EACH PROVINCE, ALPHABETICALLY ARRANGED, WILL BE  
COMPLETE IN ITSELF.

*Royal 8vo. size. All the volumes to be bound uniform in full Cloth, Gilt.*

The object of the work is to give, from the lips of the oldest inhabitants, or from other sources, a history of over 10,000 counties, districts, parishes, townships, cities, towns and villages, with descriptions of more than 3,000 islands, lakes and rivers, in the Dominion of Canada.

JOHN LOVELL, *Publisher.*

MONTREAL, Oct., 1889.

**Alden's Manifold Cyclopedia.**

America and Artemis are the beginning and ending of the second volume of Alden's Manifold Cyclopedia, which, even better than the first, fulfils the promises of the publisher's prospectus. It is a really handsome volume of 640 pages, half Morocco binding, large type, profusely illustrated, and yet sold for the price of 85 cents; cloth binding only 60 cents—postpaid. Large discounts even from these prices are allowed to early subscribers, the price being gradually advanced as the work progresses; particulars sent on request.

The Manifold Cyclopedia is, in many ways, unlike any other Cyclopedia. It undertakes to present a survey of the entire circle of knowledge, whether of WORDS or of THINGS, thus combining the characteristics of a Cyclopedia and a Dictionary, including in its vocabulary every word which has any claim to a place in the English language. Its form of publication is as unique as its plan—the "Ideal Edition" its publisher calls it, and the popular verdict seems to sustain his claim. It certainly is delightfully convenient. It will not be strange if this proves to be the great popular cyclopedia. It certainly is worthy of examination by all searchers after knowledge. The publisher sends a specimen volume on receipt of price, to be returned if not wanted. JOHN B. ALDEN, Publisher, New York, Chicag, or Atlanta.

**READY, RAPID & RELIABLE FIRE ESCAPE.**

The Best, Safest and Quickest Means of Emptying School and other Dormitories in Case of Fire.

The accompanying cut exhibits the essential features of the contrivance, which may be adapted either to the interior or to the exterior of a building, but preferably to the latter, so as to create no draught for flame or smoke. *C c* represent the floor, or, as in the present diagram, platforms, which may assume the form of an ornamental balcony. These platforms are secured to the walls by suitable brackets *e e*. Two vertical shafts *f f* pass through the

floors or staging from the roof to the ground; *g g* are circular openings which alternate from one side to the other at each succeeding landing. The landing to be placed before a window at every story.

The shaft to the left of *f*, and which is secured to the next platform above (not shown in the figure), is firmly clasped, not with the hands, but with the legs and arms, and the person slides down the shaft to the next landing below, regulating with ease, by the pressure of his limbs, the rapidity of the descent.

Inventor and Patentee,  
**Rev. ARTHUR JONES,**  
St. Mary's College, MONTREAL.
