said to have to commence al peat beds BEWARE OF PLANTING TREES OR SHRUBS IN VEGETABLE MANURE.

The Horticulturist gives this timely caution to planters of trees and shrubs:

"A mistaken opinion seems to be entertained "A mistaken opinion seems to be entertained by many, that any manure will do for trees and shrubs, and the amateur planter, thinking that wood mould, chip manure and decaying sods from some cesspool will prove desirable, at once uses it freely in filling up the holes dug for the new trees. Perhaps no greater injury has ever been done in horticulture than the recommendation by incorporated writers of recommendation by inexperienced writers of chip manure as a dressing. Its danger rises mainly from its ready disposition to spread fungi, which inevitably rises in soils naturally a little moist and tenacious. And when once formed, it spreads with astonishing rapidity, totally preventing growth and finally killing the tree or shrub."

FRUIT PROSPECTS.

We learn from the Horticulturist that "there has never been so cheering an outlook from all parts of the United States for fruit crops, as this year. We may expect a most bountiful season, and even for grain it is admitted to be the most promising year."

THE $\mathbf{D} \mathbf{A} \mathbf{Y}$

IS OFFERED IN ENTIRE CONFIDENCE TO FARMERS AND DEALERS IN THE DEPART-MENT of Agricultural Implements. It is inferior to none as a labor-saving implement. It is operated with ease by a lad 12 or 14 years old.

This Rake is the result of steady and repeated experiments. They are manufactured from good material and are well finished, being nicely painted, striped and varnished.

The Advantages Claimed for the Day Rake, are

1st—The teeth are supported at a greater distance from the head or place of fastening, which is desirable.
2nd—The head is so attached that it permits the teeth to drop below the level of the bottom of the

wheels.

3rd—The operator can raise the teeth eight inches above the winrow in discharging the hay.
4th—It will rake a larger winrow than any other Rake now made.

5th—The operator has perfect control of the teeth, to make thom pass lightly over the ground or press them down to gather heavy hay.

6th—The wheels running upon an elevation will not raise the teeth from the ground.

7th—The teeth are so shaped and attached that they do not scratch or harrow the ground like mos Steel Teeth Rakes.

8th—It is easier worked than any other Rake.

9th—The hay will not run out at the ends of Rake.

10th—It can be used to good advantage for spreading hay.

11th—The seat can be raised or lowered, to suit size of person operating.

Agents Wanted. Send for Price List, &c. All orders addressed to the undersigned at Brantford will be promptly attended to.
