LEAN YEARS COMING.

London, Eng., Aug. 31—Sir William Beveridge, director of the London School of Economics, believes that the country is entering on a period of bad trade and severe unemployment. The present period of decreasing trade is chiefly due to inflation of credit, he said, which caused prices to go up. Heavy taxation is another obvious cause.

Fundamental Progress

We have made an exhaustive analysis of the Canadian pulp and paper industry. The sound foundation for the increased value of its securities is clearly shown. This foundation is based, first, upon the wonderful combination in Canada of immense areas of use pulpwood with abundant water-powers in close proximity; and, second, broad markets for pulp and paper products dependent for supply on Canada's production. This information, plus the facts that we give you on production costs, selling prices and expanding domestic and foreign markets, should strengthen your confidence tremendously if you are a holder of pulp and paper securities. It will please us to send you a copy of this analysis if you will write for it. We think it will please you equally to receive it. Address:

THE STEEL TRADE.

Montreal Herald—At the present time the steel companies all over the continent are not feeling the degree of depression which is manifesting itself in certain other lines of business. This is no doubt due in large part to the orders which are banked high on the books of the companies. It is naturally a debatable point as to whether the steel business will have its period of lessened activity brought about through a slackening of demand. At all events there
