One of these is a plank looking to the reduction of the representation of cer-tain southern states in the electoral college and in congress. It is built upon what is known as the Payne resolution offered eight years ago, but goes further than either. The plank directs an investigation to ascertain whether there have been unconstitutional disfranchisements of voters in any state and if so, demands a reduction of the represen-tation of such states in congress, with the consequent reduction in the electoral college and in national conventions.
