

220-223, 1954, P. A. Fraser. *Excitation of Luminescence in Gases by 2-4 kev Lithium Ions*, *Nature* 178, 1456-1457, 1956, D. Pleiter et R. W. Nicholls. *Luminescence Produced in Air by  $Po^{210}$   $\alpha$  particles*, *Nature* 180, 1188-1189, 1957, R. W. Nicholls et E. M. Reeves. *Excitation of  $N_2$  and  $XXO_2$  by  $\frac{1}{2}$  and 1 MeV Protons*, *Mémoires de la Société de physique* 74, 87-91, 1959, R. W. Nicholls, E. M. Reeves et D. A. Bromley. *Optical Excitation of  $N^+$  by 0.5 to 1.5 MeV Hydrogenic Ions*, *Mémoires de la Société de physique* 76, 217-222, 1960, E. M. Reeves, R. W. Nicholls et D. A. Bromley. *Measurement of Rotational Energy Distributions in Ionic Collisions*, *Mémoires de la Société de physique* 78, 588-593, 1961, E. M. Reeves et R. W. Nicholls. *Excitation of the First Negative System of  $O_2^+$  by a Proton Beam in Air and Oxygen*, *Canadian Journal of Physics* 39, 476, 1961, L. Herman, H. I. S. Ferguson et R. W. Nicholls. *The Distribution of Rotational Energy in  $N_2^+$  Excited by 3 KeV  $Li^+$  Ions*, *Mémoires de la Société de physique*, R. P. Lowe et H. I. S. Ferguson.

Spectroscopie des radicaux libres condensés: *The Phosphorescence of Nitrogen, and Nitrogen-Argon Deposited Films at  $4^\circ K.$* , *Journal of Chemical Physics* 32, 623-624, 1960, H. P. Broida et R. W. Nicholls. *On the Excitation of the Emission Spectrum of NCO in Solid Matrices Condensed at  $4^\circ K.$* , *Canadian Journal of Chemistry* 38, 1652-1656, 1960, R. W. Nicholls et S. N. L. G. Krishnamachari. *Emission Spectra of Solids Condensed at Very Low Temperatures from the Electrical Discharge Products of Nitrogen-Carbon Monoxide and Nitrogen-Acetylene Mixtures*, *Mémoires de l'Académie des sciences de l'Inde* 54A, 61-68, 1961, S. L. N. G. Krishnamachari, R. W. Nicholls et H. P. Broida.

Instruments: *Spectroscopic Intensities and Photographic Blackening*, *Journal of the Optical Society of America* 43, 882, 886, 1953, R. W. Nicholls. *An Audio Frequency Circuit Model of the One-Dimensional Schroedinger Equation and Its Sources of Error*, *Canadian Journal of Physics* 33, 483-491, 1955, J. H. Blackwell, D. R. Fewer, L. J. Allen, R. S. Cass. *Simple and Inexpensive  $f/1.1$  Prism Spectrograph*, *Journal of the Optical Society of America* 48, 358, 1958, E. M. Reeves and R. W. Nicholls. *Spectroscopic Applications of Photographic Emulsion Mosaics*, *Nature* 186, 715, 1960, R. W. Nicholls. *Simple Apparatus for Making 10-100 $\mu$  Spheres of Low Melting Point Metals*, *Reviews of Scientific Instruments* 31, 212, 1960, H. Van der Laan et R. W. Nicholls. *An  $f/6$  Littrow Grating Spectrograph*, *Journal of the Optical Society of America* 51, 353-355, 1961, J. P. Fallona, H. I. S. Ferguson et R. W. Nicholls. *Microsecond Risetime Multi Output Amplifier for Shock-Tube Heat Transfer Gauges*, *Journal of Scientific Instruments* (sous presse), R. A. Koehler.

Facteurs Franck-Condon et  $r$ -centroïdes: *Intensity Distribution of the Second Positive ( $C^3\Pi-B^3\Pi$ ) Band System of Molecular Nitrogen*, *The Physical Review* 77, 421, 1950, R. W. Nicholls. *Intensity Distribution of the First Negative ( $B^2\Sigma-X^2\Sigma$ ) Band System of  $N_2^+$* , *The Physical Review* 82, 290, 1951, R. G. Turner et R. W. Nicholls. *Fractional Transition Probabilities of the First Positive Band System ( $B^3\Pi-A^3\Sigma$ ) of Molecular Nitrogen*, *The Physical Review* 82, 565-566, 1951, C. E. Montgomery et R. W. Nicholls. *The Calculation of Vibrational Transition Probabilities of Diatomic Molecules*, *Canadian Journal of Physics* 31, 1019-1022, 1953, R. W. Nicholls, W. R. Jarman et P. A. Fraser. *Vibrational Transition Probabilities to High Quantum Numbers for the Nitrogen First and*
