

## THE BOOK PAGE

Books for review to be sent to the EDITORS OF THE TEACHERS MONTHLY, Room 87, Confederation Life Building, Toronto.

From the Upper Canada Tract Society, Toronto, we have received Dr. Denney's **The Atonement and the Modern Mind** (117 pages, 75c.). This is a book for the professional student. Its purpose may be briefly stated thus: Scientific progress, certain movements in philosophy, and devotion to historical study have given rise to opinions which hinder men from accepting the scriptural view of Christ's death. Dr. Denney demonstrates that these opinions are not well grounded. But there are two demands of the modern mind which a true explanation of Christ's death should satisfy. It should interpret the church's experience of redemption from sin; and it should exhibit the death of Christ as a power to regenerate men. Is there such an explanation? Dr. Denney thinks there is. And he sets it forth with great force and cogency.

Rev. Jas. S. Gale knows Korea as perhaps no other man; that is, he knows it from the inside. He has lived among its people for many years, has conquered their language so as to be an authority upon it, has wrestled with their religious beliefs and customs, has seen the people in their uprisings against the Government and in the Japanese invasion, in one word has lived their life. They amuse him; sometimes they seem to puzzle him; always he loves them. Add to this his rare skill as a writer, and one expects in **The**

**Vanguard, A Tale of Korea** (Fleming H. Revell Company, Toronto, 320 pages, \$1.50) a book of unusual interest. He is not disappointed. The Dragon, the servant of Willis, the young American missionary, who is the hero of the story; Ko the wife-thief and gambler, and afterwards so keen in winning souls; are but two of the many characters portrayed with the hand of a master, not to mention the various types of missionaries and other foreigners who are made to live before us. Mr. Gale's penetrating wit, his power of sarcasm, at times caustic, never ill-natured, his mastery of mission methods, and withal his genuinely earnest and evangelical spirit, have united to produce a memorable book. The long and steadfast waiting of Willis for the "tall, stately girl, beautiful and brave," and the happy ending of it all give the finishing touch of romance to the narrative. Readers of **East and West** will recall Mr. Gale's sketch of a few months ago, and will require no other reminder to make them eager for this new book from his hand.

Under such forms of government as those of Great Britain and her Colonies, and the United States, it is the citizens, with the power of the ballot in their hands, who really direct public affairs. They make and unmake cabinets and legislatures. Obviously it is most important that the possessors of so great power should be trained to use it wisely. So thinks Professor Shaler, of Harvard University; and his book, **The Citizen** (A. S. Barnes and Company, New York, 346 pages, \$1.40 net) is a discussion of the rights and

## FACULTY OF MEDICINE

**T**HE regular course of instruction consists of Four Sessions, of eight months each, commencing October 3rd. There is a distinct and separate course for each of the four years.

The degrees conferred by the University of Toronto in Medicine are Bachelor of Medicine (M.B.), and Doctor of Medicine (M.D.). Students may take a combined course in Arts and Medicine if they wish to do so. Arts students who are taking the Honor course in Natural Science are able to fulfil the requirements of the primary work in medicine during their final years in Arts, and thus it is possible to obtain the degrees of B.A. and M.B. upon six years' University training.

Attention is directed to the efficient equipment of the University laboratories for instruction in the practical subjects of the Medical curriculum. The new building of the Medical Faculty has just been completed at a cost of \$175,000.00, in the Queen's Park, and affords extensive laboratory accommodation for Pathology and Physiology which is unsurpassed. The lectures in the final subjects are also delivered in the new lecture theatres. Instruction in the other subjects of the medical course are taught in the various science laboratories and lecture rooms of the University.

To meet the requirements of the Ontario Medical Council, a course of instruction is conducted during a Fifth year. This is entirely optional as far as the University of Toronto is concerned.

Clinical teaching is given in the Toronto General Hospital, Burnside Lying-in Hospital, St. Michael's Hospital, Hospital for Sick Children, and other medical charities of Toronto.

There are special research scholarships offered to graduates in Medicine, and every opportunity is now offered for scientific research work in any of the various laboratories of the University, under the direct supervision of the Professor in charge.

The Faculty provide three medals for the graduating class (one gold and two silver). There are also scholarships available for undergraduates in the First and Second years; these are awarded to the candidates on the results of the annual examinations.

Further information regarding scholarships, medals, etc., may be obtained from the Calendar, or on application to the Secretary.

R. A. REEVE, B.A., M.D.,

Dean.

A. PRINROSE, M.B., C.M.
