

JULY,

On the 23d of this month the Sun enters the constellation of Leo, or the Lion, the fifth sign of the Zodiac. It contains 95 Stars and Regulus of the first magnitude.

The first labour of Hercules was, that he tore to pieces with his nails the terrible lion of the woods of Nemeæ, and made a shield and breast-plate of his skin. Jupiter, to commemorate the deed, placed the lion among the constellations.

Dysentery and Bilious Disorders.—The medical qualities of pulverized charcoal are daily developing themselves. In addition to its value in bilious disorders, two ounces of the charcoal, boiled in a pint of fresh milk, may be taken in doses of a wine-glassful, by adults, every two hours, in the most obstinate dysentery, until relief is imparted, which has not failed to be the effect in almost every instance. It is harmless and the experiment may be safely tried. Charcoal made from maple wood is the fittest for this purpose.

The weather during this month may be expected to be uniformly fine, with the exception of occasional severe thunder storms. The glass on the 21st will stand, at 11 o'clock in the forenoon, at 90 in the shade.

Third Quar. 5d 0h 13m even. First Quar. 21d 9h 41m even.
New Moon, 13d 3h 26m even. Full Moon, 28d 0h 23m even.
