## WHAT'S DOING IN THE MONEY AND STOCK MARKETS TODAY

### ANALYSIS OF INCREASE IN CANADA'S TRADE

(Bank of Commerce Circular)

December exports of Canadian products were valued at \$110,873,425, as compared with \$86,304,163 in the corresponding month of 1921, the increase being \$24,569,262. Imports amounted to \$70,304,888, an increase of \$10,164,722 over the figures of December, 1921. The United Kingdom's proportion of our exports in December was \$36,223,026, and that of the United States \$36,204,744. To all other countries the exports for December totalled \$18,445,653. On the other hand, the United States sold to Canada in the same month \$36,204,744. A substantial proportion of the increase in imports from the United States during November and December was due to not only a large volume, but also the higher cost of coal. December figures are not available, but in November 1,919,038 tons were imported at a value of \$10,164,722. In value the increase was \$4,200,000 for that month alone.

Great Britain continues to be Canada's best customer, having purchased Canadian products in 1922 to the value of \$37,470,194, as compared with \$24,569,262 in 1921. The increase in the value of goods purchased by the United Kingdom in 1922 over those of 1921 was \$12,900,932, and purchases by the United States exceeded those of the preceding year by \$14,094,908. Goods exported to all countries in 1922, including those mentioned, were valued at \$864,262, an increase of \$1,065,763 over the previous calendar year.

Canada's purchases from the United States during 1922 showed a marked decrease as compared with those of 1921, amounting to \$36,204,744, as compared with \$36,204,744 in 1921. The total value of all goods imported during 1922 was \$70,304,888, or 18.1% less than in 1921.

### BANKING AND FINANCE

(Bank of Commerce Circular)

Securities issued and sold by Canadian municipalities during 1922 amounted to about \$80,000,000, of which only a small proportion was for the purpose of refunding matured funded obligations. During January an unusual number of new issues were announced. At the end of November last the loans of chartered banks to municipalities amounted to \$69,889,887, or \$10,204,889 less than in November, 1921. Part of the reduction is due to an improvement in tax receipts in Western Canada. The monthly statements of the chartered banks for December, 1922, showed an increase of \$10,260,227, in loans in Canada and abroad decreased by \$19,284,072. From a total of \$908,621,540 at the close of November last, current loans in Canada declined during the month by \$40,408,264, or slightly more than at the corresponding period a year ago, when similar loans aggregated \$1,174,088,446, as compared with \$1,065,226,894 in December last.
