not produce as much electricity in his body as when well. We see, too, that age is just like a chrenic disease, that one begins from ignorance of the laws of electric production to gradually decrease his generation of electric try until he finally reaches the point where he does not produce enough to keep his vital organs running. This means death. The same amount of electricity in a man of 70 would make the same power as the same amount of electricity in a man of 30. This proves the prolonging of life a scientific matter of keeping the production of electricity up to the normal needs of the body."

Many people believe that when a drug give

With Power Furnished by

it is doing good. That's a big mistake. Drugs can only give temporary relief, and it is always at the expense of the nerves and vital organs.

If you have a pain or an aliment of any kind, you don't want to fool yourself into the belief that you are getting well when you are not. That's all you do when you dose yourself with drugs.

It is easy enough to stop a pain by stupefying the nerves with poisonous dope, but the pain will return as soon as the stupor passes off. You can force a weak organ to act by giving it a powerful stimulant, but you can't restore its natural strength that way, and it will be weaker than ever when the drug stops working.

That is why temporary relief is dangerous. Drugs do not remove the cause of disease, and every minute that they give relief the disease is getting a firmer hold upon your system. As long as the cause remains the trouble stays there and the only way to get rid of it is to assist nature. Nature wants strength, vitality, power to fight disease and drive it out, not poisons which only make it worse.

Electricity is nature's medicine, and the proper use

to fight disease and drive it out, not poisons which only make it worse.

Electricity is nature's medicine, and the proper use or it will restore you to perfect health.

Disease always results when you break nature's laws. If you continually overwork your stomach you will-have stomach trouble. If you abuse any ergan of your body you must suffer for it afterward. Then the real cause of disease is due to the weakness or inactivity of some part of the body machinery. The reason any organ breaks down or fails to work properly is because it has not enough vitality to withstand the strain when it is overtaxed. This vitality is nothing more than electricity, the motive power of the human body. Now, to cure the disease, you must renew the vitality or electricity of the part that causes the trouble. When this is done the disease cannot exist, for the cause is removed.

Electricity for Weak Nerves

A great many people suffer from allments caused by weak, impoverished nerves, and try to cure these troubles by dosing their stomachs with drugs. It is impossible. Drugs are poisons, and poisons wreck the nerves. If you are weak, run down, nervous and unambitious; if you suffer frequent headaches, and have spells of despondency, it means that your nerves are starving for new energy, electricity. That's all they need, and nothing else will restore them.

My appliance saturates the nerves and vitals with electric life while you sleep. It builds up strength and vitality in every weakened organ and drives out pains and aches.

If there was any nourishment in drugs, they might do some good, but you know there, is not. Drugs are drugs, stimulants, narcotics, antidotes, poisons, not food. Electricity is nerve food—nerve life. It soaks into the nerves, and is taken up by them just as a sponge absorbs water. It nourishes and vitalizes the parts which

Restoring the Buoyancy

Youth by Electric

drugs cannot reach. you put into your stomach weakens your nerves. Every time you kill a pain or an ache by stupefying the acreves with poisonous drugs, you are hurting them, and pletely broken down. You know that rheuma-tism is caused by uric acid in the blood. There's only one thing on earth that can get at this uric acid and drive it of your system-that's

out of your system—that's electricity. It soaks 'into every vein and tissue of the body and drives the polsonous matter through the circulation, back to the kidneys, which filter the blood of all impurities, has cured some of the worst My electrical appliance cases of rheumatism after drugs and other n nust go out.

No pain can exist in a body charged with electric life

Men Made Young at

Sixty

ing about pains in the back, stiffness in the shoulders and legs, and "tired feeling," nervou ness, indigestion, con stipation and failure of vitality. Nature started you with a constitution that ought to have held good until you are 80, and you ought to feel like a man now. But you have overdone some things and wasted your vitality. You still have the constitution, but lack the force. That is electricity. My appliance will restore it,

Look at the men who have used electricity and you will see men of force, men of power and confidence, men who respect themselves and are respected and admire by their fellowmen.

