

Why do "Page Fences Wear Best"?

BECAUSE—They are made of wire 50% stronger than Common Spring Steel Wire, so called.

BECAUSE—The horizontal wires are **COILED**. Mind you, **COILED**, not **CRIMPED**. A **COIL** gives several times the elasticity that does a crimp. This **COIL** is what enables Page Fences to do with posts long distances apart.

Our prices are very low, as you can judge for yourself when we tell you that we can deliver an 8-wire, **HIGH CARBON FENCE**, to any station east of Manitoba, and wherever we have a dealer, an experienced man with the proper tools will assist in putting the fence on the posts, if the order is of fair size, for not to exceed 41 cents per rod. All of our other styles in proportion, some for less money and some more.

We have all kinds, some close mesh (19 bar, 57 inch), some light (5 bar, 36 inch), some heavy (all No. 9 gauge.)

The railroads use Page Fencing in large amounts. Practically every road in Canada is using it. Look at this list, the first four of which each have from 100 to 1,000 miles in use, and the others each have from 10 to 100 miles:

8 th	No. 12	
8 th	"	10
7 th	"	"
7 th	"	"
7 th	"	"
6 th	"	"
5 th	"	"
4 th	"	"
3 rd	"	"

Bay of Quinte Ry.
Algoma Central Ry.
Baie des Chaleurs Ry.

Now, you know railroad corporations do not buy large amounts of goods, and keep on buying the same kind year after year unless they prove by use to be good value. Railroad men now acknowledge that **PAGE FENCE** is the best and cheapest.

NOTE—All Page Fences are now painted **WHITE**—our special distinguishing mark. Get the **WHITE** brand and you will have our make of fence.

Also Page Gates, from \$1.75 up. Ornamental Lawn Fence, from 20c. per running foot. Also Poultry Netting.

Have Exact Weight in Butter Boxes

The Dairy Commissioner, Mr. Ruddick, informs us that he has received a number of communications recently from Great Britain in regard to uniform weight of butter in what is intended to be the 56-lb. box. Boxes of Canadian butter are frequently marked 57, 58 and 60 lbs. The 56-lb. box was adopted because it represents half an English cwt. If any other weight is marked and invoiced, the advantages of having such a standard is lost. Butter merchants in Great Britain are as much influenced by a matter of this kind as they are by the quality of the butter itself.

New Zealand, Australia and the Argentine pay particular attention to this matter of weight and every package received in Great Britain from these countries contains the exact weight of 56 lbs., no more, no less. Because of this fact, New Zealand butter, though no better in quality than Canadian, is receiving a premium over the latter. Canadian butter makers will have to give more attention to this matter if they wish to compete successfully with these countries.

Every butter box should be weighed after the parchment lining is placed therein, the tare marked on it and then filled with the proper amount of butter to ensure its turning out 56 lbs.

"Hans, how long have you been married?"
"Well, dis is a ting that I seldom don't like to talk about, but ven I does, it seems so long as it never vas."

If your Dealers do not handle our Fences write to us.
