THE AMALGAMATED PREMIERS

The self appointed conference held at liberations. It is common rumor, how ever, that certain resolutions were sketched out which are to be submitted to the proform the basis of a grand attack upon the federal arrangement as it now exists. The issues that will thus be raised will be in the nature of a revision of the plan of Confederation, the object being to place the Domision in a position of marked interpretation.

The provinces of their approval, to does not merely apply to farmers here, but if the majority of the United States be assued that will thus be raised will be in the majority of the United States be assued that will thus be raised will be in the majority of the United States be assued to paying the car conductor, who, in turn possible that farm produce the feed, it is not improbable that farm produce will look up. To get a true grasp you must look along the whole line of produce. chief It mov s on the lines of local su-

LARORING BY NIGHT.

unning trains at night was not thought of, and cannot easily do so: - While physical In the early days of rafi ays the idea of but at the present time the greater part of conditions largely enter into perfect sleep, the freight traffic and perhaps of the rassenger traffic is handled in the hours of conditions. The due value of proper darkness. A similar change seems to have food, exercise and bathing are more or less been begun in the work of railway build. ing. The rush of competition between specific rule can be given. A warm bath great lines to reach given points and the necessity sometimes imposed of building a certain distance before a fixed date in order to secure local aid have necessitated the employment of the night hours in numerous cases, and it is found that men and teams work fully as efficiently by night as by day. An American contractor who has been doing a large amount of grading on one of the western roads says that he finds that the men accomplish more Letween 7 p. m. and 7 a. m. in shoveling than in the same hours of daylight, because their attention is not desired. great lines to reach given points and the same hours of daylight, because their attention is not detracted by other things at magic about this that is truly wonderful. Many actresses use this simple ald, after returning from an exciting play, and the result can only be described as magical. That the sleeping apartment should be unnatural inversion of the hours of work and sleep, and some of them are inclined to fully drawn, is an important essential to any work people. If the victim of insommia waste the daylight hours in drinking, and thus are unfitted for night toil; but these worthless fellows are gradually sifted out and the force engaged in the night work soon accomplishes fully as much as those bandage outside, there are few cases of insomnia that may not be thus owners. who work only by daylight. The employment of the night hours has made possible some of the extraordinarily rapid railway construction which has characterized the last year or two.

THE FARMING SITUATION.

If we are to believe reports from the going to be a plethora of natural productions, in cereals and the general productions of the farm. Somehow or other there has been a general subsidence of farm productions on account of a kind of drought Quebec, at which Mr. Mercier and Mr. which has prevailed during the present Mowat were the principal figures, has not season in this and several other countries. yet given to the public the results of its de The agricultural situation may be summed up briefly:-That the general drought has diminished one of the natural feriority to the Provinces. Such a scheme must look along the whole line of producwould be evidently fraught with great misstraightens his eyes to this telescopic view cited so much attention, is not the brother Memacy, which by enfeebling the Do. in the world's producers will win. Pork of the Emperor Alexander, as seems to be

The Boston Traveller furnishes the fold owing hints to those who want to sleep just before retiring will be found to many

The San Francisco Examiner enumerate ome of the odd ways of the celestials: "Chinamen have a habit of storing forty of fifty cents in ten-cent pieces in their ears, to save, no doubt, the trouble of feeling in their pockets for such small change. Another curious thing in connection with the various parts of the world, there is not Chinese is their custom of putting coins of various denominations in the mouths of the dead. These coins fall into the hands of the coolies, who scrape the bones of the disinterred bodies, and through them pass into general circulation. It is said that a into general circulation. It is said that a \$50 gold sing was found in the mouth of a Culness body disinterred at the Chinese cemetery recently, while it is a frequent occurrence to find gold \$5 and \$10 pieces. Taking into consideration the foregoing facts, it is, indeed, an unsafe habit to pur money in one's mouth, especially when it is not known whether the Chinamen ever cleaned his sar or whather the decased died. ever, that certain resolutions were sketched out which are to be submitted to the pro-tincial legislatures for their approval, to does not merely apply to farmers here, but

"The Grand Duke Nicholas of Russia say London Truth, "who has recently exminion would diminish its opportunities and hexard its credit. So far the existing will be above the present quotations. The generally supposed, but a cousin of His and hexard its credit. So far the existing will be above the present quotations. the Grand Duke Michael Nicolalevitch, and his mother is the sister of the Grand Duke of Baden and the Duchess of Saxe Coburg. Gotha, while his sister is married to the Grand Duke of Mecklenburg. Schwerin. The Grand Duke's reported outburst was considered the more remarkable inasmuch as he belongs to a branch of the Romanoff family which has always been regarded as being most thoroughly aturated with German sympathy and predudices."

One form of Japanese industry seems The Great comed to extinction—namely, the making ! bamboo frames. Paragon wire is now aported as a substitute. The old Japane bamboo frame and oll paper umbrells fast going out of use, even in the coun-r districts, and there is a brisk and owing manufacture of umbrellas and rasols of the European fashiou, not only home consumption in Japan, but also export to China, the Straits Settle-nts and other places. The Japanese are ewd enough to discover the things in ich they cannot compete with Europe, sy now import wire nails instead of 1-rod iron.

or. Langer, primsrarzt, of the great of Pants at \$1.50 per pair. nna Hospital, after a somewhat unasant interview with Prof. Boehm, the k a large dose of morphia, with the intion apparently of committing suicide. was, however, promptly treated by the formance of tracheotomy and the chanical inflation of the lungs through

chanical indistion of the lungs through the opening. By this means his life was saved. Dr. Langer, who is greatly respected, has been for some time past subject to melancholia. The severity of the weather in Germany luring the middle of October is testified by

the fact that at Carlsruhe, Crefeld, and other places, men sleeping in the open air have been frozen to death. Such a thing has never been known in Germany so early in the season in the memory of the oldest inhabitant. In the Raeingau almost all standing water was covered with ice, and the frost did a great deal of harm in the vineyards there, especially in the low lying grounds.

sight, of hearing, the human voice, the mindone or more, and sometimes all, yield to its de,
structive influence. The poison it distributes
throughout the system attacks every vital force
and breaks up the most rebust of constitutions.
Igeored, because but little understood, by most
physicians, limotently assailed by quacks and
charistans, those suffering from it have little
hope to be relieved of it this side of the trave.
It is time, then, that the popular treatment of
this terrible disease by remedies within the
reach of all passed into hands at once competent
and trustworthy. The new and hitherto untried
method adopted by Dr Sanford in the pre-wation of his Radical Curk has won the hearty the people at the instance of the amalgamated local premiers. They had no authority from the legislative assemblies to get up any such scheme; no "grievances' seeking abatement had been formulated. The entire plan of campaign is little else than a scheme to make mischief in the hope of being able amid the trouble which is which has already occupied too much time and trustworthy. The new and atherto untried method adopted by Dr Sanford in the preparation of his Radical Curz has won the hearty approval of thousands.
