

U.S. Soldiers Engaged All-Day Fighting the Filipinos.

RETREAT OF AGUINALDO Natives Burn Bridges and Villages—Heavy Losses on Both Sides Reported.

Manila, March 27, 7:40 a.m.—The Americans have advanced along the line of the Dagupan railroad, driving the Filipinos from Manila north to Maycaayan, where there were 2,000 inhabitants.

Manila, March 27, 7:40 a.m.—A thousand Filipino soldiers, composing the rear guard of the rebel army, which is retreating on Aguinaldo's headquarters, made stand today in some strong entrenchments about Marikina, across the river.

Washington, March 27.—A table despatch has been received from General Otis saying that the battle continued throughout today with the loss of about forty on the American side.

Washington, March 27.—Major Simpson, chief of the military information bureau was again busy today assembling the latest information from the scene of battle, and so arranging it on military maps, as to show the progress of the engagement.

Manila, March 27, 7:40 p.m.—The American forces advanced from Maycaayan, the brigade commanded by General Arthur, being on the left of the railroad and General Hays on the right.

Manila, March 27, 2:30 p.m.—General McArthur's division spent the night and morning at Maycaayan, the next station beyond Polo. After reconnoitering his front, he pushed along the railroad this afternoon towards Malesolo.

Manila, March 27, 3:25 p.m.—There are no more trenches to encounter, although over thirty villages, including the general settlements of Balacana and Marikina, intervene.

Manila, March 27.—Fire broke out today in the old five storey building occupied by Acker, Merriam and general grocers, which runs from Chambray to Warren street.

THE CAPTURE OF ILOILO

Natives Prepare to Resist United States Troops, but Were Shelled by the Warships.

Steamer Tacoma, which arrived from Orient, brings news that several of the foreign business houses in Iloilo have suffered more seriously in the destruction of their property by the Filipino insurgents than was at first supposed.

Sir Louis Davies was in possession of the town for the past few days, but is better today. Hon. Chief Justice, who was confined to his room for several days, was able to be out for a couple of hours on Saturday, and was at the office of the interior department this morning.

The Tees Arrives.

The Steanch Vessel Suffers Little by Her Detention on the Rocks.

Steamer Tees arrived in port at 1:30 p.m. after being detained for twenty-two hours beyond her schedule since a reef about 100 miles north of Vancouver Island.

There are 148 items, consisting of queries and motions, of the order paper and before Thursday is reached and the debate on the address over this number will be greatly swelled.

Sporting Intelligence.

Although it would seem that Association football will never attain to the same measure of popularity in Victoria as Rugby, there are indications that interest in the "soccer" game is on the increase.

