"That the Canadian Provinces will become a rich, powerful, and populous country, is certain. No minister, no policy, can prevent that. But whether that wealth, and population, and power, shall be British, is for the wisdom of Government and Parliament to determine. May it not be hoped, that the new constituents, and their representatives, who have now succeeded to power, will make it a point of honor and of pride, not to suffer the empire of their country to receive any detriment under their authority, not a single island to be lost, not one Colony to be severed, not an inch of frontier or fishery usurped, nor any source of wealth or industry to decay; lest it should be written to posterity, that a Reformed Parliament knew not even to sustain and preserve that greatness, which the Boroughmongers had been able to acquire."

If we look at the map, the truth is apparent to the eye, which is seldom adverted to, when we speak of Canada, that a large portion of the Province lying immediately northward of lake Erie, is situated in a lower latitude than the greater part of Michigan, lower than all that fine and fertile region along the great Canal in the State of New York, very little further north than the Pennsylvania line, and in the same parallel with Massachusetts. But it is well known that the church is much less severe between the same parallels, as we approach the west, thus Pittsburgh has a softer winter and a shorter one than Philadelphia, and Buffalo than Albany, so Upper Canada is thuch milder than Massachusetts.

"The most populous portion of Russia is twenty degrees to the north of the American border of Upper Canada; Montreal lies nearly in the same parallel which cuts through the south of France, the Adriatic, and the Black Sea! and above all, the Colonists crowding to that country are Britons—a race proverbially successful in all the tasks to be achieved by patient vigor and fearless adventure. Those men require only room; their native energies will do the rest. The forest will be cleared, the morass drained, the prairie will be a corn-field, the sandy hill will bear the vine, the luge lakes, those mediterraneans of the new world, will be covered with the products of the mineral and agricultural wealth of the country; coal has been already discovered in great abundance; iron and the various metals are already worked;
