# **The Jones** **Underfeed Stoker**

***The Original and  
Only Successful Underfeed.***

This Stoker has been in successful operation in a great many of the up-to-date steam plants, both large and small, and next month we shall let you see what some of our oldest customers have to say.

We effect an economy of from 10 to 25 per cent., according to conditions, and we prevent smoke, as well as increase the capacity of your boilers.

If you use Coal you cannot afford to be without THE JONES STOKER.
