

The Problem of Winter Feeding

You are now facing the problem of winter feeding, and it is one worthy of great consideration, if you value the health of your stock and hope to keep them in proper condition until the spring.

Once the animals are tied up for the winter they are immediately deprived of exercise, green grass and various herbs, which they have been accustomed to during the spring, summer and fall while on the free range—and which act as natural tonics to the digestive organs, thus helping the animals to assimilate the food they eat. Stall feeding is entirely different, and if not properly carried out will uncondition any stock. Dry or winter feed even of the best, if not mixed with ingredients to promote digestion, soon causes stomach troubles, and your animals cease to thrive, with the result that the spring finds your herds and your profits in grave danger of being depleted. Don't risk having unfit stock.

Some people asked, the other day—in fact, people are asking me every day—what has made my horses' coats so nice and glossy. I think once you feed a horse with INTERNATIONAL STOCK FOOD TONIC, and get him in good shape for the Spring work, he will stay fat and have a better coat. No after using the INTERNATIONAL STOCK FOOD TONIC.

I have been using your INTERNATIONAL STOCK FOOD TONIC for over seven years, and it is just as good as ever, and it is.

Waterville, Que.
I have always found your STOCK FOOD to be a valuable TONIC on my farm, and I have now used it for the past five years and have not had a sick horse or cow for one single day in that time. My six cows are so fat and healthy now as at any time in the Summer and are always ready for their feed, and am certain they are giving more milk than other flocks—those who don't feed INTERNATIONAL STOCK FOOD TONIC, as it keeps the animals healthy and in good shape, whether horses or cows or pigs.
