Arrival of Gold Gives Impetus to Market Supporters - Local Shares More Active.

Tuesday Evening, Oct. 3.
Activity developed in to-day's io-al market, and most of the speculative Issues were brought into notice. The market assumed a more builtish attitude during take day, takin from European markets, whele an advance in the Germann bank rate caused some heaviness in stocks. The increase in the volume of business was sized up out the street as an effort to stampede traders into long commitments, but caution is still strong among this class. The market was in receipt of no special news to account for higher figures, and prices were bobstered has is usual on such occasions. There were so material advances, the strongest issues being the tractions. The Homestake

Extension

During the past year this company has spent over \$19,000 in in South Dakota. Over 1200 feet of tunnel 7x9 clear has been re buildings erected, machinery installed, and all wants provided for. Mining men of long experience claim the Homestake Extension ore is identical to that of the original Homestake, yet the values of the Homestake Extension run a little higher than they

The development work done and the immense bodies of ore blocked out warrant the directors of the company installing a 100-stamp mill. Negotiations are under way with this end in view. For the purpose of raising money to pay for this mill, the company are offering a limited number of shares for sale at 25 cents per share; and to any investor looking for unusual returns, we would strongly advise an investigation of the merits of this prowould strongly advise an investigation of the merits of this pro-

now of more dignified than proteeting the savings of the investor, on the one nand, nd completing the work of the honest ospector, on the other hand. There is no truer saying in the world than the one, "Money begets money." Comstock, the original locater of the famous Comstock Lode, received six thousand deliars (86009) for a one-quarter interest in property, which, up to the present time, has produced seven hundred million dollars (8700,000,000). The people who really benefited by his discovery were the people who bought the original development stock, which cost them a few cents on the dollar, and which in the height of the mine's prosperity, sold up into the thousands of dollars per share.

Many other properties have realized returns, which, although not as great, have still yielded enormous profits to the original investors, and we feel that it is an opportunity fully as great as this which we offer you when we advise you to purchase the original development shares of the San Francisco Bullfrog Company's stock, which we have been fort mate enough to secure an option on at 15c per