Wouldn't you like to be the man you were a few year ago; to have the same ambitious spirit, the strength and vitality that you used to possess? Wouldn't you like to vitality that you used to possess? Wouldn't you like to be free from pains and aches, and to feel that you are the equal in strength of any man of your age? You can be.

All that you lack is vitality—new life. You are like an engine without steam—you haven't the motive power to keep the machinery of your body working properly. Anything that will restore your "steam" will make a new man of you. Drugs have been tried and have failed. You know that my appliance will not fail; it is electricity, and "electricity is life." That is what you require, and the proper use of this grand appliance will give you health and happiness.

Woman Saved From **Dangerous Operation**

A large percentage of women's allments are so perplexing that operations are often recommended by physicialis. Such operations are not only dangerous, but they sometimes cause serious complications. Thousands of women are uselessly butchered who could be cured by electricity in the privacy of their own homes. In most cases all such women need is new strength, more vitality and nerve force. When the organs of the

body are denied the vitality necessary to perform their proper functions, inactivity and disease result.

My appliance renews the activity of the weak organs and builds up vitality and strength where it is needed by infusing the body with a glowing current of electric life.

Why My Appliance Cures

A party asked the other day why it is that faradi-utteries and static machines do not give such results my electric body appliance.

as my electric body appliance.

That's because you can't stand the treatment for more than a few minutes at a time. A nervous person can't endure it that long on account of the shock. When a marries that method and finds that it does not help him, he naturally concludes that electricity is no good.

Now, my system is different. With my plan a current is sent into the body for six or eight hours every day or night, usually while the patient sleeps.

night, usually while the patient sleeps.

The delicate nerves are not jarrel or shocked by this current, as it goes into them like a drizzling rain saturates a newly-plowed field. They absorb it, drink it in, and as it is their very life, they grow strong with it.

Poor digestion, inactive liver, constipation, sluggish heart, slow thinking, dormant energy and laziness are all due to lack of electricity. Understard that electricity is the motive power of the human machine, the power that keeps the organs active, and you will see what we mean. In such cases you will see how my appliance will put energy into the body. It renews the electric life of the nerves, and transforms the sluggard into a bundle of vigorous energy.

nerves, and transforms the sluggard into a bundle of vigorous energy.

Because you have experimented with faradic batteries and belts, or taken electric treatment from physicians without being cured, is no reason why my methods should prove a failure. The dector's battery can only be applied for a few minutes at a time, and that is not enough to effect a cure. Besides, that method is inconvenient and expensive. My appliance can be used all day or all night without interfering with your work or rest. It takes up none of your time.

Prejudice Against Advertised Treatments

There is a whole lot of prejudice against advertising remedies, due no doubt to the large number of quachs and schemers that have foisted worthless treatments on the public during the last few years.

If it were not for this prejudice I would not be able to handle all the business that would come to me. The many fake electric beits and so-called "vitalizers" advertised by charlatans have made many people skeptical; bit I know that I have a good thing and will hammer away until everybody knows it.

Any organ of the body, any part that lacks the necessary vitality to do its work as nature intended, can be restored by this electric treatment.

It gives strength: it makes the blood rich and warm; it vitalizes the nerves and puts vim into the brain and muscles; it just makes a good man out of a bad one in every way.

My appliance cures rheumatism in fits worst forms. It cures pains and aches, weak nerves, general debility and any other trouble which can be cured by restoring the life force.

No matter where you live, you can use my appliance as successfully as if you could come here to my office.

Books Worth \$2.00 Free

To any man or woman who will mail me this coupen will send free (closely sealed) my finely illustrated books regarding the cause and cure of diseases. These books are written in plain language and explain many secrets you should know. One especially for men; another for women; 34 pages.

Don't spend another cent on doctors and their worthless medicines.

Electricity cures to stay cured. You should know about it.

about it.

Don't wait another minute.

Cut out this coupon right now, and mail it. I send the book without delay, absolutely free.
