Complaint from G. T. E. Employes.

The employes connected with the freight department of the Grand Trunk railway complain seriously of the recent change made by order of Mr. Holton in continuing the running of freight trains through from Toronto to York, instead of stopping over as heretofore in Toronto. The drivers complain of having to put in extra hours after having already in many cases been on prolonged duty. Those who have been for a long time in the employ of the company state that promises have been made to them from time to time that no future changes should be made in the terminal points of their run but, notwithstanding these promises, when any change has been made they have been called upon to fulfill the extra duty, thereby imposed. The changes made by the removal from Bradford and Stratford materially affected the interests of those employes who had homes at those stations, and the present move will also increase their hours of labor and have them away from home when their work is done.