THE CAPTURE OF ILOILO Natives Prepare to Resist United States Troops, but Were Shelled by the Warships. Steamer Tacoma, which arrived from Orient, brings news that several of the foreign business houses in Iloilo have suffered more seriously in the destruction of their property by the Filipino insurgents than was at first supposed. One English firm alone, Messrs. W. F. Stevenson & Co., estimates its actual losses at between \$120,000 and \$140,000 Mexican. The loss is made up of hemp stored in godowns or warehouses and a hemp press. The offices of the firm of Messrs. Smith, Bell & Co., were des- troyed, and Messrs. Hinkley & Co. had premises and stock burned. The losses falling upon some of the English Insurance companies will be heavy. The large French firm of jewellers, La Estrada del Norte, is reported to have lost \$300,000 worth of property. When it became evident that there was to be no peaceful surrender of the town, the shop assistants filled their pockets with diamonds and the most valuable jewelry, hoping to carry them off to the refuge barges and vessels in the bay, but before they could escape from the shops the insurgents held them up, relieved them of all the valuables, and looked the premises. The houses were then set on fire and the fire spread to the capture of Iloilo was done with- out difficulty. Brigadier-General Miller gave the insurgents 24 hours to evacuate. They did not do so, but began to throw up earthworks and brought guns into position to play on the Petrel and the Boston. When they opened fire the warships replied, and soon swept the Filipinos from their trenches. A hand-to-hand fight took place on the Boston, with 48 marines, who hoisted Old Glory over the fort and Governor's palace shortly after, and the 11th United States Infantry and Tennessee volunteer regiments, with Battery G of the 6th Light Artillery were sent into the city immediately, assembling guns on the banks and public property. The Filipinos had time to set fire to the American, English and German consulates, a godown and two other houses, and all these buildings have been destroyed. The finely ar- rived of the troops prevented further damage, as it was the avowed intention of the natives to burn the town if forced to retreat. A private letter to the Chicago Daily Mail describes the terrible death of a young Spanish girl named Eugenia Diaz during the bombardment. One of the shells from the American ships struck the house where she resided, her mother and penetrating the walls, cut off the girl's head clean from the shoulders. The scene was a horrible one, and the following day the can soldiers buried the unfortunate girl with full military honors. The soldiers made a beautiful casket and borne it to the cemetery just outside the town. The girl is said to have been very handsome, and was only eighteen years of age. Her mother, in a most awful affliction, was robbed by the insurgents of all her money and jewellery. CANADIAN BREVITIES. St. Stephen, N.B., March 24.—While attending a church social last night W. H. Morgan, pastor of the Baptist church in this town, was shot by a man who congregated in the bar. The man is Toronto, March 24.—The death is announced of Patrick Hughes, formerly a prominent merchant of this city. He was 65 years of age. A statement respecting the need for funds for prosecuting work in the goldfields has been issued by the home mission committee of the Presbyterian church. The contributions for this year for home mission work are larger than any previous year, but owing to the extension of work in the Klondike region and in the mining districts of British Columbia the expenditure has grown greatly and the committee has to present this \$12,000 or \$13,000 short of the sum needed to meet its obligations. Brockville, March 24.—The new skating rink collapsed last night. The loss is \$3,000. Montreal, March 24.—Archbishop Brochu has created a great sensation in theatrical circles by writing to the proprietor of the Grand Theatre stating that unless some of the pieces in the repertoire of French opera are eliminated he will be obliged to forbid the faithful to attend. Winnipeg, March 25.—Eighty-four British immigrants for Manitoba and 35 Nova Scotians for British Columbia arrived here yesterday morning. St. Catharines, Ont., March 25.—John O'Meara, aged 73, was struck by a horse taking freight and running over him. Fort William, March 25.—The death occurred here of Michael Dwyer, of Port Arthur, inspector of government roads and bridges. London, March 25.—Rev. Ira Smith has resigned the pastorate of the Talbot Street Baptist Church. Toronto, March 25.—The bill introduced in the legislature by T. Tucker, Conservative, prohibiting civil servants from taking part in elections under a penalty of \$200 fine and forfeiture of position for four years, was rejected on the motion for second reading by a majority of ten. PHOTOGRAPHING OF SOUND. Madison, Wis., March 24.—Professor R. W. Wood of Wisconsin University, has succeeded in making photographs of waves of sound in the air. The sound wave is the crack of an electric spark and it is illuminated and photographed by means of the light of a second spark, which flashes between two magnesium fires at some distance behind the first, and at an interval of about one ten thousandth of a second after the first spark. The second wave is thus caught before it is out of the field of the instrument, although moving with a velocity of 1,000 feet per second. The wave appears as a circle of shadow with a light border. PEDLAR BADLY FROZEN. Wetskiwin, N.W.T., March 24.—An Assyrin pedlar named Geo. Nofeld, was yesterday brought in from fifty miles east of Wetskiwin in a late stage of frost, having been wandering on the prairie for nine days without food. Nofeld is in a very weak state and there is no hope of saving his feet. THE POISONING MYSTERY. New York, March 24.—A clerk attached to the Washington Hotel, Jersey City, has turned over to the police a note which is considered an important clue in the Barnes-Adams case. It appears the couple occupied a room for the night at this hotel on two or three occasions last summer. They registered under the name of Mrs. M. Barnett. On their last visit the husband, Charles, which the police think may prove to have belonged to one of the persons mentioned in connection with the poisoning of the late Senator, was seen at work on the signatures on the check register. EDITOR CHARGED WITH ASSAULT. Ottawa, March 27.—Mr. E. W. Morrison, editor of the Ottawa Citizen, was in the police court this morning charged with assaulting Mr. W. H. Johnston, editor of the Tribune, who was brought in to appear, and the case was adjourned until Wednesday. In granting the adjournment Magistrate O'Garra said he would be able to dispose of the case sooner than most people would imagine. If what he read in the papers was correct it was a case for commitment. THE FRENCH IN AFRICA. London, March 25.—The settlement between Great Britain and France, disposing of hundreds of thousands of square miles, has given great satisfaction in this country, where it is considered fair by both parties and has special value in finally averting, as far as diplomatic documents can, the risk of future disputes. Moreover, an important feature of the agreement providing equality in the about one ten thousandth of a second after the first spark. The second wave is thus caught before it is out of the field of the instrument, although moving with a velocity of 1,000 feet per second. The wave appears as a circle of shadow with a light border. PEDLAR BADLY FROZEN. Wetskiwin, N.W.T., March 24.—An Assyrin pedlar named Geo. Nofeld, was yesterday brought in from fifty miles east of Wetskiwin in a late stage of frost, having been wandering on the prairie for nine days without food. Nofeld is in a very weak state and there is no hope of saving his feet. THE FRENCH IN AFRICA. Nofeld is in a very weak state and there is no hope of saving his feet. THE FRENCH IN AFRICA. London, March 25.—The settlement between Great Britain and France, disposing of hundreds of thousands of square miles, has given great satisfaction in this country, where it is considered fair by both parties and has special value in finally averting, as far as diplomatic documents can, the risk of future disputes. Moreover, an important feature of the agreement providing equality in the about one ten thousandth of a second after the first spark. The second wave is thus caught before it is out of the field of the instrument, although moving with a velocity of 1,000 feet per second. The wave appears as a circle of shadow with a light border. PEDLAR BADLY FROZEN. Wetskiwin, N.W.T., March 24.—An Assyrin pedlar named Geo. Nofeld, was yesterday brought in from fifty miles east of Wetskiwin in a late stage of frost, having been wandering on the prairie for nine days without food. Nofeld is in a very weak state and there is no hope of saving his feet. THE FRENCH IN AFRICA.
