

Cost and Service

The two factors considered before a purchase is made.

Steel Truss Barns

measure up to every requirement. They are as sturdy as a skyscraper. They have no cross-beams to hinder unloading or mowing away. They are fire and lightning-proof. They have metal clad, roller doors, lift roof-lights, sliding side windows and "Acorn" ventilators. The cost will compare favorably with a wood frame barn.

Send for a copy of new book, "The Steel Truss Barn."

Glencairn Ayrshires Herd established 40 years. Producing ability from 8,600 to 11,022 lbs. If that sort of production appeals to you, we have heifers all ages and young bulls for sale. Thos. J. McCormick, Rockton Ont., Copetown, Sta., C.T.R.

Gossip.

F. W. Ewing's Shorthorns.

F. W. Ewing of Elora, Ont., is one of those breeders who never allows the price to interfere when selecting a herd header, if the breeding and standard of excellence is up to his ideal. For some years he used the exceptionally well-fleshed and richly-bred bull, Proud Monarch, a bull that has to his credit many prize winners. Now on his daughters Mr. Ewing is using the Jilt-bred bull, Escana Ringleader, a son of the great sire, Imp. Right Sort and out of Imp. Red Rosemary. This bull was first at Toronto as a senior calf. He cost a long price but results are amply repaying the outlay for he is nicking remarkably well with Mr. Ewing's high-class herd of Scotch females. This herd has produced many extra choice animals, but the young things never looked so promising as this year, both in young bulls and heifers. Of the former a particularly good one is a roan, 7-months-old Wimple; another is a 10-months-old white bull, a Claret; another roan, 6-months-old, is a Stamford, and another, same age, is a Martha. Another Martha-bred one is a red 11-months-old. Then there is a white yearling, English Lady bred. He is got by Clan Alpine. This is certainly one of the extra good kind carrying a wealth of flesh evenly put on. Another big, thick, white yearling is a Claret and sired by Proud Monarch. The coming season will find Mr. Ewing's herd stronger than ever before in young herd headers; there are also a few females that can be spared.

Glencairn Ayrshires.

Established 40 years ago by the late James McCormick the Glencairn herd of record-making Ayrshires in the hands of their present owner, Thos. J. McCormick, have reached a high standard both as individuals and producers. Juno of Rockton 2nd, has been 8 months in the official R. O. P. test and has given 8,700 lbs. Juno of Rockton 3rd has completed her test with 11,028 lbs. Mill-creek Daisy 2nd, as a 3-year-old has been 7 months in the test and has given 6,900 lbs. Springhill White Ada, qualified as a 3-year-old with 10,000 lbs. Nell of Rockton qualified in the mature class with 8,600 lbs., etc. These mentioned are a representative average of the herd for production. Seldom is there seen in a herd so much excellence of form and such size and strong constitution. The senior sire in service is the strictly high-class bull and proven sire, Springhill Taxmaster, a son of Imp. Derwerd Lely and Imp. Castle Mains Minnie 2nd. He is a bull of superior merit, exceptionally quiet to handle and a sire of big producing and high testing daughters. He is for sale and is a bull fit to head any herd. Junior in service is Springhill Admiral a son of the renowned champion, Hobsland Masterpiece, and out of the great cow Snowflake. In young bulls for sale are sons of the old bull out of the class of dams mentioned above. Also for sale are heifers, bred, and younger ones, as well as mature cows. Mr. McCormick is also showing something choice in Yorkshires.

A. J. Howden's Shorthorns.

A. J. Howden of Columbus, Ont., is the owner of one of the best herds of Scotch Shorthorns in the country, and the last year has been a record breaker for sales. The good kind is being eagerly sought after by buyers from across the lines, and Mr. Howden certainly has had his share of the business. There are few breeders who pay more attention to their herds' breeding than he. An enumeration of the various tribes represented will show this to be one of the gilt-edged herds on those lines; Missies Clarets, Duchess of Glosters, Nonpareils, Marchioness, Crimson Flowers, Butterflies, and Bridesmaids. There is no better breeding than this and it is equally as good on the sire's side. Mr. Howden is never stuck for something to price, in fact, he will price any in the herd, and there are some nice heifers among the 40 that make up the numerical strength of the herd just now. Ready for service are a quartet of young bulls—a Missie, a Claret, a Crimson Flower and a Duchess of Gloster. Yorkshires too are quite extensively bred on this noted farm and for sale are a number of young sows.

Increased Production!

The Government call to every loyal Canadian engaged in Agriculture is for "Increased Production"—an important factor in the present titanic struggle. With the call to arms never was labor so scarce. Labor-saving devices have saved the day in many cases. Take Dairying: The Sharples Milker does the work of milking in one-third the time at less cost. Any man that owns 15 cows or more should get one. The fact that one man can milk 30 cows an hour is worth thinking over. But the one thing that places the

SHARPLES MILKER

head and shoulders above any other is the patented "Upward Squeeze," which eliminates any possibility of inflamed teats and soothes the cow during milking. The Sharples Milker is a vital factor in the production of Clean Milk. The milk flows from teats to sealed silver buckets through rubber tubes. No stable dust, no stable air, no hands can touch it. Clean milk means more dairy dollars. Increased milk production follows its use in almost every case. Over 300,000 cows milked twice daily by the Sharples is abundant proof of satisfactory service. Our free booklet, "Dairying for Dollars Without Drudgery," contains valuable dairy hints.

"Does Its Bit" In Cream Saving

—no matter how fast or how slow you turn the crank—gets all the cream at any speed. You know it is not humanly possible to operate a separator at the same speed every time. Then get a

SHARPLES SUCTION-FEED CREAM SEPARATOR

It insures your dairy profits and increases production. Perfectly even cream every time, too—that means top prices. Easy to clean—no discs. Easy to turn—low speed. And freedom to turn at any convenient speed. Low supply tank means easy filling. Write for free book, "Velvet" for Dairymen. Address Department 78.

We make a splendid line of Double-Ignition Gasoline Engines, 2 1/2 to 9 horse power. Fully guaranteed.
