we are at pence with all nations, that we heen greatly blessed by Providence, and that the scourge, cholers, has been staid. Our felations with Great Britain are of a friendly character.—The recent alteration in the anvigation laws by Great Britain, and reciprocated in by us, are likely to prove materially advantageous. A slight interruption in the diplomatic relations with France has been terminated. Our minister had been received in that country, and one had been appointed to this government.

The suppression of the Expedition against Cuba is slightly alluded to.—The President studiously avoided interference during the conflict between Austria and Hungary. He stood prepared in case of success on the part of the Hungarians to welcome them among the firmily of nations.—He invested an agent with power to recognise their independence should circumstances justify it.

Our claims upon Portugal have been pressed with renewed vigor. During the late revolution at Rome our charge had been unable to present his letters of credence. The President recommends the cultivation of friendly relations with Mexico, and the faithful observance of treaties.—He recommends close relations of friendship with South American states burdering on the Pacific. A Bold Pitcs of VILLAINY.—A keg of powder was recently placed beneath the Congregational meeting-house at Endfield, (Mass.) and a clow matel laid to it, for the purpose of blowing up the building. The powder was accidentally discovered, and the plan frustrated, before the originators had carried out their too evident purpose. A concert was soon to have been given in the church, and sound think that that time was set for the explosion. The Ware Gazette says the presumed object of this diabolical outrage was revenge upon certain proprietors of the church, who had taken active measures to put down the sale of liquors in that town, by prosecutions. There is a clue to the individual who is supposed to have arranged the plot.
