HALIFAX, NOVA SCOTIA, AUGUST, 1902.

No. 8.

Enzymol

Enzymol

dissolves pus, morbid tissue, false membrane, necrosed bone, etc.; cleanses, deoderises and heals old, indolent and foetid ulcers, and is successful in a wide range of pus cases in general—in diseases of the eye, ear, nose and throat, and in genito-urinary cases.

Enzymol was originated, and is made by FAIRCHILD BROS. & FOSTER. Literature concerning its use, and also describing many experiments and investigations in the topical application of the gastric juice—obtained directly from the stomach of living animals—will also be sent gratis to physicians upon request.
