

MAGICAL

is the effect produced on a big family wash by a single cake of SURPRISE soap.

The housewife's labor is reduced one half; the original snowy whiteness is restored to the linens without boiling or hard rubbing and the disagreeable odors so noticeable with other soaps is done away with entirely.

And yet it costs no more than ordinary soaps.

Lawyers will hardly find wireless telegraphy so productive of fees as was the telephone. Litigation over which put millions into their pockets. Prof. Bell had a strenuous time. He took the first working model of his instrument to John A. Logan and offered "Black Jack" half interest for \$2,500, saying that it would do away with the telegraph and that there would be millions in it. Logan replied: "I dare say your machine works perfectly, but who would want to talk through such a thing as that, anyway? I advise you to save your money, young man." Bell then offered a tenth interest to an examiner in the patent office for \$100 in cash. It was refused. That tenth interest was worth \$1,600,000 in fifteen years. The giant intellect that refused it is still examining patents.

The kiss of her little granddaughter on her ear fractured the eardrum of Mrs. Martha Allen, of New York, and she will be taken to a New York hospital for treatment. At the time of the occurrence she had the child in her arms, and though she at once experienced strange, rumbling sounds that proved very annoying and nearly drove her crazy, she did not entirely lose the use of the ear. An examination of the organ shows a scar on the eardrum that experts say is a puncture about the size of the head of a pin, and which was caused by the violent concussion in close proximity to the drum by the child's lips.

Mrs. Luella Lane, of Rumford Falls, Me, the mother of eight children and a comparatively young woman, is the proprietor of one of the most flourishing farms of her vicinity. Five years ago when she took charge of the estate of 300 acres it was in a run-down condition and was stocked with implements which were of the most primitive sort. Dairying is Mrs. Lane's specialty. She has a herd of twenty-five thoroughbred Holstein cows, from twenty to forty hogs, according to the season, and keeps five work horses busy. Her farm is stocked with tools and machines of the most improved kinds.
