AVOID HARSH PILLS DOCTORS CONDEMN THEM

Most Pills unfortunately are harsh and drastic; they cause inflammation and great discomfort. Rather like nature is the way a pill should act, mildly but effectively. Science has established nothing more satisfactory as a family pill than the old reliable pills of Dr. Hamilton's, which for forty years have had a premier place in America. Dr. Hamilton's Pills are very mild and can be effectively used by the aged, by children, and indeed by men and women of all ages. No stomach or bowel medicine is more reliable. No remedy for indigestion, headache or biliousness is so effective, so mild, so certain to quickly cure as a 26c. box of Dr. Hamilton's Pills.

A pound of borax dissolved in twelve gallons of water makes a good sprinkler for manure piles or stables to prevent flies from breeding. It is also good for prury vultures.

TORONTO GIRL RUNS APARTMENT ELEVATOR

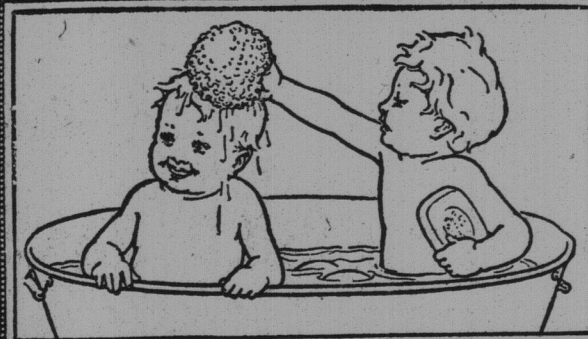

New Sphere for Women Worker's Opens up in Ontario City

Toronto, Oct. 11.—Many and varied have been the occupations opened up to women through the war, but none is more novel than that held by Miss Daisy Warren, a young English woman, who is the first elevator operator in Toronto.

Mr. and Mrs. Ridge, who have taken over the new management of the Isabella Apartments in Sherbourne street, are responsible for the innovation. "Women have been doing war work all through England," remarked Mr. Ridge, "and have made wonderful strides in the last year in fitting themselves to relieve men for military service. In the hotels all elevators are run by women, also the larger ones in the subway, while young maidens of fourteen have taken the place of bell boys, and are giving excellent service. If they can do it in England why not in Canada?"

When the application was sent in to the registration bureau of the Women's Emergency Corps, Mrs. Austin Hutchinson, secretary, filled the vacancy by recommending Miss Warren, who had recently applied to do munition work. "We have more than 1,000 formal registrations," volunteered Mrs. Hutchinson, "and women were never more earnest in their lives. On an average of ten register a day to take any position which will help release men for service. The employers are, however, loath to come forward."

Morning News In Tabloid Form

Paris, Oct. 10.—The official statement announces that in the fighting south of the Somme river today the French troops captured the village of Boven, the north and west outskirts of Abbeville and also the greater part of Chaules Wood. Prisoners to the number of 1,500 were taken in the operations. It is reported that excellent work is also being done by the aviators of the French army, especially south of the Somme.

Gains in Macedonia.

London, Oct. 10.—The entente forces continue to make advances on the Macedonian front. The Bulgarians appear to be demoralized and are content to drop back before repeated onslaughts. British cavalry has occupied several important positions. The Serbs have crossed the Cerna river at two places and Skochvir is now in their hands with a large number of prisoners. In the Ruman theatre the allied forces have not been so successful and have been forced to withdraw from certain positions before numerically superior forces on the Carpathian frontier. The Italians report gains on both the Albanian and Alpine fronts. Canadians Fought Well.

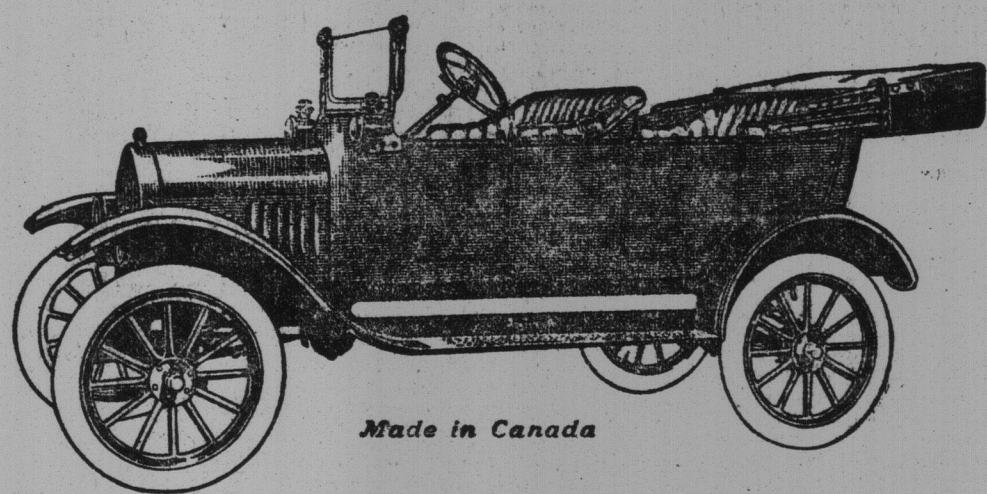

London, Oct. 10.—A report given out from the Canadian Corps Headquarters in France says that when the first great attack was launched at 6.20 a. m. on September 15 the Fifth Canadian Infantry brigade was in divisional second reserve. The 22nd French-Canadian battalion did excellent work in the fighting and although in reserve the greater part of the morning of the fight, at 3.30 in the afternoon the order was given to go forward. The 26th N. B. Battalion did the "mopping up" and rounded up the prisoners captured and held them until escorted back to the stations in the rear of the lines. Many tales of great individual heroism are told of the engagement, and all the Canadians fought with the greatest valor.

Hearst Gets Quiet.

London, Oct. 10.—The Hearst syndicate, known officially as the International News Service, has received a quietus at the hands of the government, when the secretary of state was today directed that no representative of that organization be permitted the use of the official press bureau and that the agency be delisted for the use of all other facilities for the transmission of news, until further notice. This action was taken when the government had secured evidence that despatches had appeared in American papers from time to time purporting to have been given out in London, and which had not had the centre of the empire as their source.

The directors of National Service assembled in Ottawa yesterday for their first meeting. Sir Thomas Tait heads the conference and the conference is likely to last some days. The greatest prob-

lem which confronts the commission is some scheme whereby its ideas may be put into effect. Their work must depend largely on moral suasion, 'tis said. To purify cistern water put charcoal in a bag and hang it in the water.
